The Geography of Religion Roger W. Stump,2008-04-04 The only book of its kind this balanced and accessibly written text explores the geographical study of religion Roger W Stump presents a clear and meticulous examination of the intersection of religious belief and practice with the concepts of place and space He begins by analyzing the factors that have shaped the spatial distributions of religious groups including the seminal events that have fostered the organization of religions in diverse hearths and the subsequent processes of migration and conversion that have spread religious beliefs The author then assesses how major religions have diversified as they have become established in disparate places producing a variety of religious systems from a common tradition Stump explores the efforts of religious groups to control secular space at various scales relating their own uses of particular spaces and the meanings they attribute to space beyond the boundaries of their own communities Examining sacred space as a diverse but recurring theme in religious belief the book considers its role in religious forms of spatial behavior and as a source of conflict within and between religious groups Refreshingly jargon free and impartial this text provides a broad comparative view of religion as a focus of geographical inquiry

Crisp, Adam Dinham, 2018-08-29 The need to reimagine religion and belief is precipitated by their greater visibility in public life Meanwhile social policy responses often see them from a problem based rather than an asset based approach However with growing diversity of religion and belief in every sector comes the potential for new dialogues across previously impermeable policy and disciplinary silos This volume brings together leading international authors to critically consider these challenges within legal and policy frameworks including security and cohesion welfare law health and social care inequality cohesion extremism migration and abuse It challenges policy makers to re imagine religion and belief as an integral part of public life that contains resources practices forms of knowledge and experience that are essential to a coherent policy approach to diversity enhanced democracy and participation

Passionate Peace: Emotions and Religious

Coexistence in Later Sixteenth-Century Augsburg Sean Dunwoody,2022-09-19 In an age characterized by religious conflict Protestant and Catholic Augsburgers remained largely at peace How did they do this This book argues that the answer is in the emotional practices Augsburgers learned and enacted in the home in marketplaces and other sites of civic interaction in the council house and in church Augsburg's continued peace depended on how Augsburgers felt as neighbors as citizens and believers and how they negotiated the countervailing demands of these commitments Drawing on police records municipal correspondence private memoranda internal administrative documents and other records revealing everyday behavior experience and thought Sean Dunwoody shows how Augsburgers negotiated the often conflicting feelings of being a good believer and being a good citizen and neighbor

Urban Religion Jörg Rüpke,2020-02-24 So far religion has been seen as cause for dramatic developments in the history of cities it has contributed to the monumentalisation of centres and or has given importance to ex centric places Very recently anthropologists have been discovering religion in the contemporary global city But still awaiting historical investigation is the specific urban character of religious ideas practices and institutions and the role of urban space shaping this very religion in the course of history The time span from the Hellenistic age to Late Antiquity was crucial in the establishment of concepts and institutions of religion and witnessed extended waves of urbanisation Rome being central to this In addressing this problem this book fills a significant gap in the scholarship on urban religion across time Taking seriously the proposition that space is condition medium and outcome of social relations the development of urban religion in lived urban space and urban culture or urbanity offers a lens onto processes of religious change that have been neglected for the history of religion and for the study of urbanism The key thesis is that city space engineered the major changes that revolutionised religions This stimulating book makes use of archaeology and history to address religion as an essential component of urban life in both the past and the present With a strong basis in the ancient Mediterranean as well as an insightful view of modern urban life R pke emphasizes that the practice and performance of religion at the everyday level is as essential in the creation of an urban ethos as the grand temples and institutions promulgated by the elite Monica L Smith author of *Cities The First 6 000 Years* J rg R pke offers a characteristically original and learned series of reflections on some of the many ways in which the history of religions and the history of cities might be entangled *Urban Religion* offers no single overarching thesis but it is consistently thought provoking and suggests many intriguing lines of investigation for the future Greg Woolf Institute of Classical Studies London

Spaces of Spirituality Nadia Bartolini,Sara MacKian,Steve Pile,2018-02-15 Spirituality is too often subsumed under the heading of religion and treated as much the same kind of thing Yet spirituality extends far beyond the spaces of religion The spiritual makes geography strange challenging the relationship between the known and the unknown between the real and the ideal and prompting exciting possibilities for charting the ineffable spaces of the divine which lie somehow beyond geography In setting itself that task this book pushes the boundaries of geographies of religion to bring into direct focus questions of spirituality By seeing religion through the lens of practice rather than as a set of beliefs geographies of religion can be interpreted much more widely bringing a whole range of other spiritual practices and spaces to light The book is split into three sections each contextualised with an editors introduction to explore the spaces of spiritual practice the spiritual production of space and spiritual transformations This book intends to open to up new questions and approaches through the theme of spirituality pushing the boundaries on current topics and introducing innovative new ideas including esoteric or radical spiritual practices This landmark book not only captures a significant moment in geographies of spirituality but acts as a catalyst for future work
