The Oxford Handbook of Africa and Economics Célestin Monga,Justin Yifu Lin,2015-07-02 A popular myth about the travails of Africa holds that the continent's long history of poor economic performance reflects the inability of its leaders and policymakers to fulfill the long list of preconditions to be met before sustained growth can be achieved These conditions are said to vary from the necessary quantity and quality of physical and human capital to the appropriate institutions and business environments While intellectually charming and often elegantly formulated that conventional wisdom is actually contradicted by historical evidence and common sense It also suggests a form of intellectual mimicry that posits a unique path to prosperity for all countries regardless of their level of development and economic structure In fact the argument underlining that reasoning is tautological and the policy prescriptions derived from it are fatally teleological low income countries are by definition those where such ingredients are missing None of today's high income countries started its growth process with the required and complete list of growth ingredients Unless one truly believes that the continent of Africa and most developing countries are ruled predominantly if not exclusively by plutocrats with a high propensity for sadomasochism the conventional view must be re-examined debated and questioned This volume the second of the Oxford Handbook of Africa and Economics reassesses the economic policies and practices observed across the continent since independence It offers a collection of analyses by some of the leading economists and development thinkers of our time and reflects a wide range of perspectives and viewpoints Africa's emergence as a potential economic powerhouse in the years and decades ahead amply justifies the scope and ambition of the book

Food Security in Africa United States. Congress. House. Committee on Foreign Affairs. Subcommittee on Africa and Global Health,2007 West Africa ,1987 The Nile River System, Africa Bakenaz A. Zeidan,Aly Islam Metwally Aly,2024-02-17 The Nile River System Africa Ecohydrology and Management from Catchment to Coast Volume Two provides a critical synthesis of knowledge for an important global region It covers water availability and needs in the Nile basin focusing on socioeconomic hydrological and ecological aspects and the catchment coast continuum also providing the information needed to develop a policy for the river that is less skewed toward immediate human needs and more focused on environmental impacts Readers will find ecological perspectives recent stresses the current status of the basin and more The greater integration of ecological and river management themes is the main strength of this book making it a strong reference for academics and water resources managers as well as fishery experts aquatic scientists and social scientists Provides a basis for improved environmental management of the Nile River basin from its headwaters to the Mediterranean Sea Presents a multidisciplinary approach covering both environmental and societal needs Includes case studies from this diverse river that can be applied globally
