New Approaches to Chinese Word Formation Jerome L. Packard, 2011-07-22 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language. The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science. TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages. It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language. TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints. High quality standards are ensured through anonymous reviewing.

New Terms for New Ideas Michael Lackner, Iwo Amelung, Joachim Kurtz, 2001 This volume is about the lasting impact of new Western notions on the 19th and early 20th century Chinese language: their invention, spread and standardization. Topics examined range from preconceptions about the capacity of the Chinese language to accommodate foreign ideas, the formation of specific nomenclatures and the roles of individual translators to Chinese and European attempts at coming to terms with each other's grammar. A valuable reference work for all those interested in the historical semantics of modern China.

Chinese Lexical Semantics Qin Lu, Hong Gao, 2016-01-11 This book constitutes the thoroughly refereed post-workshop proceedings of the 16th Chinese Lexical Semantics Workshop CLSW 2015 held in Beijing, China, in May 2015. The 64 regular and 4 short papers included in this volume were carefully reviewed and selected from 248 submissions. They are organized in topical sections named: lexical semantics, lexical resources, lexicology, natural language processing and applications, and syntax.

Researching Collocations in Another Language Andy Barfield, Henrik Gyllstad, 2009-10-09 This volume brings together original research in the four areas of L2 collocation: learner corpora, L2 collocation lexicographic and classroom materials, L2 collocation knowledge assessment, and L2 collocation learner processes. Each area is covered by three research chapters and a dedicated commentary chapter by experts in the field.

The Moral Metaphor System Ning Yu, 2022 This book uses conceptual metaphor theory to explore moral metaphors in English and Chinese. Ning Yu sheds light on the metaphorical nature of moral cognition and how it is systematically manifested in language and explores the potential commonalities that define moral cognition and the differences that characterize distinct cultures.
