Autism: The Movement (Sensing) Perspective a Decade Later Elizabeth B. Torres,Jonathan T. Delafield-Butt,Vikram K. Jaswal,Susan Crawford,Ashok Srinivasan,Brittany Travers,2025-08-19 A decade ago in 2013 the Research Topic Autism the Movement Perspective proposed the radical idea that using movement and its sensations could help us better understand the many complex layers of autism spectrum disorders Inspired by earlier work from other fields the work positioned front and center approaches from neuromotor control infusing the research with new computational ideas to study autism across the human lifespan Through the lens of motor variability as a form of kinesthetic reafference causal inference and predictive codes the Research Topic brought together a group of researchers parents practitioners and self advocates to rethink autism as sensory motor differences contributing to the emergence of powerful coping mechanisms that advanced our

understanding of how the human brain develops and functions Today with new improvements in biosensing technologies and neuroscience and the embodied and affective psychology on which development is based we revisit this Research Topic approaching autism anew through a modernized lens of precision aimed at enabling socio motor agency

The Twenty Most Effective Language Teaching Techniques I.S.P. Nation,2024-09-16 From leading scholar and applied linguist Paul Nation this book describes and explains the 20 most effective and efficient language teaching techniques and why they work Backed by decades of research and expertise Nation examines the principles of learning connected to these techniques as well as the factors affecting their choice and usage These techniques are organized around the four skills of listening speaking reading and writing For each skill there is an opportunity for learning through meaning focused use an opportunity for learning through deliberate study and a window for fluency development through working with easy material Each technique is described and analyzed to demonstrate its learning goals and the principles of learning in use In demonstrating key techniques and methods for language learning this book is particularly useful for pre service teachers and students in applied linguistics TESOL and language teaching Each chapter also has a substantial list of research topics for projects or theses

DeGarmo's Materials and Processes in Manufacturing Ronald A. Kohser,Peter C. Collins,J. T. Black,2025-02-11 Classic textbook introducing key concepts in manufacturing with a focus on practical applications updated to include the latest industry developments For over 65 years DeGarmo s Materials and Processes in Manufacturing has comprehensively presented both traditional and new manufacturing materials processes and systems in a descriptive non mathematical manner Students are first introduced to a range of engineering materials including metals plastics and polymers ceramics and composites The processes used to convert this stuff into things are then described along with their typical applications capabilities and limitations Segments cover casting forming machining welding and joining and additive manufacturing Supporting chapters present concepts relating to material selection heat treatment surface finishing measurement inspection and manufacturing systems The Fourteenth Edition has been updated to reflect the most current technologies Coverage of additive manufacturing 3D printing has been significantly expanded along with updates on new and advanced materials Case studies are featured throughout the book and review problems have been placed at the end of each chapter A full collection of online bonus material is provided for both students and instructors DeGarmo s Materials and Processes in Manufacturing Fourteenth Edition includes information on Equilibrium phase diagrams and the iron carbon system heat treatment and process capability and quality control Expendable mold and multiple use mold casting processes powder metallurgy particulate processing fundamentals of metal forming and bulk forming and sheet forming processes Cutting tool materials turning and boring processes milling drilling and related hole making processes and CNC processes and adaptive control in the A 4 and A 5 levels of automation Sawing broaching shaping and filing machining processes thread and gear manufacturing and surface integrity and finishing processes DeGarmo s Materials and Processes in Manufacturing has long

set the standard for introducing students to the materials and processes in product manufacturing and has been incorporated in programs of manufacturing mechanical industrial metallurgical and materials engineering as well as various technology degrees Its descriptive nature provides an excellent first exposure to its various subjects which may then be followed by advanced courses in specific areas
