Division of Educational Programs,1991 **The Human Development** Valentin Matcas,2016-04-20 What is more significant to develop in life your mind or your body Both are nice to privilege maintain and develop since they are both important And if this is the case then why do you see people taking care only of their bodies Why are you always more desirable in society through your bodily appearance and through your social influence than through your intelligence creativity and other cognitive abilities Why can you not find in the media entertainment and in society people engaged in a continuous development but remaining preoccupied with addictions bodily needs continuous servitude and social competition And now if you had the chance to develop as intensely as you could what exactly would you enhance the most Because throughout life people neglect to develop important aspects related to their mind and bodies while privileging other activities instead only because these happen to render them happier more popular and therefore more successful in a stereotypical manner But how exactly do you know how to develop How can you even tell what is pertinent to

do in life You already know all the legal moral social and religious beliefs and tendencies of what to do and how to behave and develop but you cannot even follow them or not entirely since you have other things to do as everybody else And now by engaging in all addictions entertainment and other irrelevant activities you take away from your own development and fulfillment If you can even identify your own meaning and fulfillment in life besides what you see around What can you do Reason at the third intelligent human level through the extraordinary human mind if you can ever understand the human mind in the first place Because all knowledge provided to you consensually by the current science stands at the first servitude ideological level while all physiological tendencies coming from the human body are at the second animal level remaining incompatible You may still reason and develop through your human mind yet you have to be able to identify and remove all irrelevant and harmful beliefs stereotypes and entire ideologies in order to be able to reason accurately We notice now a discrepancy between people s meaningful adequate development and the consensual behavior demanded by others and meant for servitude indoctrination and social acceptance coming for stereotypical purposes However can you even define the adequate the meaningful and the proper human development and how this should take place You can always trace it if you can ever identify the actual accurate human meaning in life and in this world This book studies the human development at cognitive social higher and physical levels in order to help you learn how to develop your mind body and intelligences along with all their cognitive abilities This study is done from objective cognitive and behavioral perspectives at the levels of your mind body higher self and much more
