Howard A. Snyder, 2005-08-08 This updated best seller challenges the reader to examine the current church structure. If you have never read this classic you have missed a treasure chest of information and wisdom from one of the most respected authors of our time. Wine the gospel of Jesus Christ and Wineskins the man made structures of the church. How do the two relate? What happens when new wine is poured into old wineskins? What about making new wineskins? In short, What kinds of church structures are most compatible with the gospel in our modern techno urban society? Snyder addresses these questions and provides some challenging answers. In the course of his argument he discusses the fellowship of the Holy Spirit, the mind of Christ, the role of spiritual gifts, the pastor as a superstar, and renewal that is deeply spiritual and immediately practical.

Generous Orthodoxies Paul Silas Peterson, 2020-04-30 After the birth of the Protestant ecumenical movement in the late nineteenth and early twentieth centuries and following the first great wave of universal Christian ecumenism in the 1960s and 1970s after the Second Vatican Council, prominent theologians of nearly every ecclesial tradition charted new territory in the last decades of the twentieth century. They crossed boundaries within their own ecclesial traditions and built bridges to other Christian churches, churches that were once excluded from fellowship. In the development of these new programs of ecumenical theology, the theologians redefined their own confessional identities and in many cases crossed the liberal-conservative divide within their own traditions. This volume introduces this fascinating dynamic of theological mediation, redefinition, and generosity. It shows how the ecumenical impulses which were directed outwardly to other traditions had reflexive effects inwardly. Working in the realms of both historical and systematic theology, the essays in this volume provide a critical analysis of the history of this general theological sentiment and offer an outlook for its future. Grasping Truth and Reality Donald Le Roy Stults, 2008-08-01 When Lesslie Newbigin returned to Britain in 1974 after years of missionary service he observed that his homeland was as much a mission field as India where he had spent the majority of his missionary career He concluded that the Western world needed a missionary confrontation Instead of the traditional approach to missions however Newbigin realized that the Western world needed to be confronted theologically From his earliest days at Cambridge University Newbigin developed certain theological convictions that shaped his understanding of the Christian faith Newbigin utilizes these theological convictions as criteria for evaluating the belief system of Western culture and for providing an answer to Western culture's dilemma It is Newbigin's contention that the West is suffering from a loss of purpose because at the time of the Enlightenment it rejected a belief system that gave it purpose This was also a belief system that made it uniquely different from the rest of the world particularly Asia The Enlightenment reintroduced humanism and dualism into Western culture which resulted in the loss of purpose and the rise of skepticism Modern science and the scientific method in the form of scientism added to the problem making human reason the measure of truth and limiting facts to only that which could be verified through controlled experiment Newbigin's solution is to reintroduce the Christian belief system into Western culture in order to restore purpose and truth to Westerners and to put them into contact with true reality through Jesus Christ He desires to do this in the context of both modernism and post modernism This book will discuss Newbigin's theological convictions and how they factored into both his

critique of and his solution for Western culture's spiritual and worldview problems **Authentic Reconstruction** John Bold, Peter Larkham, Robert Pickard, 2017-12-14 Notions of authenticity lie at the heart of many questions about heritage and identity in the built environment. These questions are most pertinent when buildings have been destroyed in disaster or war and the built fabric is being reconstructed to reinstate traditional or historic appearances in place of what was lost. *Authentic Reconstruction* examines this idea of reconstruction using it as a prompt to examine a range of deeper issues on heritage and the built environment. From post WWII reconstruction programmes through to the rebuilding of historic cultural landscapes lost in natural disasters, this collection of essays by heritage specialists provides a wide range of case studies and discussions. Each presents responses to crises and lessons learned in order to extrapolate general guidelines for future actions by politicians, architects and planners in reconstructing buildings. The book also looks beyond disaster and war, noting how authenticity bears on political intentions and image building, exploring how reconstruction is used to tell a political or historical story, so conditioning the ways in which the built environment is perceived and appreciated by its users. This is not just about the buildings as bricks and mortar but about perceptions of identity and the social and historical values which buildings and spaces embody for a richly diverse population. This book will be valuable to all who are concerned with heritage as practitioners or consumers, particularly those concerned with reconstruction and the creation of authentic places and experiences: architects, architectural historians, town planners, preservationists, conservationists and those involved in heritage management and material culture Innovation Imperative Göran Marklund, Nicholas S. Vonortas, Charles W. Wessner, 2009-01-01 Focuses on the changing roles and challenges of innovation and growth policy and the strategies and measures that are critical in a globalizing world. This title provides guidance for innovation policy, strategy formulations and design of innovation policy measures **Making Strange** Herbert Grabes, 2008-01-01 This compact indispensable overview answers a vexed question: Why do so many works of modern and postmodern literature and art seem designed to appear strange and how can they still cause pleasure in the beholder? To help overcome the initial barrier caused by this strangeness, the general reader is given an initial non-technical description of the aesthetic of the strange as it is experienced in the reading or viewing process. There follows a broad survey of modern and postmodern trends illustrating their staggering variety and making plain the manifold methods and strategies adopted by writers and artists to make it strange. The book closes with a systematic summary of the theoretical underpinnings of the aesthetic of the strange, focussing on the ways in which it differs from both the earlier aesthetic of the beautiful and the aesthetic of the sublime. It is made amply clear that the strangeness characteristic of modern and postmodern art has ushered in an entirely new third kind of aesthetic, one that has undergone further transformation over the past two decades. Beyond its usefulness as a practical introduction to the aesthetic of the strange, the present study also takes up the most recent cutting-edge aspects of scholarly debate while initiates are offered an original approach to the theoretical implications of this seminal phenomenon Strategies for

Phenomenology Anna-Teresa Tymieniecka, 2012-12-06 The following bibliography arranged chronologically permits the reader to follow the development of phenomenological studies in Italy in parallel with other contemporary cultural currents From this list it can be seen that knowledge of Husserl's work begins in 1923 with the studies of A Banfi Phenomenology however did not immediately receive a warm welcome It contrasted with the then dominant neo idealism as has been made clear by G De Ruggiero but for this very reason it also found adherents among the opponents of idealism These were either distant heirs of positivism who accepted Husserl on account of his scientific approach and rigor or Christian oriented thinkers who following an initial period of diffidence toward the antimetaphysical attitude of phenomenological analysis gradually began to use this method as an antiidealist instrument even though the problem remained of Husserl's own transcendental idealism and the value to be attributed to it Despite the difficulties encountered on the way the numerous studies carried out in Italy prior to World War II make it clear that the better known philosophers who have left a mark on Italian culture already had begun to take a discreet interest in phenomenology
