## Raging Planet Fire:

**Investigating Natural Disasters Through Children's Literature** Anthony D. Fredericks, 2001-04-15 Natural disasters enthral with their potency might and devastation Tap into students inherent awe of storms volcanic eruptions hurricanes earthquakes tornadoes floods avalanches landslides and tsunamis to open their minds to the wonders and power of the natural world Using quality children s literature as a springboard to learning this guide extends the understanding of science concepts through short activities longer projects and adventures This participatory approach keeps the focus on the processes of science and promotes a personal response to learning Students can use the literature and activities not just to better understand the forces of nature but to grasp the implications of that potency on the lives of people near and far

Grades 3-6    **Narrative Across Media** Marie-Laure Ryan, 2004-01-01 Narratology has been conceived from its earliest days as a project that transcends disciplines and media The essays gathered here address the question of how narrative migrates mutates and creates meaning as it is expressed across various media Dividing the inquiry into five areas face to face narrative still pictures moving pictures music and digital media Narrative across Media investigates how the intrinsic properties of the supporting medium shape the form of narrative and affect the narrative experience Unlike other interdisciplinary approaches to narrative studies all of which have tended to concentrate on narrative across language supported fields this unique collection provides a much needed analysis of how narrative operates when expressed through visual gestural electronic and musical means In doing so the collection redefines the act of storytelling Although the fields of media and narrative studies have been invigorated by a variety of theoretical approaches this volume seeks to avoid a dominant theoretical bias by providing instead a collection of concrete studies that inspire a direct look at texts rather than relying on a particular theory of interpretation A contribution to both narrative and media studies Narrative across Media is the first attempt to bridge the two disciplines

**Legend of the Fire Eye** Lyn Chamberlain, 2000 Eons ago the Conclave of Sensi chose Cera as a laboratory for creating consciousness True the work was experimental but it had been successful long before the rebellion that threatened to destroy the planet Led by the High Priestess Khyan and her first apostle Rhee ten members of the Khyan Circle of Fostering decide upon a desperate plan for survival Escaping a fiery destruction is only the beginning The bizarre world that appears beneath them demands new risks They must become something far different than what they have been High up in the Fourth Valley of the White Mountains in this strange new homeland the repulsive upright ones await their destiny They have lived here for ages past but they aren t prepared for life in the future Symbolic features in Legend of the Fire Eye promise to give it a niche in the New Myth now being written At the same time it will fit well on the traditional fantasy bookshelf

**Becoming Abolitionists** Derecka Purnell, 2022-10-04 One of the New York Times 6 New Paperbacks to Read Now in paperback and with new material a 2021 Kirkus Best Book of the year in both Nonfiction and Current Events the book Naomi Klein called a triumph of political imagination and a tremendous gift to all movements

struggling towards liberation For more than a century activists in the United States have tried to reform the police Millions of people continue to protest police violence because these solutions do not match the problem the police cannot be reformed In her critically acclaimed first book *Becoming Abolitionists* Purnell draws from her experiences as a lawyer writer and organizer initially skeptical about police abolition She saw too much sexual violence and buried too many friends to consider getting rid of police in her hometown of St Louis let alone the nation But the police were a placebo Calling them felt like something and something feels like everything when the other option seems like nothing Purnell details how multi racial social movements rooted in rebellion risk taking and revolutionary love pushed her and a generation of activists toward abolition The book travels across geography and time and offers lessons that activists have learned from Ferguson to South Africa from Reconstruction to contemporary protests against police shootings Here Purnell invites readers to envision new systems that work to address the root causes of violence *Becoming Abolitionists* shows that abolition is not solely about getting rid of police but a commitment to create and support different answers to the problem of harm in society and most excitingly an opportunity to reduce and eliminate harm in the first place

### **The Origin of God** Wesley Lloyd

Cann,2009-03-27 Have you ever wondered where the Universe came from Did it come from a big bang billions of years ago or did an Intelligence far beyond our own create it If the Universe was created then why was it created and what s its purpose What s man s purpose where did we come from did we evolve from primordial ooze or were we created in the likeness of that same intelligence Did this intelligence this God always exist Where did he come from how did he come into existence Why would this God this spirit have the likeness of a man with arms legs and feet Answers to these questions have eluded mankind since the dawn of time Many theories have attempted to answer them but there are always flaws Questions still remain Questions such as where did the matter and energy of this big bang come from how could it just happen to be there I believe that hidden deep in the pages of the Bible lay the answers to all of these questions and for thousands of years no one has realized it nor been able to put it all together However after seven years of research I believe that this book can answer all of the above questions without leaving any loose ends I believe that contained within the pages of this book lay the answers to all of mankind s deepest questions Answers to questions such as where did God come from why was the Universe created what is mankind s purpose and the age old question which came first the chicken or the egg This little book can also tell you where we as a civilization are headed and what our ultimate fate will be all from the Bible

**Global Burning** Eve Darian-Smith,2022-04-19 How extreme right antidemocratic governments around the world are prioritizing profits over citizens stoking catastrophic wildfires and accelerating global climate change Recent years have seen out of control wildfires rage across remote Brazilian rainforests

densely populated California coastlines and major cities in Australia What connects these separate events is more than immediate devastation and human loss of life In Global Burning Eve Darian Smith contends that using fire as a symbolic and literal thread connecting different places around the world allows us to better understand the parallel and related trends of the growth of authoritarian politics and climate crises and their interconnected global consequences Darian Smith looks deeply into each of these three cases of catastrophic wildfires and finds key similarities in all of them As political leaders and big business work together in the pursuit of profits and power anti environmentalism has become an essential political tool enabling the rise of extreme right governments and energizing their populist supporters These are the governments that deny climate science reject environmental protection laws and foster exclusionary worldviews that exacerbate climate injustice The fires in Australia Brazil and the United States demand acknowledgment of the global systems of inequality that undergird them connecting the political erosion of liberal democracy with the corrosion of the environment Darian Smith argues that these wildfires are closely linked through capitalism colonialism industrialization and resource extraction In thinking through wildfires as environmental and political phenomenon Global Burning challenges readers to confront the interlocking powers that are ensuring our future ecological collapse

Plato. Characteristics of Christian civilization. The modern university. The pulpit and the press. "The testimony of the rocks;" a defense Peter Bayne,1860      Asha-Land Richard Leviton,2022-04-29 A METAPHYSICAL PICARESQUE ADVENTURE INTO THE GEOMANTIC MYSTERIES OF THE EARTH WITH ANGELIC ACCOMPANIMENT In 2095 three Light grid engineers undertake a world restoration tour of the esoteric energy body of the planet to fine tune an upgrade that started in 2020 Their fixer upper itinerary takes them to England Montenegro South Africa Ethiopia Colombia Armenia Pakistan South Korea Finland 14 stops in all The Earth has been birthing a landscape of Light and Truth out of itself since 2020 but it needs some professional tweaking and housecleaning to complete its transformation Some parties vigorously oppose this upgrade and have to be dealt with others heartily support it It's been like that since the beginning of the Earth Lars Jaanusson a Boston book editor narrates the fieldwork in a manner that is both whimsical and serious The tour was an immersion in mythopoesis You find you're living and working inside the world's myths when you do this work Much is at stake but you have to stay light hearted on the job he says Lars and his two companions Beatrice Goldoni from Italy and Bogdan Hazurov from Bulgaria enjoy the technical assistance of two angelic orders The Ofanim jokey and amiable while brandishing huge swords of Light and the Serafim doing business as the fierce Valkyries of legend who take no prisoners among the enemies of the Earth The planet's upgrade just finishing up in 2095 was scheduled at its inception in fact as early as its design phase Many of its problems and enemies go back to that beginning too Not everyone was in favor of a world with this much Light and Truth and so elegant a geometric design or grid in Light That's why much of the narrative recounts what it took to pull out the deep resistant dark minded roots that have disturbed the Earth and humans for millennia It's an altogether different take on the Apocalypse
