Railways In The Victorian Economy Studies In Finance And Economic Growth:

Railways in the Victorian Economy M. C. Reed,1968 The World's First Railway System Mark Casson,2009-09-10 The British railway network was a monument to Victorian private enterprise Its masterpieces of civil engineering were emulated around the world But its performance was controversial praised for promoting a high density of lines it was also criticised for wasteful duplication of routes This is the first history of the British railway system written from a modern economic perspective It uses conterfactual analysis to construct an alternaive network to represent the most efficient alternative rail network that could have been constructed given what was known at the time the first time this has been done It reveals how weaknesses in regulation and defects in government policy resulted in enormous inefficiency in the Victorian system that Britain lives with today British railway companies developed into powerful regional monopolies which then contested each other s territories When denied access to existing lines in rival territories they built duplicate lines instead Plans for an integrated national system sponsored by William Gladstone were blocked by Members of Parliament because of a perceived conflict with the local interests they represented Each town wanted more railways than its neighbours and so too many lines were built The costs of these surplus lines led ultimately to higher fares and freight charges which impaired the performance of the economy The book will be the definitive source of reference for those interested in the economic history of the British railway system It makes use of a major new historical source deposited railway plans integrates transport and local history through its regional analysis of the railway system and provides a comprehensive classified bibliography **British Economic and Social History** R. C. Richardson,William Henry Chaloner,1996 **The Origins of Railway Enterprise** Maurice W. Kirby,M. W. Kirby,2002-07-04 This book argues for the significance of the Stockton and Darlington Railway in Britain s industrialisation The Civil Engineering of Canals and Railways before 1850 Michael M. Chrimes,2017-09-08 Between 1750 and 1850 the British landscape was transformed by a transport revolution which involved engineering works on a scale not seen in Europe since Roman times While the economic background of the canal and railway ages are relatively well known and many histories have been written about the locomotives which ran on the railways relatively little has been published on how the engineering works themselves were made possible This book brings together a series of papers which seek to answer the questions of how canals and railways were built how the engineers responsible organised the works how they were designed and what the role of the contractors was in the process **The State and Business in the Major Powers** Robert Millward,2013-03-12 In the 19th and early 20th centuries the state emerged as a major player in the economies of the Western World This important new volume provides an economic history for the period 1815 1939 of state business relations in the major powers France Germany Japan Russia UK and the USA The book challenges the traditional story that the scale of state intervention reflected the degree to which each country was ideologically committed to laissez faire and which also tended to assume that governments were interested in economic growth and raising average living

standards Robert Millward gives a rather different perspective arguing that the scale of state intervention and the differences across countries were motivated more by considerations of external defence and internal unification than by any notions of promoting economic growth or adherence to laissez faire This book provides for the first time an integrated economic history of these state business relations in the major powers in the period 1815-1939 and offers a completely new perspective on the links between tariff policies state enterprise in manufacturing the treatment of the peasantry regulation of railways taxation of the business sector policies on cartels trusts and competition **Crewe: Railway Town, Company and People 1840-1914**

Diane K. Drummond, 2017-07-05 This is an important contribution to the new urban history describing and analysing one of the best examples of a company town in nineteenth century Europe This archetypal railway town was built on a green field site by a railway company in 1842-3 It was a major junction an administrative centre and an important manufacturing centre Thus it provides an ideal arena in which to study the relationship between company and people and the effects of this claustrophobic association on emerging economic and social structure and politics in the era of large scale development and modernisation in Europe and America Dianne Drummond applies the full range of modern urban historical approaches in this work It is a shining example of the ways in which new techniques in research analysis and comparison can redraw the best known histories It will be essential reading for urban historians *The Global Economic System I.*

Wallace, 2002-09-26 The author provides a treatment of world economic geography as a whole He sets out the historical context of the modern world along with the principal philosophies that have shaped our study of it and identifies the importance of the biophysical environment as well as cultural and political settings for economic activity **Industrial**

Clusters and Regional Business Networks in England, 1750-1970 John Wilson, Andrew Popp, 2017-07-05 Although economists have long recognised industrial districts as one of the key features of an economy only recently has attention focused on the region as an effective means of generating accurate insights into the larger picture of economic performance Using a copious range of research material examining several British regions *Industrial Clusters and Regional Business Networks in England 1750-1970* poses a series of fundamental questions about the nature of industrial clusters and networks Particular attention is paid to identifying the basic characteristics of a network outlining how they evolved in key industrial clusters and assessing their impact on industrial performance both regionally and nationally The durability of such networks is another key thread that runs through the essays prompting comparison with industrial clusters in Britain and abroad These issues also stimulate discussion on disciplines of business economic and social history *International Bibliography of*

Business History Francis Goodall, Terry Gourvish, Steven Tolliday, 2013-12-16 The field of business history has changed and grown dramatically over the last few years There is less interest in the traditional company centred approach and more concern about the wider business context With the growth of multi national corporations in the 1980s international and inter firm comparisons have gained in importance In addition there has been a move towards improving links with mainstream

economic financial and social history through techniques and outlook The International Bibliography of Business History brings all of the strands together and provides the user with a comprehensive guide to the literature in the field The Bibliography is a unique volume which covers the depth and breadth of research in business history This exhaustive volume has been compiled by a team of subject specialists from around the world under the editorship of three prestigious business historians

Capital, Entrepreneurs and Profits Richard Davenport-Hines, 2012-11-12 First Published in 1990 This volume starts with an introduction to the first works on business history since 1924 looking at the work of Francis Hyde in Liverpool and Harvard This is a collection of articles reprinted from the first 25 years of the journal Business History which was bi annually available until in 1981 when it increased to three issues The contributions demonstrate that the interpretation of business history has been very wide falling into the area of economic history Law and Legal Process Matthew Dyson, David Ibbetson, 2013-07-25 This collection of papers from the Twentieth British Legal History Conference explores the relationship between substantive law and the way in which it actually worked Instead of looking at what the courts said they were doing it is concerned more with the reality of what was happening To that end the authors use a wide range of sources from court records to merchants diaries and lawyers letters The way in which the sources are used reflects the possibilities of legal historical research which are opening up in the twenty first century as large databases and digitised images and even online auction sites make it a practical possibility to do work at a level which was almost unthinkable only a short time ago

The Origins of Modern Financial Crime Sarah Wilson, 2014-06-05 The recent global financial crisis has been characterised as a turning point in the way we respond to financial crime Focusing on this change and crime in the commercial sphere this text considers the legal and economic dimensions of financial crime and its significance in societal consciousness in twenty first century Britain Considering how strongly criminal enforcement specifically features in identifying the post crisis years as a turning point it argues that nineteenth century encounters with financial crime were transformative for contemporary British societal perceptions of crime and its perpetrators and have lasting resonance for legal responses and societal reactions today The analysis in this text focuses primarily on how Victorian society perceived and responded to crime and its perpetrators with its reactions to financial crime specifically couched within this It is proposed that examining how financial misconduct became recognised as crime during Victorian times makes this an important contribution to nineteenth century history Beyond this the analysis underlines that a historical perspective is essential for comprehending current issues raised by the fight against financial crime represented and analysed in law and criminology as matters of enormous intellectual and practical significance even helping to illuminate the benefits and potential pitfalls which can be encountered in current moves for extending the reach of criminal liability for financial misconduct Sarah Wilson's text on this highly topical issue will be essential reading for criminologists legal scholars and historians alike It will also be of great interest to the general reader The Origins of Modern Financial Crime was short listed

A History of Auditing Derek Matthews, 2006-09-27

The rise of the British accountancy profession from the late nineteenth century to the present day and the world wide success of its accountancy firms were to a large extent based on the growth of the audit function This book explores the history of the audit process in Britain demonstrating that the characteristic features of the auditing industry are a diversity in practice based largely on the different types of clients the auditors serve The book examines the innovation that was brought about by the staggering developments in information technology which have been seen over the last few centuries This comprehensive history will be a useful reference tool for accounting business and economic historians and will also be an enlightening read for all those with an interest in auditing procedures

Searching for a path out of distance fares Norman

Kellermann, 2018-08-29 This work reconstructs the history of fare policy in the European passenger railway industry and integrates behavioural pricing theory into an agent based simulation model for railway revenue management The model is employed to conduct artificial experiments on fare innovations It represents supply and demand on a transport market including car traffic and is calibrated with empirical data of an incumbent European railway The model uses a combination of marketing concepts dynamics in time and social interaction of consumers to analyse revenue effects of different pricing options This book provides insights for readers interested in the commercial aspects of transportation history Furthermore it is directed at researchers interested in pricing theory and the simulation method It is also a rich source of information for practitioners in the revenue management branches of transport enterprises

Women and Their Money 1700-1950

Anne Laurence, Josephine Maltby, Janette Rutterford, 2008-11-20 This book the first of its kind will be of interest across several disciplines including economics economic history business history British history and women gender history The fact that the essays reach beyond Britain and include work on Germany Australia Italy Canada Sweden and the West Indies will stimulate interest throughout and even beyond the English speaking world There is a growing interest in the study of women

s economic activity which reflects the recognition that economics and economic business history are not gender neutral subjects *Railways in the Victorian Economy* M. C. Reed,1969 **North East England, 1850-1914** Graeme J. Milne,2006 The development of the coalfield and the riparian manufacturing districts moulded new industrial landscapes the growth of ports and conurbations demanded innovative approaches to government and administration and the business strategies of North East entrepreneurs challenged conventional boundaries The author concludes that riverside districts on the Tyne Tees and Wear represented more viable working horizons than any regional North East in this era and raises important questions about the study of the English regions in their historical context Jacket **The Dynamics of Victorian Business** Roy Church,2013-11-05 First Published in 2005 This volume looks at the problems and perspectives of Victorian Business in the 1870s The purpose of this collection of essays is to explore further that part of the thesis tentatively advanced in interrogative mode in 1975 concerning the course of industrial development during the second and third quarters of the nineteenth century
