Lima, 2024-07-03 This book brings together the work of researchers from a variety of fields to provide a comprehensive synthesis of local and regional studies in the town of Gurup in Brazil ranging from archaeological findings to ethnohistory and sociocultural anthropology     *Flooded* Peter Taylor Klein, 2022-07-15 Winner of the 2023 Marysa Navarro Best Book Prize from the New England Council for Latin American studies In the middle of the twentieth century governments ignored the negative effects of large scale infrastructure projects In recent decades many democratic countries have continued to use dams to promote growth but have also introduced accompanying programs to alleviate these harmful consequences of dams for local people to reduce poverty and to promote participatory governance This type of dam building undoubtedly represents a step forward in responsible governing But have these policies really worked *Flooded* provides insights into the little known effects of these approaches through a close examination of Brazil's Belo Monte hydroelectric facility After three decades of controversy over damming the Xingu River a tributary of the Amazon the dam was completed in 2019 under the left of center Workers Party becoming the world's fourth largest Billions of dollars for social welfare programs accompanied construction Nonetheless the dam brought extensive social political and environmental upheaval to the region The population soared cost of living skyrocketed violence spiked pollution increased and already overextended education and healthcare systems were strained Nearly 40 000 people were displaced and ecosystems were significantly disrupted Klein tells the stories of dam affected communities including activists social movements non governmental organizations and public defenders and public prosecutors He details how these groups as well as government officials and representatives from private companies negotiated the upheaval through protests participating in public forums for deliberation using legal mechanisms to push for protections for the most vulnerable and engaging in myriad other civic spaces *Flooded* provides a rich ethnographic account of democracy and development in the making In the midst of today's climate crisis this book showcases the challenges and opportunities of meeting increasing demands for energy in equitable ways     *Latin America & the Caribbean* Kevin Hillstrom, Laurie Collier Hillstrom, 2003-12-02 A concise yet thorough overview of the environmental issues problems and controversies facing Latin America and the Caribbean from the tip of South America to the Windward Islands Home to Earth's longest mountain range largest river and greatest rainforest no region boasts greater geographic extremes faces greater

environmental dangers and enjoys more economic potential from its biodiversity than Latin America and the Caribbean What are the political and economic factors affecting the Amazon's rapidly disappearing rainforest What is being done to harvest life saving drugs from the plants of the Orinoco And what lies behind the mysterious disappearance of Central America's frogs The work includes essays tables and figures and an appendix titled International Environmental and Developmental Agencies Organizations and Programs on the World Wide Web Latin America the Caribbean examines a region waking up to its environmental problems and possibilities *Contemporary Ethnic Geographies in America* Christopher A.

Airriess,2015-09-28 Ethnic diversity has marked the United States from its inception and it is impossible to separate ethnicity from an understanding of the United States as a country and Americans as a people Since the 1965 Immigration and Nationality Act the United States has experienced watershed transformations in its social cultural and ethnic geographies Considering the impact of these wide ranging changes this unique text examines the experiences of a range of ethnic groups in both historical and contemporary context It begins by laying out a comprehensive conceptual framework that integrates immigration theory globalization transnational community formation and urban cultural and economic geography The contributors then present a rich set of case studies of the key Latin American Asian American and Middle Eastern communities comprising the vast majority of newer immigrants Each case offers a brief historical overview of the group's immigration experience and settlement patterns and discusses its contemporary socioeconomic dynamics All these communities have transformed and been transformed by the places in which they have settled Exploring these changing communities places and landscapes this book offers a nuanced understanding of the evolution of America's contemporary ethnic geographies **Dialogues in Urban and Regional Planning** Michael Hibbard,Robert Freestone,Tore Øivin

Sager,2013-05-29 Dialogues in Urban and Regional Planning 5 is a selection of some of the best scholarship in urban and regional planning from around the world The internationally recognized authors of these award winning papers take up a range of salient issues from the theory and practice of planning The topics they address include the effects of globalization on world cities metropolitan planning in France and Australia and new research in pedestrian and traffic design The breadth of the topics covered in this book will appeal to all those with an interest in urban and regional planning providing a springboard for further debate and research The papers focus particularly on themes of inclusion urban transformation metropolitan planning and urban design The Dialogues in Urban and Regional Planning DURP book series is published in association with the Global Planning Education Association Network GPEAN and its member national and transnational planning schools associations **Amazonian Geographies** Jacqueline Vadjunec,Marianne Schmink,2014-07-16 Amazonia exists in our imagination as well as on the ground It is a mysterious and powerful construct in our psyches yet shares multiple trans national borders and diverse ecological and cultural landscapes It is often presented as a seemingly homogeneous place a lush tropical jungle teeming with exotic wildlife and plant diversity as well as the various indigenous

populations that inhabit the region Yet since Conquest Amazonia has been linked to the global market and after a long and varied history of colonization and development projects Amazonia is peopled by many distinct cultural groups who remain largely invisible to the outside world despite their increasing integration into global markets and global politics Millions of rubber tappers neo native groups peasants river dwellers and urban residents continue to shape and re shape the cultural landscape as they adapt their livelihood practices and political strategies in response to changing markets and shifting linkages with political and economic actors at local regional national and international levels This book explores the diversity of changing identities and cultural landscapes emerging in different corners of this rapidly changing region This book was published as a special issue of the Journal of Cultural Geography

*City Life from Jakarta to Dakar* Abdou Maliq Simone, 2010-01-27 *City Life from Jakarta to Dakar* focuses on the politics incumbent to this process an anticipatory politics that encompasses a wide range of practices calculations and economies As such the book is not a collection of case studies on a specific theme not a review of developmental problems nor does it marshal the focal cities as evidence of particular urban trends Rather it examines how possibilities perhaps inherent in these cities all along are materialized through the everyday projects of residents situated in the city and the larger world in very different ways

**Towns, Ecology, and the Land** Richard T. T. Forman, 2019-02-07 Towns and villages are sometimes viewed as minor even quaint spots whereas this book boldly reconceptualizes these places as important dynamic environmental hotspots Multitudes of towns and villages with nearly half the world's population characterize perhaps half the global land surface The book's pages feature ecological patterns processes and change as well as human dimensions both within towns and in strong connections and effects on surrounding agricultural land forest land and arid land Towns small to large and villages are examined with spatial and cultural lenses Ecological dimensions water soil and air systems together with habitats plants wildlife and biodiversity are highlighted A concluding section presents concepts for making better towns and better land From a pioneer in both landscape ecology and urban ecology this highly international town ecology book opens an important frontier for researchers students professors and professionals including environmental town and conservation planners

*Forest Lost* Maron E. Greenleaf, 2024-10-07 *Forest Lost* is an ethnography of forest carbon offsets and the wider effort to make the living rainforest valuable in the Brazilian Amazon

**Beyond the Megacity** Nadine Reis, Michael Lukas, 2022-03-01 *Beyond the Megacity* connects and reconnects the global debate on the contemporary urban condition to the Latin American tradition of seeing considering and theorizing urbanization from the margins It develops the approach of peripheral urbanization as a way to integrate the theoretical agendas belonging to global suburbanisms neo Marxist accounts of planetary urbanization and postcolonial urban studies and to move urban theory closer to the complexity and diversity of urbanization in the Global South From an interdisciplinary perspective *Beyond the Megacity* investigates the nature's causes implications and politics of current urbanization processes in Latin America The book draws on case studies from various countries across the region

covering theoretical and disciplinary approaches from the fields of geography anthropology sociology urban studies agrarian studies and urban and regional planning and is written by academics journalists practitioners and scholar activists Beyond the Megacity unites these unique perspectives by shifting attention to the places processes practices and bodies of knowledge that have often been neglected in the past

**Another Boom for Amazonia?** Jr. Penn, 2010-05 This study examines the socioeconomic and environmental implications of the new camu camu industry in Peru Camu camu *Myrciaria dubia* is a small tree native to wetlands of the Amazon basin It is especially abundant in Peruvian Amazonia The high vitamin C content of the fruit has generated interest in exporting camu camu products from Amazonia to more developed countries The government of Peru has been actively promoting this new extractive industry as well as the planting of camu camu in rural areas Non governmental development organizations and private industry are now actively involved with camu camu projects and enterprises In Peru enthusiasm for this native species is high because camu camu is expected to provide a much needed and sustainable economic boost for the region However many questions about the environmental implications and socioeconomic impacts of the camu camu export industry need to be answered in order to understand its ecological and economic viability and its effects on business and in rural communities Winner of 2010 Dissertation Excellence Award Findings indicate that camu camu has provided significantly more income to rural residents than is provided by the traditional boom and bust economies of Amazonia Households who adopted camu camu as a new crop in their floodplain agroforestry systems farmed significantly more floodplain land than non adopters and were especially adept at experimenting with new innovations Lack of agricultural credit is a major constraint to adopting camu camu as a new crop in Peru Geographic isolation and the location of processing facilities in relation to fruit harvests present major obstacles to the economic viability of the new industry Camu camu was found to be cultivated with a higher diversity of annual crops than is typical in floodplain fields of the region Extraction of camu camu fruits from the wild does not appear to have a negative environmental impact at least in the initial years of the industry This non timber forest product in the process of domestication can support a viable industry in the Peruvian Amazon if agricultural extension methods and marketing channels are improved

**Urban Regimes of Dispossession in the Global South** , 2025-09-25 This edited volume develops a theoretical framework what we call urban regimes of dispossession for understanding how urban actors organize dispossession and govern the urban dispossessed how the urban dispossessed arrange experience and resist dispossession and how urban dispossession contributes to creating expanding capitalist systems or transforming urban societies in the global south The book s main arguments are built on a survey of the nearly two hundred year history of global dispossession studies and solid empirical evidence from three continents Asia Africa and Latin America and seven countries Bangladesh Brazil Honduras India Lebanon Nigeria and Uganda Eighteen scholars bring diverse perspectives and realities on urban dispossession which will appeal to students scholars planners and practitioners across various social scientific disciplines

including sociology anthropology urban studies political economy international relations political science economics gender studies and geography Contributors are Shapan Adnan Orlando Alves dos Santos Junior Fred Bidandi David L Brunsma Tarcyla Fidalgo Ribeiro Lakshmi Jahnavi Marie Kolling Ana Maria Kumarasamy Barbara Lipietz Lipon Mondal Adrian Murray John Nagle Victor Udemezue Onyebueke Ta sa Sanches Karen Spring Susan Spronk Luanda Vannuchi and Julian Walker

**Amazonia and Global Change** Michael Keller, Mercedes Bustamante, John Gash, Pedro Silva Dias, 2013-05-02 Published by the American Geophysical Union as part of the Geophysical Monograph Series Volume 186 Amazonia and Global Change synthesizes results of the Large Scale Biosphere Atmosphere Experiment in Amazonia LBA for scientists and students of Earth system science and global environmental change LBA led by Brazil asks how Amazonia currently functions in the global climate and biogeochemical systems and how the functioning of Amazonia will respond to the combined pressures of climate and land use change such as Wet season and dry season aerosol concentrations and their effects on diffuse radiation and photosynthesis Increasing greenhouse gas concentration deforestation widespread biomass burning and changes in the Amazonian water cycle Drought effects and simulated drought through rainfall exclusion experiments The net flux of carbon between Amazonia and the atmosphere Floodplains as an important regulator of the basin carbon balance including serving as a major source of methane to the troposphere The impact of the likely increased profitability of cattle ranching The book will serve a broad community of scientists and policy makers interested in global change and environmental issues with high quality scientific syntheses accessible to nonspecialists in a wide community of social scientists ecologists atmospheric chemists climatologists and hydrologists

**In Search of the Amazon** Seth Garfield, 2013-12-06 This history of the international national and local conflicts surrounding the extraction of resources from the Amazon during the Second World War shows how those conflicts shaped contemporary ideas about the rainforest

**Globalization and New Geographies of Conservation** Karl S. Zimmerer, 2006-09-15 Examining the geographical dimensions of environmental management and conservation activities implemented on landscapes worldwide Globalization and New Geographies of Conservation creates a new framework and collects original case studies to explore recent developments in the interaction of humans and their environment Globalization and New Geographies of Conservation makes four important arguments about the recent coupling of conservation and globalization that is reshaping the place of nature in human environmental change First it has led to an unprecedented number of spatial arrangements whose environmental management goals and prescribed activities vary along a spectrum from strict biodiversity protection to sustainable utilization involving agriculture food production and extractive activities Conservation and globalization are also leading by necessity to new scales of management in these activities that rely on environmental science thus shifting the spatial patterning of humans and the environment This interaction results as well in the unprecedented importance of boundaries and borders transnational border issues pose both opportunities and threats to global conservation proposed by organizations and institutions that are themselves international Lastly

Globalization and New Geographies of Conservation argues that the local level has been integral to globalization while the regional level is often eclipsed at the peril of the successful implementation of conservation and management programs Bridging the gap between geography and life science Globalization and New Geographies of Conservation will appeal to a broad range of students of the environment conservation planning biodiversity management and development and globalization studies Environmental Justice and Sustainable Development Götz Ferdinand Kaufmann,2012 Radical Territories in the Brazilian Amazon Laura Zanotti,2016-11-15 Radical Territories in the Brazilian Amazon sheds light on the creative and groundbreaking efforts Kayap peoples deploy to protect their lands and livelihoods in Brazil Laura Zanotti shows how Kayap communities are using diverse pathways to make a sustainable future for their peoples and lands The author advances anthropological approaches to understanding how indigenous groups cultivate self determination strategies in conflict ridden landscapes **Agouti on the wedding menu: Bushmeat harvest, consumption and trade in a post-frontier region of the Ecuadorian Amazon** Ian Cummins,Miguel Pinedo-Vasquez,Alexander Barnard,Robert Nasi,2015-10-06 The availability consumption and trade of bushmeat is highly variable across time and space This paper examines how the bushmeat market in Napo Ecuador has evolved alongside a variety of interconnected factors including local game scarcity increased law enforcement infrastructure development and increasing urbanization Much of the human occupied landscape has already undergone extinction filters with only the most hunting resistant species still present However Napo maintains significant areas of largely intact forest which are not hunted due distance from roads and rough topography which may serve as source habitat in the future Two modes of hunting are identified both of which have very different implications for conservationists and for rural livelihoods Supplemental or sustenance hunting generally focuses on more abundant species and thus occurs primarily within local agroforestry systems or nearby patches of forests Commercial hunting meanwhile takes place within larger catchments and is focused on large bodied species which are especially susceptible to hunting pressure Efforts by the Ecuadorian government to interdict bushmeat have largely driven the trade underground making it difficult to estimate current consumption rates Demand generated by traditional Kichwa wedding parties remain a significant driver of commercial hunting Policy recommendations include a greater focus on species level game management greater education about endangered species and more emphasis on using conservation programs to create corridors between protected areas Due to the relatively small size of most communal forest areas wildlife management is especially difficult for wide ranging species and conservation efforts should focus on common pool resource management
