

The background of the cover is a photograph of a rainforest. Large, vibrant green leaves, likely banana or similar tropical plants, are the primary focus, with their veins clearly visible. Sunlight filters through the canopy, creating a dappled light effect. A solid black horizontal band runs across the middle of the image, serving as a background for the text.

Rainforest Politics Ecological Destructi:

Breakfast Of Biodiversity John Vandermeer, Ivette Perfecto, 2013-03-26 The continuing devastation of the world's tropical rain forest affects us all spurring climate change decimating biodiversity and wrecking our environment's resiliency Millions of worried people around the world want to do whatever it takes to save the forest that is left But halting rain forest destruction means understanding what is driving it In *Breakfast of Biodiversity* John Vandermeer and Ivette Perfecto insightfully describe the ways in which such disparate factors as the international banking system modern agricultural techniques rain forest ecology and the struggles of the poor interact to bring down the forest They weave an alternative vision in which democracy sustainable agriculture and land security for the poor are at the center of the movement to save the tropical environment

Rainforest Politics Philip Hurst, 1990

The Political Ecology of Forestry in Burma, 1824-1994 Raymond L. Bryant, 1997-08-01 The author examines how the Burmese state has sought to control the country's forest activities and the ways in which groups relying on the forest for their livelihood loggers transnational corporations cultivators peasants have fought such control

Third World Political Ecology Sinead Bailey, Raymond Bryant, 2005-08-08 By drawing on examples from throughout the Third World Bryant and Bailey explain the development and characteristics of environmental problems that plague parts of Asia Africa and Latin America and their political and economic bases

The Politics of Environment in Southeast Asia Philip Hirsch, Carol Warren, 2002-01-31 The environment in Southeast Asia is now a major issue of topical concern First book to give analysis in depth of the political processes involved in environmental disputes Provides a good selection of case studies in the region Questions the assumption that the middle classes are in the vanguard of the environmental movement

Reimagining Political Ecology Aletta Biersack, James B. Greenberg, 2006-11-22 A collection of ethnographies grounded in second generation political ecology which focuses on the interchanges between nature and culture and the local and the global

Tropical Forests and Climate N. Myers, 2013-06-29 Tropical forests affect climate and the removal of the forests will change climate Or not This book discusses basic questions on how far if at all tropical deforestation leads to climatic change The question of this uncertainty is particularly addressed One important consequence of the uncertainties of whether deforestation affects climate is how scientific findings best illuminate the policy making process

Histories of Health in Southeast Asia Tim Harper, Sunil S. Amrith, 2014-10-01 Health patterns in Southeast Asia have changed profoundly over the past century In that period epidemic and chronic diseases environmental transformations and international health institutions have created new connections within the region and the increased interdependence of Southeast Asia with China and India In this volume leading scholars provide a new approach to the history of health in Southeast Asia Framed by a series of synoptic pieces on the Landscapes of Health in Southeast Asia in 1914 1950 and 2014 the essays interweave local national and regional perspectives They range from studies of long term processes such as changing epidemics mortality and aging and environmental history to detailed accounts of particular

episodes the global cholera epidemic and the hajj the influenza epidemic of 1918 WWII and natural disasters The writers also examine state policy on healthcare and the influence of organizations from NGOs such as the China Medical Board and the Rockefeller Foundation to grassroots organizations in Thailand Indonesia and the Philippines **Cutting Across the Lands** Eveline Ferretti,2018-05-31 An annotated bibliography focused on Borneo and the Southern Philippines With over 1 000 citations this reference work identifies patterns of forestland transformation common to the areas under consideration A subject index is included *Population And Environment* Lourdes Arizpe,M. Priscilla Stone,David Major,Priscilla Stone,2019-06-04 This ambitious interdisciplinary volume places population processes in their social political and economic contexts while it considers their environmental impacts Examining the multi faceted patterns of human relationships that overlay alter and distort our ties to urban and rural landscapes the book focuses especially on the essential experi

Conflict and Change in Cambodia Ben Kiernan,Caroline Hughes,2020-10-28 In the thirty years after the Second World War Cambodia witnessed the reassertion of colonial power the spread of nationalism the birth and growth of a communist party the achievement of independence the stifling reform during the decade of peace the rise of an armed domestic insurgency the encroachment of an international war massive bombardment and civilian casualties pogroms and ethnic cleansing of religious minorities From 1975 to 1979 genocide took another 1 7 million lives Then after liberation from the Khmer Rouge regime Cambodia survived a decade of foreign occupation international isolation and guerrilla terror and harassment UN intervention and democratic transition were followed by Cambodia s defeat of the Khmer Rouge in 1999 amid continuing internal tension and political confrontation Against this backdrop of more than thirty years of conflict in Cambodia *Conflict and Change in Cambodia* brings together primary documents and secondary analyses that offer fresh and informed insights into Cambodia s political and environmental history This book was previously published as a special issue of *Critical Asian Studies* *Growing Pains* Walter Wehrmeyer,Yacob Mulugetta,2017-10-19 Environmental management is a global phenomenon embracing all businesses in all countries whether or not there already exists an organised response to managing environmental impacts Today there are gross inequalities between the world s richest and poorest nations in terms of income distribution consumption patterns access to resources and environmental impact Yet both the developed north and the developing south are committed at least in words to achieving sustainable development Public awareness of environmental issues in the North has been rising in recent years and further degradation is now largely minimized through more stringent regulatory regimes voluntary agreements and growing consumer and stakeholder pressure on corporations Still the north is continuing to lead an environmentally unsustainable lifestyle as environmental improvements are nullified by overall increases in consumption levels In the south a billion people still do not have access to the most basic needs Poor countries need to accelerate their consumption growth if they are to ensure that the lives of their people are enriched However with rapid economic growth and corresponding increases in consumption now under way their environmental

impact is soon to become substantially greater In a world that strives towards stemming global crises such as climate change the path already taken by the rich and high growth economies over the past century cannot be repeated by the south if the desired objective is to create a future that is truly sustainable Growing Pains examines environmental management in the south from a number of perspectives It is designed to stimulate the discussion about the role that corporations and national and international organizations play in sustainable development It does not offer panaceas as each country has its own problems and opportunities and after almost 50 years of failed panacea oriented economic development policy transfer from the north to the south it is time to abandon hope for universal solutions and instead look to individual approaches that work The book is divided into five themes globalization the role of business a focus on national strategies trade and the environment and the organizational and structural challenges of sustainable development With contributions from an outstanding collection of authors in both the developed and developing worlds including UNIDO the Thailand Environment Institute Arthur D Little Inc Shell Peru IUCN the Russian Academy of Sciences and IIED this important and unique new book presents a body of work that will provide essential reading for businesses working in developing countries environmental and developmental NGOs and researchers engaged in the debate and sharing of best practice in this increasingly critical subject area

Why Governments Waste Natural Resources William Ascher,1999 Drawing on 16 case studies from Africa Asia and Latin America reveals the complex political and programmatic reasons why government officials in developing countries often willfully adopt wasteful natural resource policies

Counting the Costs Jonathan Rigg,1995 Written by an international panel of specialists on Thailand who share a common concern for the environment this volume examines the causes and consequences of environment change both in the countryside and the urban areas of the Kingdom The papers however in no sense reflect a common view the authors embrace contrasting environmental ideologies in discussing a wide range of concerns These include the role of Buddhism and tourism in promoting sustainable development environmental systems of thought and action the practicalities of water pollution control in Bangkok and the Gulf of Thailand and the changing bases of life and livelihood among the hill peoples of the North The environment as an issue of concern is now important phase of assimilation interpretation prescription and action The papers in this volume reflect this change

The Physical Geography of Southeast Asia Avijit Gupta,2005-02-24 This will be the first comprehensive and detailed volume on the physical environment of Southeast Asia and will be essential reading for geographers ecologists and environmental managers As the definitive reference work on the region it will cover all aspects of the biophysical environment and its current environmental problems and management practices The topics discussed range from a regional view of landforms and vegetation to specific cases including urban environments coral reefs volcanic hazards and the Mekong River Basin The contributors are distinguished scholarly and have a long association with Southeast Asia This is the fourth volume to be published in the Oxford Regional Environment series

Critical Political Ecology Timothy Forsyth,2004-11-23 Critical

Political Ecology brings political debate to the science of ecology As political controversies multiply over the science underlying environmental debates there is an increasing need to understand the relationship between environmental science and politics In this timely and wide ranging volume Tim Forsyth uses an innovative approach to apply political analysis to ecology and demonstrates how more politicised approaches to science can be used in environmental decision making Critical Political Ecology examines how social and political factors frame environmental science and how science in turn shapes politics how new thinking in philosophy and sociology of science can provide fresh insights into the biophysical causes and impacts of environmental problems how policy and decision makers can acknowledge the political influences on science and achieve more effective public participation and governance

The Roots of Japan's Environmental Policies Anny Wong, 2018-10-24 The study focuses on Japan's policies toward international environmental issues and includes case studies on whaling deforestation in the tropics and acid deposition in Asia

The Political Economy of the Environment James K. Boyce, 2002-01-01 Professor Boyce's work is an excellent example of how ecological economics can be done in an objective evidence based approach that can put issues on the agenda in a manner where they will be taken seriously by other scholars This is a well written and provocative book that should encourage further research on all these important issues David I Stern International Journal of Social Economics This succinct and sometimes provocative book sets out to document quantify and explain the ways in which inequalities of wealth and power create an uneven apportionment of environmental costs across the world It offers a combination of theoretical analysis and empirical evidence to support the author's central contention that greater democratisation and changes in society's relationship with nature are paramount for achieving the dual goals of environmental protection and sustainable development This book is immensely well written makes for a fascinating read Ian Bailey European Spatial Research and Policy Economic activities that degrade the environment do not simply pit humans against nature They also pit some humans against others Some benefit from these activities others bear net costs from pollution and resource depletion In a provocative and original analysis James K Boyce examines the dynamics of environmental degradation in terms of the balances of power between the winners and the losers He provides evidence that inequalities of power and wealth affect not only the distribution of environmental costs but also their overall magnitude greater inequalities result in more environmental degradation Democratization movement toward a more equitable distribution of power therefore is not only a worthwhile objective in its own right but also an important means toward the social goals of environmental protection and sustainable development Combining theoretical analysis with empirical evidence from around the world James K Boyce demonstrates that changes in our relationship with nature ultimately require changes in our relationships with each other He maintains that a more democratic and environmentally sustainable future is possible but warns that it is not inevitable This book will appeal to students scholars policymakers and other readers interested in the environment economics and public policy

Environmental Cooperation in Southeast Asia Paruedee

Nguitragool,2010-10-04 One of the most challenging environmental threats to the ten countries of the Association of Southeast Asian Nations ASEAN has been the haze the sickening and deadly cloud of smoky pollution caused by widespread burning of land and forests in Indonesia This book examines both the threat and response to it by analysing environmental cooperation in Southeast Asia from an international regime perspective Tracing the development of regional cooperation on the haze and evaluating the effectiveness of the cooperation the author argues that the haze crisis combined with the economic crisis of 1997 has profoundly challenged the ASEAN modus operandi and resulted in ASEAN s efforts to establish an environmental regime to cope with environmental challenges The emerging ASEAN haze regime is a unique case study of a regional environmental institution in multi levelled global environmental governance Based on in depth original research this case study is integrated into international relations political science and comparative political analysis literatures and contributes to a better understanding of processes within the regional organisation **Environmental History in the**

Pacific World J.R. McNeill,2022-03-01 This volume brings together a set of key articles from the last 30 years pertaining to the environmental history of the Pacific basin It aims to treat the islands and waters of the Pacific as well as the lands around the Rim from New Zealand to Japan to California to Chile and is the first work of environmental history to take this inclusive view of the Pacific basin The focus is mainly on recent centuries but as environmental history requires at times the work also takes the very long view of millennia Several of the articles seek to bring a broad Pacific perspective to bear on their subjects while others use Pacific basin examples to try to establish broader theoretical points of interest to all who are drawn to the study of the interactions between nature and culture The book includes a bibliography of Pacific basin environmental history and an introduction that aims to sketch the contours and possible future directions of the field
