Inventing Ourselves Sarah-Jayne Blakemore, 2018-05-15 A tour through the groundbreaking science behind the enigmatic but crucial brain developments of adolescence and how those translate into teenage behavior. The brain creates every feeling, emotion, and desire we experience and stores every one of our memories. And yet, until very recently, scientists believed our brains were fully developed from childhood on. Now, thanks to imaging technology that enables us to look inside the living human brain at all ages, we know

that this isn't so Professor Sarah Jayne Blakemore one of the world's leading researchers into adolescent neurology explains precisely what is going on in the complex and fascinating brains of teenagers namely that the brain goes on developing and changing right through adolescence with profound implications for the adults these young people will become Drawing from cutting edge research including her own Blakemore shows How an adolescent brain differs from those of children and adults Why problem free kids can turn into challenging teens What drives the excessive risk taking and all consuming relationships common among teenagers And why many mental illnesses depression addiction schizophrenia present during these formative years Blakemore's discoveries have transformed our understanding of the teenage mind with consequences for law education policy and practice and most of all parents

Clash Of The Mind And Heart: Parents' Playbook For Helping Youths Succeed Nicholas Gabriel Lim, 2022-04-11 This book is not just for parents While it was initially written for them increasingly adults working with adolescents also sought help I tried putting something together specifically for these adults but found that the content is also in this book These are some common woes of adolescents and adults about each other My parents don't understand me Why is my child emotionally explosive all the time My parents are always nagging Teens cannot seem to be able to think about the consequence first before acting The understanding divide between adolescents and adults seems to be getting wider Concretely on a day to day basis adolescents and parents are clashing with each other over mind and heart issues and no one seemed to be able to get the other Even if one got it it would not take long before one would challenge the other about it Neuroscience has informed us that the divide has always been there and will continue to be there because it is developmental The prefrontal cortex will only be fully developed about ten years after the limbic system becomes fully functional These two areas are primarily responsible for setting and achieving goals and behavioural emotional responses respectively The implication of this reality is huge and it explains the clash of the mind and heart issues at so many levels specifically rational emotional conflict during adult adolescent engagement One of the ways to reduce that conflict is to heighten the understanding of adult child developmental realities and learn the strategies that would help the other succeed Such endeavours seemed to benefit only the adult more because they seemed to be more matured developmentally but if we know how to help adolescents appreciate the realities they are able to also benefit from it and manage the constant clashing with the adults Thus this book proposes the framework and strategies to help youths succeed and includes some stories of

professional youth work where effective youth engagement strategies are highlighted by youths themselves in retrospect
