*Nation, Immigration, and Environmental Security* J. Urban, 2008-05-12 Using the lens of postcolonial feminism and with particular focus on immigration accross the U S across Mexico border this book explores the processes by which security threats are identified and interpreted and thus the relationship between national civilizational and environmental security within mainstream environment security discourse in the United States Another distinctive element of the book is that its focus on the broader discourse of environmental security and immigration examining the articulation of environmental security concerns over immigration across U S institutions such as the media the state NGOs and academia to unpack the ways these threats are identified and interpreted

*Data Security for Health Care* SEISMED Consortium, 1996 The efficiency of modern health care relies more and more upon a computerised infrastructure Open distributed information systems have started to bring professionals together from all over the world On the one hand easy processing and communication of images sound and texts will help to visualize and therefore treat illnesses and diseases efficiently on the other hand the very ease of access and use can threaten patient privacy accountability and health care professional secrecy Developments in community care are responsible for the fact that many aspects of patient care are delivered outside the closed walls of a hospital and hence patient records must also be accessible and updated throughout the community Therefore the introduction of information technology should focus primarily on the improvement of the health of patients or at least not putting patients health at risk This means that the right data has to be available to the right person at the right time availability Information technology deeply affects the confidential relationship between patient and doctor since it increasingly surrounds and mediates it Information systems in health care establishments are increasingly developing towards an integrated system where various users can interact and communicate The process of integration will cross the borders of local health care establishments and it will progressively expand e g into patients homes

into a European health care community in order to support the mobility of patients the exchange of medical and administrative data transfer of bills and money

*Security for Object-Oriented Systems* Bhavani Thuraisingham, Ravi Sandhu, T.C. Ting, 2013-06-29 This volume contains papers from the OOPSLA 93 Conference Workshop on Security for Object Oriented Systems held in Washington DC USA on 26 September 1993 The workshop addressed the issue of how to introduce an acceptable level of security into object oriented systems as the use of such systems becomes increasingly widespread The topic is approached from two different but complementary viewpoints the incorporation of security into object oriented systems and the use of object oriented design and modelling techniques for designing secure applications The papers cover a variety of issues relating to both mandatory and discretionary security including security facilities of PCTE information flow control the design of multilevel secure data models and secure database interoperation via role translation The resulting volume provides a comprehensive overview of current work in this important area of research
