Security And The State In Southern Africa:

Security and the State in Southern Africa Agostinho Zacarias, 1998-12-31 Setting out the problem of security and placing it in an historical framework the author of this work picks his way through the complexities of political theory and the tangled political history of southern Africa He argues that the present formation of states has been shaped by the struggle of the African peoples for emancipation and the resistance of the European settler communities and that South Africa has attempted to maintain regional order based on principles of domination exploitation and inequality founded on a colonial past and apartheid The result has been a security system which is inherently militaristic nation focused and state centred and has led to confrontation within states and in the region Zacarius therefore explores the concept of people centred security and the legitimate state and regards these as essential building blocks in ensuring state and regional stability and security

The South African Intelligence Services Kevin A. O'Brien, 2010-11-01 This book is the first full history of South African intelligence and provides a detailed examination of the various stages in the evolution of South Africa's intelligence organizations and structures Covering the apartheid period of 1948-90 the transition from apartheid to democracy of 1990-94 and the post apartheid period of new intelligence dispensation from 1994-2005 this book examines not only the apartheid government's intelligence dispensation and operations but also those of the African National Congress and its partner the South African Communist Party ANC SACP as well as those of other liberation movements and the independent homelands under the apartheid system Examining the civilian military and police intelligence structures and operations in all periods as well as the extraordinarily complicated apartheid government's security bureaucracy or securocracy and its structures and units the book discusses how South Africa's Cold War position influenced its relationships with various other world powers especially where intelligence co operation came to bear It outlines South Africa's regional relationships and concerns the foremost being its activities in South West Africa Namibia and its relationship with Rhodesia through 1980 Finally it examines the various legislative and other governance bases for the existence and operations of South Africa's intelligence structures in all periods and the influences that such activities as the Rivonia Trial at one end of the history or the Truth and Reconciliation Commission at the other end had on the evolution of these intelligence questions throughout South Africa's modern history This book will be of great interest to all students of South African politics intelligence studies and international politics in general

Security Beyond the State Rita Abrahamsen, Michael C. Williams, 2010-11-18 Across the globe from mega cities to isolated resource enclaves the provision and governance of security takes place within assemblages that are de-territorialized in terms of actors technologies norms and discourses They are embedded in a complex transnational architecture defying conventional distinctions between public and private global and local Drawing on theories of globalization and late modernity along with insights from criminology political science and sociology *Security Beyond the State* maps the emergence of the global private security sector and develops a novel analytical framework for understanding

these global security assemblages Through in depth examinations of four African countries Kenya Nigeria Sierra Leone and South Africa it demonstrates how global security assemblages affect the distribution of social power the dynamics of state stability and the operations of the international political economy with significant implications for who gets secured and how in a global era *Securing the State and its Citizens* Paul O'Neill,2022-06-02 The global security situation is challenging and constantly changing Responding to threats requires the effective coordination of the various levers of national power These must now go beyond the traditional diplomatic information military and economic levers to involve other non security agencies including those responsible for the environment health education and industry Through a uniquely extensive study of countries from across the world this book considers how nations have developed bespoke coordination mechanisms to the unique threats they face and how these mechanisms have had to evolve as the threats change It covers nations for whom the system is well established e g the US in 1947 and other countries whose arrangements are more recent such as the UK 2010 Where the National Security Councils have existed for longest the case studies highlight how they have transformed as the national understanding of security has changed typically to reflect a broadening Consequently while there are no universal solutions the comparative approach taken in this book identifies enduring principles for shaping the creation or reform of national security coordination fit for the challenges of the twenty first century **Securing South Africa's Democracy** G. Cawthra,1997-07-16 This book examines the defence and security challenges facing the new South Africa in the context of development and nation building priorities The transformation of security policy during the transition from apartheid and since the April 1994 elections is examined Challenges facing the defence force and the police service are examined and the relationships between defence development and domestic and external security are explored in an integrated way which points to a policy framework for security in the developing world **Freedom, State Security, and the Rule of Law** Anthony S. Mathews,1986-01-01 **Critical Security Studies** Keith Krause,Michael C. Williams,2002-09-11 This text takes issue with arguments that security studies is a discipline of limited use in making sense of the post Cold War world It argues that many of the most interesting theoretical issues in international relations can most usefully be studied through a prism labelled security studies The book combines chapters which provide a variety of critical perspectives on the discipline and address a diverse range of theoretical concerns with chapters that examine such substantive issues as weapons proliferation and the changing meaning of security for actors in the erstwhile conflict between East and West **Food Security in Africa's Secondary Cities: No. 2** Nickanor, Ndeyapo,Kazembe, Lawrence,2019-03-21 This is the first research report to examine the nature and drivers of food insecurity in the northern Namibian towns of Oshakati Ongwediva and Ondangwa As well as forming part of a new body of research on secondary urbanization and food security in Africa the report makes systematic comparisons between the food security situation in this urban corridor and the much larger capital city of Windhoek A major characteristic of urbanization in Namibia is the perpetuation of rural urban linkages through informal

rural to urban food remittances This survey found that 55% of households in the three towns receive food from relatives in rural areas Urban households also farm in nearby rural areas and incorporate that agricultural produce into their diets The survey showed that over 90% of households in the three towns patronize supermarkets which is a figure far higher than for any other food source Overall food security is better in Namibia's northern towns than in Windhoek where levels of food insecurity are particularly high However just because the food insecurity situation is less critical in the north the majority of households in the urban corridor are not food secure Like Windhoek these towns also have considerable income and food security inequality with households in the informal settlements at greatest risk of chronic food insecurity

Israel's Security Networks Gabriel Sheffer, Oren Barak, 2013-06-28 Since the establishment of the State of Israel in 1948 and particularly after the Israeli Arab War of 1967 a highly informal but simultaneously potent security network has influenced Israel's domestic sphere Composed of acting and former security personnel and their partners in the state's various civilian spheres this security network has affected Israeli culture politics society economy public discourse and foreign relations This book discusses this major sociopolitical phenomenon and its effects in a comparative and theoretical perspective First it defines Israel's security network in a broad theoretical and comparative perspective Second it explains how Israel's security network emerged and acquired a hegemonic position in the area of national security and foreign policy Third it describes the security network and identifies its members Fourth it discusses and explains the multitude of roles that Israel's security network has come to play both domestically and externally Fifth it discusses similar phenomena in other relevant cases Finally it presents general analytical and theoretical conclusions

Food Security in Africa's Secondary cities Riley, Liam, Chilanga, Emmanuel, 2018-04-30 This report marks the first stage of AFSUN's goal of expanding knowledge about urban food systems and experiences of household food insecurity in secondary African cities It contributes to an understanding of poverty and sustainability in Mzuzu Malawi through the lens of household food security The focus on food as an urban issue not only speaks to the development challenges presented by urbanization but it also brings a fresh perspective to debates about food security in Malawi The urban setting highlights the changing food system in Malawi where people in rural and urban areas are increasingly reliant on cash income to buy food The report's key findings include that the most vulnerable households are those without a formal wage income households headed by older people especially older women and households that are not able to produce food in the rural areas The research also shows that the food system is dynamic and diverse with households accessing food from a variety of formal and informal food sources and relying on rural-urban linkages for urban survival Urban and rural agriculture are important features of the food system but there is little evidence that these are the self-help responses to poverty that advocates for urban agriculture in Africa sometimes imply

The South African State Transformed? Louis A. Picard, Thomas M. Mogale, Caitlin C. Corrigan, 2024-09-10 This book examines the nature of the 1994 political transition in

South Africa and its impact on post apartheid South Africa Specifically it examines the failures of liberalism within the context of the transitional process that led to the institution if not the practice of a non racial state in 1994 The term liberal is an eclectic term defining a several of views political and economic We use the term here within context but essentially define it as a commitment to open views the willingness to consider change and to value basic human rights The nature of institutional change in South Africa as it moved towards a democratic state would influence whether South Africa would succeed as a newly industrializing pluralist democratic country or collapse into yet another African failed state As South Africa moves toward its fourth decade of majority rule the view towards the future is much less promising than it was in 1994

Department of State Publication ,1983 **Globalization and the National Security State** Norrin M. Ripsman,T.V. Paul,2010-03-18 Introduction national security state in the era of globalization Globalization and national security key propositions The global security environment The major powers States in stable regions States in regions of enduring rivalry Weak and failing states Conclusion state adaptation to a new global environment The State of Food Security and Nutrition in the World 2025 Food and Agriculture Organization of the United Nations, IFAD; UNICEF; WFP; WHO,2025-07-28 While some progress and recovery have been made in recent years the world is still above pre COVID 19 pandemic levels and far from eradicating hunger and food insecurity by 2030 SDG Target 2 1 Similarly despite some progress in the global nutrition targets the world is not on track to achieve SDG Target 2 2 Among other factors persistent food price inflation has slowed this momentum The State of Food Security and Nutrition in the World 2025 highlights how elevated inflation in many countries has undermined purchasing power and especially among low income populations access to healthy diets The report documents how high food price inflation is associated with increases in food insecurity and child malnutrition Vulnerable groups including low income households women and rural communities can be particularly affected by food price inflation risking setbacks in the fight against hunger and malnutrition In response to these challenges and to prevent future price shocks the report examines policy measures adopted by countries and outlines what is necessary going forwards It stresses the importance of coherent implementation of fiscal and monetary policies to stabilize markets promote open and resilient trade and protect vulnerable populations Additionally it calls for better data systems and sustained investment in resilient agrifood systems to build long term food security and nutrition These coordinated actions are vital to reignite progress towards ending hunger and malnutrition by 2030 South Africa's Democracy at the Crossroads Daniel Silander,Charlotte Silander,Herman van der Elst,Pieter Heydenrych,2022-04-18 South Africa s democracy faces increasing challenges from within whether from protest bad governance or general public dissatisfaction South Africa s Democracy at the Crossroads explores the question what are the challenges to future democratization in South Africa **The Security of Sea Lanes of Communication in the Indian Ocean Region** Dennis Rumley,Sanjay Chaturvedi,Mat Taib Yasin,2016-03-31 First published in 2007 this book focuses on the security of sea lanes of communication It was a joint publication between the

Maritime Institute of Malaysia MIMA and the Indian Ocean Research Group IORG and is an important book for three particular reasons First it takes a step forward in identifying key policy themes that can be applied to interstate cooperation around the Indian Ocean Region IOR Second the particular theme discussed is not only central to the economic well being of Indian Ocean countries but also to many of the world s most important trading states and finally the various discussions within the book raise a host of issues to which regional as well as non regional policy makers should give serious consideration

The State of Food Security and Nutrition in the World 2024 Food and Agriculture Organization of the United Nations,International Fund for Agricultural Development,United Nations Children's Fund,World Food Programme,World Health Organization,2024-07-23 Six years from 2030 hunger and food insecurity trends are not yet moving in the right direction to end hunger and food insecurity SDG Target 2 1 by 2030 The indicators of progress towards global nutrition targets similarly show that the world is not on track to eliminate all forms of malnutrition SDG Target 2 2 Billions of people still lack access to nutritious safe and sufficient food Nevertheless progress in many countries provides hope of the possibility of getting back on track towards hunger and malnutrition eradication Implementing the policies investments and legislation needed to revert the current trends of hunger food insecurity and malnutrition requires proper financing for food security and nutrition Despite a broad agreement on the urgent need to increase financing for food security and nutrition the same cannot be said for a common understanding regarding how this financing should be defined and tracked The report provides a long awaited definition of financing for food security and nutrition and guidance for its implementation There are recommendations regarding the efficient use of innovative financing tools and reforms to the food security and nutrition financing architecture Establishing a common definition of financing for food security and nutrition and methods for its tracking measurement and implementation is an important first step towards sustainably increasing the financing flows needed to end hunger food insecurity and all forms of malnutrition and to ensure access to healthy diets for all today and tomorrow

The Supermarket Revolution and Food Security in Namibia Nickanor, Ndeyapo,Kazembe, Lawrence,2017-12-16 The surprisingly high rate of supermarket patronage in low income areas of Windhoek Namibia s capital and largest city is at odds with conventional wisdom that supermarkets in African cities are primarily patronized by middle and high income residents and therefore target their neighbourhoods What is happening in Namibia and other Southern African countries that make supermarkets so much more accessible to the urban poor What are they buying at supermarkets and how frequently do they shop there Further what is the impact of supermarket expansion on informal food vendors This report which presents the findings from the South African Supermarkets in Growing African Cities project research in 2016 2017 in Windhoek looks at the evidence and tries to answer these questions and others The research and policy debate on the relationship between the supermarket revolution and food security is also discussed Here the issues include whether supermarket supply chains and procurement practices mitigate rural food insecurity through providing new

market opportunities for smallholder farmers the impact of supermarkets on the food security and consumption patterns of residents of African cities and the relationship between supermarket expansion and governance of the food system particularly at the local level The State of Food Security and Nutrition in the World 2022 Food and Agriculture Organization of the United Nations, International Fund for Agricultural Development, United Nations Children's Fund, World Food Program, World Health Organization, 2022-07-06 This year's report should dispel any lingering doubts that the world is moving backwards in its efforts to end hunger food insecurity and malnutrition in all its forms We are now only eight years away from 2030 but the distance to reach many of the SDG 2 targets is growing wider each year There are indeed efforts to make progress towards SDG 2 yet they are proving insufficient in the face of a more challenging and uncertain context The intensification of the major drivers behind recent food insecurity and malnutrition trends i e conflict climate extremes and economic shocks combined with the high cost of nutritious foods and growing inequalities will continue to challenge food security and nutrition This will be the case until agrifood systems are transformed become more resilient and are delivering lower cost nutritious foods and affordable healthy diets for all sustainably and inclusively
