that responses to the controversies must involve food security relinking of food with agriculture and the environment revaluing traditional knowledge and rethinking development They stress that answers will be found not by experts acting unilaterally but through the democratization of scientific and technical exchange Lawrence Busch is professor of sociology at Michigan State University William B Lacy is director of the Cooperative Extension Service at Cornell University Jeffrey Burkhardt is a professor of agricultural economics at the Institute for Food and Agricultural Sciences at the University of Florida Douglas Hemken is a Ph D candidate in the Department of Rural Sociology at the University of Wisconsin Jubel Moraga Rojel is professor of sociology at the Universidad Austral del Chile Timothy Koponen is a Ph D candidate in sociology at Northwestern University and Josi de Souza Silva is with the Commission on Plant Genetic Resources at FAO in Rome

Enduring Seeds Gary Paul Nabhan, 2016-10-01 As biological diversity continues to shrink at an alarming rate the loss of plant species poses a threat seemingly less visible than the loss of animals but in many ways more critical In this book one of America's leading ethnobotanists warns about our loss of natural vegetation and plant diversity while providing insights into traditional Native agricultural practices in the Americas Gary Paul Nabhan here reveals the rich diversity of plants found in tropical forests and their contribution to modern crops then tells how this diversity is being lost to agriculture and lumbering He then relates local parables of Native American agriculture from wild rice in the Great Lakes region to wild gourds in Florida that convey the urgency of this situation and demonstrate the need for saving the seeds of endangered plants Nabhan stresses the need for maintaining a wide gene pool not only for the survival of these species but also for the preservation of genetic strains that can help scientists breed more resilient varieties of other plants *Enduring Seeds* is a book that no one concerned with our environment can afford to ignore It clearly shows us that as agribusiness increasingly limits the food on our table a richer harvest can be had by preserving ancient ways This edition features a new foreword by Miguel Altieri one of today's leading spokesmen for sustainable agriculture and the preservation of indigenous farming methods
