Healthcare Ministry Gerald A. Arbuckle, 2000 Healthcare Ministry *Rethinking Health Promotion* Theodore H. MacDonald, 2012-10-12 In today s world health means far more than merely the absence of illness In *Rethinking Health Promotion* Theodore H MacDonald sweeps away the confusion surrounding the function and position of health promotion He argues that far from being a modern innovation health promotion has existed as a distinct and separate enterprise for as long as biomedicine and cautions against health promotion becoming organized merely an off shoot of medical care Drawing on the author s experience as a World Health Organisation consultant the book also tackles the question of whether health promotion has relevance on an international scale or whether it is purely a eurocentric phenomenon Against this background individual chapters explore universal factors such as sexual health diet unemployment alcohol and tobacco use With its critical and historical approach this book breaks new ground in assessing health promotion and will be stimulating reading for the wide variety of students and professionals studying health promotion

Health and the Good Society

Alan Cribb, 2005-10-13 The goals of healthcare and health policy and the health related dilemmas facing policy makers professionals and citizens are extensively analysed and debated in a range of disciplines including public health sociology and applied philosophy Health and the Good Society is the first full length work that addresses these debates in a way that cuts across these disciplinary boundaries Alan Cribb s core argument is that clinical ethics needs to be understood in the context of public health ethics This entails healthcare ethics embracing the social dimension of health in two overlapping senses first the various respects in which health experiences and outcomes are socially determined and second the ways in which health related goods are better understood as social rather than purely individual goods This broader approach to the Cthics of healthcare includes a concern with the social construction of both healthcare goods and the roles ideals and obligations of agents that is to say it focuses upon the value field of health related action and not only upon the ethics of action within this value field This groundbreaking book thus seeks to open up the agenda of healthcare ethics both methodologically and substantively it argues that population oriented perspectives are central to all healthcare ethics and that everybody has some share of responsibility for securing health related goods including the good of greater health equality One of its major conclusions is that the rather limited tradition of health education policy and practice needs a complete re think

Public Safety and Risk Assessment David J. Ball, Laurence Ball-King, 2014-04-08 This book aims to encourage a more reflective multidisciplinary approach to public safety and the reenfranchisement of those affected by this new phenomenon Over the past decade health and safety has become a major issue of public interest There are countless stories of health and safety activities interfering with public life preventing some beneficial activity from taking place even creating absurd or dangerous situations On the one hand risk assessment properly conducted is highly beneficial it saves lives and prevents injuries But on the other it can damage public life Why has this come about and does it have to be like that The authors examine the origins of the problem look critically at the tools used by safety assessors and their underlying

assumptions and consider important differences between public life and industry where the approaches largely originated. They illuminate the whole with an analysis of legal requirements, attitudes of stakeholders and recent research on risk perception and decision making. The result is a profound and important analysis of risk and safety culture and a framework for managing public safety more effectively.
