Seeing Anthropology Cultural Anthropology Through Film:

Seeing Anthropology Karl G. Heider, 2004 *Seeing Anthropology* continues to be the only cultural anthropology text available that allows for easy integration of ethnographic films into the introductory cultural anthropology course This text truly incorporates films within the text by blending textbook content with fourteen ethnographic film clips that are put in the hands of students More flexible ordering options are available with the new edition See New to this Edition section below One reviewer says The greatest strengths of this text are its unique and skillful use of film clips to enhance student learning I can think of no better way to extend student learning in anthropology than the use of films and there is no one more qualified to select and present anthropological films than the author of this book **Seeing Anthropology** Karl G. Heider, 1997 Accompanying videocassettes include short ethnographically accurate films on a wide range of culture types and world areas which contribute to the subject of the chapters *Seeing Anthropology* Karl G. Heider, Herbert L. Ziegler, 2000-09 This is the only book video package for cultural anthropology This book truly incorporates films within the text This unique package allows the reader to view the films in class or at home **Ethnographic Film** Karl G. Heider, 2009-04-20 From reviews of the first edition *Ethnographic Film* can rightly be considered a film primer for anthropologists Choice This is an interesting and useful book about what it means to be ethnographic and how this might affect ethnographic filmmaking for the better It obviously belongs in all departments of anthropology and most ethnographic filmmakers will want to read it Ethnohistory Even before Robert Flaherty released *Nanook of the North* in 1922 anthropologists were producing films about the lifeways of native peoples for a public audience as well as for research and teaching *Ethnographic Film* 1976 was one of the first books to provide a comprehensive introduction to this field of visual anthropology and it quickly became the standard reference In this new edition Karl G Heider thoroughly updates *Ethnographic Film* to reflect developments in the field over the three decades since its publication focusing on the work of four seminal filmmakers Jean Rouch John Marshall Robert Gardner and Timothy Asch He begins with an introduction to ethnographic film and a history of the medium He then considers many attributes of ethnographic film including the crucial need to present whole acts whole bodies whole interactions and whole people to preserve the integrity of the cultural context Heider also discusses numerous aspects of making ethnographic films from ethics and finances to technical considerations such as film versus video and preserving the filmed record He concludes with a look at using ethnographic film in teaching , **Handbook of Methods in Cultural Anthropology** H. Russell Bernard, Clarence C. Gravlee, 2014-07-08 The *Handbook of Methods in Cultural Anthropology* now in its second edition maintains a strong benchmark for understanding the scope of contemporary anthropological field methods Avoiding divisive debates over science and humanism the contributors draw upon both traditions to explore fieldwork in practice The second edition also reflects major developments of the past decade including the rising prominence of mixed methods the emergence of new technologies and evolving views on ethnographic writing Spanning the chain of

research from designing a project through methods of data collection and interpretive analysis the Handbook features new chapters on ethnography of online communities social survey research and network and geospatial analysis Considered discussion of ethics epistemology and the presentation of research results to diverse audiences round out the volume The result is an essential guide for all scholars professionals and advanced students who employ fieldwork

The Making of Anthropology Jacob Pandian, Susan Parman, 2004 This book offers an interpretation of anthropology as a discourse that contrasts the western self and the non western other and shows that the organizing principle of this discourse was the Judeo Christian episteme of the Other in Us that the Christian Church Fathers developed to define why the pagan others were endowed with negative ungodly attributes of humanity It is pointed out that the anthropological application of this episteme to represent and explain the colonized non western others resulted in the emergence of eurocentric hierarchical models of humanity and that although these models of humanity were largely replaced by pluralistic models in the late 20 century anthropology has continued to be linked with the episteme of the other in us Dust jacket

The Mirror and the Mind Katja Guenther, 2022-11-08 How the classic mirror test served as a portal for scientists to explore questions of self awareness Since the late eighteenth century scientists have placed subjects humans infants animals and robots in front of mirrors in order to look for signs of self recognition Mirrors served as the possible means for answering the question What makes us human In *The Mirror and the Mind* Katja Guenther traces the history of the mirror self recognition test exploring how researchers from a range of disciplines psychoanalysis psychiatry developmental and animal psychology cybernetics anthropology and neuroscience came to read the peculiar behaviors elicited by mirrors Investigating the ways mirrors could lead to both identification and misidentification Guenther looks at how such experiments ultimately failed to determine human specificity The mirror test was thrust into the limelight when Charles Darwin challenged the idea that language sets humans apart Thereafter the mirror previously a recurrent if marginal scientific tool became dominant in attempts to demarcate humans from other animals But because researchers could not rely on language to determine what their nonspeaking subjects were experiencing they had to come up with significant innovations including notation strategies testing protocols and the linking of scientific theories across disciplines From the robotic tortoises of Grey Walter and the mark test of Beulah Amsterdam and Gordon Gallup to anorexia research and mirror

neurons the mirror test offers a window into the emergence of such fields as biology psychology psychiatry animal studies cognitive science and neuroscience The Mirror and the Mind offers an intriguing history of experiments in self awareness and the advancements of the human sciences across more than a century
