Seeing The World:

Seeing the World Mitchell Stevens, Cynthia Miller-Idriss, Seteney Shami, 2020-04-28 An in depth look at why American universities continue to favor U S focused social science research despite efforts to make scholarship more cosmopolitan U S research universities have long endeavored to be cosmopolitan places yet the disciplines of economics political science and sociology have remained stubbornly parochial Despite decades of government and philanthropic investment in international scholarship the most prestigious academic departments still favor research and expertise on the United States Why Seeing the World answers this question by examining university research centers that focus on the Middle East and related regional area studies Drawing on candid interviews with scores of top scholars and university leaders to understand how international inquiry is perceived and valued inside the academy Seeing the World explains how intense competition for tenure line appointments encourages faculty to pursue American projects that are most likely to garner professional advancement At the same time constrained by tight budgets at home university leaders eagerly court patrons and clients worldwide but have a hard time getting departmental faculty to join the program Together these dynamics shape how scholarship about the rest of the world evolves At once a work and occupations study of scholarly disciplines an essay on the formal organization of knowledge and an inquiry into the fate of area studies Seeing the World is a must read for anyone who cares about the future of knowledge in a global era

Seeing Like a City Ash Amin, Nigel Thrift, 2017-01-09 Seeing like a city means recognizing that cities are living things made up of a tangle of networks built up from the agency of countless actors Cities must not be considered as expressions of larger paradigms or sites of human effort and organization alone Within their density size and sprawl can be found a world of symbols bodies buildings technologies and infrastructures It is the machine like combination interaction and confrontation of these different elements that make a city Such a view locates urban outcomes and influences in the character of these networks which together power urban life allocating resources shaping social opportunities maintaining order and simply enabling life More than the silent stage on which other powers perform such networks represent the essence of the city They also form an important political project a politics of small interventions with large effects The increasing evidence for an Anthropocene bears out the way in which humanity has stamped its footprint on the planet by constructing urban forms that act as systems for directing life in ways that create both immense power and immense constraint

Seeing the Myth in Human Rights Jenna Reinbold, 2016-11-08 The 1948 Universal Declaration of Human Rights has been called one of the most powerful documents in human history Today the mere accusation of violations of the rights outlined in this document cows political leaders and riles the international community Yet as a nonbinding document with no mechanism for enforcement it holds almost no legal authority Indeed since its adoption the Declaration's authority has been portrayed not as legal or political but as moral Rather than providing a set of rules to follow or laws to obey it represents a set of standards against which the world's societies are measured It has achieved a level of rhetorical power and influence unlike anything else in modern world politics becoming the foundational myth of the human rights project Seeing the Myth in Human Rights presents an interdisciplinary investigation into the role of mythmaking in the creation and propagation of the Universal Declaration Pushing beyond conventional understandings of myth which tend to view such narratives as vehicles either for the spreading of particular religious dogmas or for the spreading of erroneous even duplicitous discourses Jenna Reinbold mobilizes a robust body of scholarship within the field of religious studies to help us appreciate myth as a mode of human labor designed to generate meaning solidarity and order This usage does not merely parallel today's scholarship on myth it dovetails in unexpected ways with a burgeoning body of scholarship on the origin and function of contemporary human rights and it puts the field of religious studies into conversation with the fields of political philosophy critical legal studies and human rights historiography For Reinbold myth is a phenomenon that is not merely germane to the exploration of specific religious narratives but is key to a broader understanding of the nature of political authority in the modern world
