achieve success disproportionate to their size Lambert demonstrates how creating maritime identities made these states more dynamic open and inclusive than their lumbering continental rivals Only when they forgot this aspect of their identity did these nations begin to decline Recognizing that the United States and China are modern naval powers rather than seapowers is essential to understanding current affairs as well as the long term trends in world history This volume is a highly original big think analysis of five states whose success and eventual failure is a subject of enduring interest by a scholar at the top of his game
