Elias Kirey, 2023-08-21 German colonial history in today Tanzania Mainland is extensively documented but it has not been studied from its memory perspective despite it being widely remembered among the Tanzanians. This book documents German colonial memories as shared cultural legacy that exists in forms of monuments, archives, and historical sites. It also presents them as trans-generational memory narratives that live in people's memories that are also commemorated in different ways like erection of war monuments. The book analyzes memories of colonialism from the historical perspective, showing how the collective memories like monuments and commemorations have undergone structural and institutional changes over time. The study uses Michael Rothberg's multi-directional theory together with other theoretical approaches to analyze various forms of German colonial memories in the Tanzanian context. The findings, which are analyzed historically, indicate that the collective memories of the Germans are cultural, communicative, commemorative, functional, and topographical. They are also traumatic as well as nostalgic.
