Sheltering Bridges:

Bridge to Shelter Eliza Harwell, 2022-11-15 It's hard to move forward when the past won't let her go. Casey Young prides herself on her work running a veterinary clinic and animal shelter and has little time to consider whether her fierce independence may actually be loneliness. Safely ensconced in the small town of Pleasant Valley, she can also distract herself from a difficult relationship with her parents. Everything changes when a charming real estate developer Will Ingalls buys the land her shelter sits on. Instantly suspicious of Will's intentions, Casey refuses to back down, determined to protect her shelter and her independence. As Will makes clear his determination to win her heart, she finds herself drawn to his kindness and persistence. When a family crisis erupts, however, Casey must decide once and for all whether she will let her past jeopardize the future he represents. *Bridge to Shelter* is a heartwarming tale of love, trust, and finding one's place in the world. It explores the struggles of balancing independence with vulnerability and the importance of trust and communication in any relationship. With a richly drawn cast of characters, a whole lot of animals, and a storyline full of surprises, this book will leave you rooting for Casey and Will as they navigate their way through life and love. Read all of the Bridging Divides series: *Bridge to Shelter*, *Bridge to Justice*, *Bridge to Home*. This volume consists of a book of extended abstracts and a USB card containing the full papers of 393 contributions presented at IABMAS 2018, including the T.Y. Lin Lecture 10 Keynote Lectures and 382 technical papers from 40 countries. The contributions presented at IABMAS 2018 deal with the state of the art as well as emerging concepts and innovative applications related to the main aspects of bridge maintenance, safety, risk management, and life cycle performance. Major topics include new design methods, bridge codes, heavy vehicle and load models, bridge management systems, prediction of future traffic models, service life prediction, residual service life, sustainability, and life cycle assessments, maintenance strategies, bridge diagnostics, health monitoring, non-destructive testing, field testing, safety and serviceability assessment and evaluation, damage identification, deterioration modelling, repair and retrofitting strategies, bridge reliability, fatigue and corrosion, extreme loads, advanced experimental simulations, and advanced computer simulations, among others. This volume provides both an up-to-date overview of the field of bridge engineering and significant contributions to the process of more rational decision making on bridge maintenance, safety, risk management, and life cycle performance of bridges for the purpose of enhancing the welfare of society. The Editors hope that these Proceedings will serve as a valuable reference to all concerned with bridge structure and infrastructure systems, including students.

Kentucky's Covered Bridges Robert W. M. Laughlin, Melissa C. Jurgensen, 2007 Kentucky is well recognized for bourbon bluegrass and the Kentucky Derby When thinking of covered bridges the commonwealth is not the state that readily comes to mind Many of Kentucky's covered bridges were built by such men as Wernwag Bower Carothers Day Stone and Long but many of the names were never recorded or have been lost to time Kentucky once was home to the longest single span wooden bridge in the world and to a covered bridge through which a Civil War battle was fought Time arson progress neglect and misguided maintenance have spelled the demise of the majority of these structures Readers of this volume might be surprised to learn that Kentucky once claimed more than 700 timbered tunnels and that over 50 of these survived well into the 1950s Equally surprising the commonwealth is still home to 13 of these structures

The Devil's Bridge Anthony Tucker-Jones, 2020-06-25 This fascinating title offers a new look at Operation Market Garden and the Arnhem campaign from the perspective of the German forces who defended against the Allies In the late summer of 1944 SS Obergruppenführer Wilhelm Willi Bittrich found himself in the Netherlands surveying his II SS Panzer Corps which was in a poor state having narrowly escaped the defeat in Normandy He was completely unaware that his command lay directly in the path of a major Allied thrust the 17 September 1944 launch of the largest airborne and glider operation in the history of warfare Codenamed Operation Market Garden it was intended to outflank the German West Wall and bounce the Rhine at Arnhem from where the Allies could strike into the Ruhr Nazi Germany s industrial heartland Such a move could have ended the war However Market

Garden and the battle for Arnhem were a disaster for the Allies Put together in little over a week and lacking in flexibility the operation became an all or nothing race against time The plan to link the airborne divisions by pushing an armoured division up a sixty five mile corridor was optimistic at best and the British drop zones were not only too far from Arnhem Bridge but also directly above two recuperating SS Panzer divisions The Devil s Bridge explores the operation from the perspective of the Germans as renowned historian Anthony Tucker Jones examines how they were able to mobilise so swiftly and effectively in spite of depleted troops and limited intelligence
