Shelters Shacks And Shanties:

Shelters, Shacks and Shanties Daniel Carter Beard, 2020-09-28 As this book is written for boys of all ages it has been divided under two general heads The Tomahawk Camps and The Axe Camps that is camps which may be built with no tool but a hatchet and camps that will need the aid of an axe The smallest boys can build some of the simple shelters and the older boys can build the more difficult ones The reader may if he likes begin with the first of the book build his way through it and graduate by building the log houses in doing this he will be closely following the history of the human race because ever since our arboreal ancestors with prehensile toes scampered among the branches of the pre glacial forests and built nestlike shelters in the trees men have made themselves shacks for a temporary refuge But as one of the members of the Camp Fire Club of America as one of the founders of the Boy Scouts of America and as the founder of the Boy Pioneers of America it would not be proper for the author to admit for one moment that there can be such a thing as a camp without a camp fire and for that reason the tree folks and the missing link whose remains were found in Java and to whom the scientists gave the awe inspiring name of Pithecanthropus erectus cannot be counted as campers because they did not know how to build a camp fire neither can we admit the ancient maker of stone implements called eoliths to be one of us because he too knew not the joys of a camp fire But there was another fellow called the Neanderthal man who lived in the ice age in Europe and he had to be a camp fire man or freeze As far as we know he was the first man to build a camp fire The cold weather made him hustle and hustling developed him True he did cook and eat his neighbors once in a while and even split their bones for the marrow but we will forget that part and just remember him as the first camper in Europe Recently a pygmy skeleton was discovered near Los Angeles which is claimed to be about twenty thousand years old but we do not know whether this man knew how to build a fire or not We do know however that the American camper was here on this continent when our Bible was yet an unfinished manuscript and that he was building his fires toasting his venison and building sheds when the red headed Eric settled in Greenland when Thorwald fought with the Skraelings and Biarni's dragon ship made the trip down the coast of Vineland about the dawn of the Christian era We also know that the American camper was here when Columbus with his comical toy ships was blundering around the West Indies We also know that the American camper watched Henry Hudson steer the Half Moon around Manhattan Island It is this same American camper who has taught us to build many of the shacks to be found in the following pages The shacks sheds shanties and shelters described in the following pages are all of them similar to those used by the people on this continent or suggested by the ones in use and are typically American and the designs are suited to the arctics the tropics and temperate climes also to the plains the mountains the desert the bog and even the water It seems to be natural and proper to follow the camp as it grows until it develops into a somewhat pretentious log house but this book must not be considered as competing in any manner with professional architects The buildings here suggested require a woodsman more than an architect the work demands more the skill of the axeman than that of the carpenter and joiner The

log houses are supposed to be buildings which any real outdoor man should be able to erect by himself and for himself Many of the buildings have already been built in many parts of the country by Boy Pioneers and Boy Scouts This book is not intended as an encyclopedia or history of primitive architecture the bureaus at Washington and the Museum of Natural History are better equipped for that purpose than the author The boys will undoubtedly acquire a dexterity and skill in building the shacks and shanties here described which will be of lasting benefit to them whether they acquire the skill by building camps just for the fun of the thing or in building them for the more practical purpose of furnishing shelter for overnight pleasure hikes for the wilderness trail or for permanent camps while living in the open It has been the writer s experience that the readers depend more upon his diagrams than they do upon the written matter in his books and so in this book he has again attempted to make the diagrams self explanatory The book was written in answer to requests by many people interested in the Boy Scout movement and others interested in the general activities of boys and also in answer to the personal demands of hundreds of boys and many men The drawings are all original and many of them invented by the author himself and published here for the first time for the purpose of supplying all the boy readers the Boy Scouts and other older boys calling themselves Scoutmasters and sportsmen with practical hints drawings and descriptions showing how to build suitable shelters for temporary or permanent camps **Shelters, Shacks, and Shanties** Daniel Carter Beard,1920

Shelters, Shacks, and Shanties Daniel Carter Beard, 2012 My 13 year old boy scout asked for this book After reading bits and pieces for a week or so he enlisted his brother and some neighborhood boys to go build some shelters in the woods down the street They kept talking about the shelter and I figured it was typical exaggeration A few of us adults walked down one day to see the shelter WOW It was impressive and it stood up to the recent ice storms that left people without power for weeks All built with branches and saplings in the woods The book inspired them Dense informative and readable It is hard to believe that a book published almost 100 years ago is still very relevant and practically useful today It is very very dense yet still very readable It offers much more information than I originally anticipated I am amazed by what shelters can be built with some simple tools The author one of the founders of Boy Scouts of America actually lived in a log house built by himself I suspect most of the content is from the author s own experience in building various kinds of architecture from simple shelters to fairly sophisticated houses Modern lightweight tents may be the primary temporary outdoor shelters nowadays but wood shelters are still loved by hikers campers This book is invaluable for educating kids to gain some basic carpentry and outdoor knowledge nurture their sense of independence and responsibility and offer them the tremendous joy of staying in what built by themselves
