How Humans Recognize Objects: Segmentation, Categorization and Individual Identification Chris Fields, 2016-08-18 Human beings experience a world of objects bounded entities that occupy space and persist through time Our actions are directed toward objects and our language describes objects We categorize objects into kinds that have different typical properties and behaviors We regard some kinds of objects each other for example as animate agents capable of independent experience and action while we regard other kinds of objects as inert We re identify objects immediately and without conscious deliberation after days or even years of non observation and often following changes in the features locations or contexts of the objects being re identified Comparative developmental and adult observations using a variety of approaches and methods have yielded a detailed understanding of object detection and recognition by the visual system and an advancing understanding of haptic and auditory information processing Many fundamental questions however remain unanswered What for example physically constitutes an object How do specific classically characterizable object boundaries emerge from the physical dynamics described by quantum theory and can this emergence process be described independently of any assumptions regarding the perceptual capabilities of observers How are visual motion and feature information combined to create object information How are the object trajectories that indicate persistence to human observers implemented and how are these trajectory representations bound to feature representations How for example are point light walkers recognized as single objects How are conflicts between trajectory driven and feature driven identifications of objects resolved for example in multiple object tracking situations Are there separate what and where processing streams for haptic and auditory perception Are there haptic and or auditory equivalents of the visual object file Are there equivalents of the visual object token How are object identification conflicts between different perceptual systems resolved Is the common assumption that persistent object is a fundamental innate category justified How does the ability to identify and categorize objects relate to the ability to name and describe them using language How are features that an individual object had in the past but does not have currently represented How are categorical constraints on how objects move or act represented and how do such constraints influence categorization and the re identification of individuals How do human beings re identify objects including each other as persistent individuals across changes in location context and features even after gaps in observation lasting months or years How do human capabilities for object categorization and re identification over time relate to those of other species and how do human infants develop these capabilities What can modeling approaches such as cognitive robotics tell us about the

answers to these questions Primary research reports reviews and hypothesis and theory papers addressing questions relevant to the understanding of perceptual object segmentation categorization and individual identification at any scale and from any experimental or modeling perspective are solicited for this Research Topic Papers that review particular sets of issues from multiple disciplinary perspectives or that advance integrative hypotheses or models that take data from multiple experimental approaches into account are especially encouraged

Sovereign of the Seas, 1637 John McKay,2020-02-28

Sovereign of the Seas was the most spectacular extravagant and controversial warship of the early seventeenth century The ultimate royal prestige project whose armament was increased by the King s decree to the unheard of figure of 100 guns the ship finally cost the equivalent of ten more conventional warships A significant proportion of this total was spent on her gilded decoration which gave the ship a unique combination of firepower and visual impact in battle that led her Dutch opponents to dub her the Golden Devil The vessel was the poster child of the notorious Ship Money tax raised without parliamentary approval and so unpopular it was a major factor leading to the Civil War in which Charles I lost his sovereignty and his head In that sense she was a ship that cost a kingdom It is unsurprising that such a high profile ship should be well documented but there are no contemporary plans and much of the visual evidence is contradictory In this book John McKay sets out to analyse the data and reconstruct the design and appearance of the ship in a degree of detail never previously attempted The results are presented as a folio of superbly draughted plans isometric drawings and coloured renderings covering every aspect of the design from the hull form to the minutiae of sails and rigging Each section is accompanied by an explanatory text setting out the rationale for his conclusions so the book will be of value to historians of the period as well as providing superb reference for any modeller tackling one of the most popular of all sailing ship subjects

William Wordsworth John L. Mahoney,2024-10-22 Available in a new digital edition with reflowable text suitable for e readers William Wordsworth A Poetic Life is a new biography of the great father of British Romanticism It is new in several ways most notably in the way it approaches the life of the poet Paying its proper respect to the classic lives of Wordsworth by Mary Moorman and Stephen Gill it attempts to tell the story of the life through a more rigorous reading of key and representative works of the poet through careful blending of life and poetry Wordsworth offers the story of the literariness of the poet s life childhood and adolescence in the Lake District education at Cambridge love and political radicalism in France the long period of residence in Grasmere and Rydal celebrity and national and international recognition Its reading of the poems in tune with current theoretical practice offers a sense of the continuities in Wordsworth s career as it moves away from familiar theories of a Golden Decade of creativity and a period of long decline The book also works closely and rigorously with Wordsworth s poetry as a method of dramatizing the essentially poetic character of the poet s life
