Shimmering Color:

Speaking of Colors and Odors Martina Plümacher, Peter Holz, 2007-01-01 How to speak of colors and odors In many cases we have to think about an adequate description of a perceived odor or shade of color Words are not fluently available The contributions discuss color and odor perception and its linguistic representation from different disciplinary angles from neurobiology neuropsychology psycholinguistics cognitive linguistics and philosophy They show that linguistic representation of colors and odors depends highly on cultures of communication Experts are skilled in discerning finer differences between their sense impressions and have at their disposal a special language which non experts do not master The color and odor vocabulary is rare if there is no cultural habit to communicate the very sense impression In cases where individuals have to speak of their sensory experiences more precisely they often turn to metaphors The contributions discuss the lack of inter individual conventions of naming and describing odors compared to the more expanded linguistic representation of colors

What Color Is the Sacred? Michael Taussig, 2024-05-31 Over the past thirty years visionary anthropologist Michael Taussig has crafted a highly distinctive body of work Playful enthralling and whip smart his writing makes ingenious connections between ideas thinkers and things An extended meditation on the mysteries of color and the fascination they provoke What Color Is the Sacred is the next step on Taussig s remarkable intellectual path Following his interest in magic and surrealism his earlier work on mimesis and his recent discussion of heat gold and cocaine in My Cocaine Museum this book uses color to explore further dimensions of what Taussig calls the bodily unconscious in an age of global warming Drawing on classic ethnography as well as the work of Benjamin Burroughs and Proust he takes up the notion that color invites the viewer into images and into the world Yet as Taussig makes clear color

has a history a manifestly colonial history rooted in the West's discomfort with color especially bright color and its associations with the so called primitive He begins by noting Goethe's belief that Europeans are physically averse to vivid color while the uncivilized revel in it which prompts Taussig to reconsider colonialism as a tension between chromophobes and chromophiliacs And he ends with the strange story of coal which he argues displaced colonial color by giving birth to synthetic colors organic chemistry and IG Farben the giant chemical corporation behind the Third Reich Nietzsche once wrote So far all that has given colour to existence still lacks a history With *What Color Is the Sacred* Taussig has taken up that challenge with all the radiant intelligence and inspiration we've come to expect from him

Art and Theory of Art Rudolf Steiner, 2021-10-19 An Author's Summary 1888 Four Essays Written between 1890 and 1898 Eight Lectures between 1909 and 1921 CW 271 The challenge of saying something about art was personal for Rudolf Steiner He experienced it as deeply connected with his biography It is

not for nothing that in the last lecture of this volume he points to his repeated attempts to develop a new approach and new forms of expression for speaking about art We find at least three forms of this attempted approach in this book Zvi Szir from the introduction The subject practice and vital importance of art was a thread that ran through Rudolf Steiner's life from his early work as a scholar of Goethe through his time as an editor of a literary and arts journal in Berlin in the 1890s and to his two and a half decades as a spiritual researcher and teacher Understanding and articulating the significance of art was a perennial challenge for Rudolf Steiner This volume of Steiner's Collected Works is unique in that it showcases a survey of both early written works and later lectures to anthroposophic audiences and in doing so presents a picture of a lifetime of intensive effort to convey something essential about the arts Beginning with his early philosophical work and literary criticism at the end of the nineteenth century and on into his later lectures this volume follows Steiner's endeavor to reveal in words the mystery obscured by the vague concept of what art is Viewed as a whole this volume forms one of the most provocative collections of the twentieth century on the subject of art It offers a unique analysis of the origin foundation and method of the creative process This book is a translation of *Kunst und Kunsterkenntnis Grundlagen einer neuen sthetik* 3rd edition published by Rudolf Steiner Verlag Dornach Switzerland 2010 GA 271 [Jewels](#) Victoria Finlay, 2007-08-14 Throughout history precious stones have inspired passions and poetry quests and curses sacred writings and unsacred actions In this scintillating book journalist Victoria Finlay embarks on her own globe circling search for the real stories behind some of the gems we prize most Blending adventure travel geology exciting new research and her own irresistible charm Finlay has fashioned a treasure hunt for some of the most valuable glamorous and mysterious substances on earth With the same intense curiosity and narrative flair she displayed in her widely praised book *Color* Finlay journeys from the underground opal churches of outback Australia to the once pearl rich rivers of Scotland from the peridot mines on an Apache reservation in Arizona to the remote ruby mines in the mountains of northern Burma She risks confronting scorpions to crawl through Cleopatra's long deserted emerald mines tries her hand at gem cutting in the dusty Sri Lankan city where Marco Polo bartered for sapphires and investigates a rumor that fifty years ago most of the world's amber was mined by prisoners in a Soviet gulag *Jewels* is a unique and often exhilarating voyage through history across cultures deep into the earth's mantle and up to the glittering heights of fame power and wealth From the fabled curse of the Hope Diamond to the disturbing truths about how pearls are cultured to the peasants who were once executed for carrying amber to the centuries old quest by magicians and scientists to make a perfect diamond *Jewels* tells dazzling stories with a wonderment and brilliance truly worthy of its subjects [Appleton's Magazine](#) ,1906 [Appleton's Booklovers Magazine](#) ,1906 [ARTnews](#) ,1953 **Car Restoration: The Art of Rejuvenating Your Beloved Vehicle** Pasquale De Marco, 2025-04-12 In the realm of automotive restoration where passion meets precision lies a world of endless possibilities and boundless rewards This comprehensive guide unlocks the secrets of car restoration empowering you to transform a classic vehicle into a masterpiece
