**Defining the Wind** Scott Huler, 2007-12-18 Nature rightly questioned never lies A Manual of Scientific Enquiry Third Edition 1859 Scott Huler was working as a copy editor for a small publisher when he stumbled across the Beaufort Wind Scale in his Merriam Webster Collegiate Dictionary It was one of those moments of discovery that writers live for Written centuries ago its 110 words launched Huler on a remarkable journey over land and sea into a fascinating world of explorers mariners scientists and writers After falling in love with what he decided was the best clearest and most vigorous

piece of descriptive writing I had ever seen Huler went in search of Admiral Francis Beaufort himself hydrographer to the British Admiralty man of science and author Huler assumed of the Beaufort Wind Scale But what Huler discovered is that the scale that carries Beaufort's name has a long and complex evolution and to properly understand it he had to keep reaching farther back in history into the lives and works of figures from Daniel Defoe and Charles Darwin to Captains Bligh of the *Bounty* and Cook of the *Endeavor* As hydrographer to the British Admiralty it was Beaufort's job to track the information that ships relied on where to lay anchor descriptions of ports information about fortification religion and trade But what came to fascinate Huler most about Beaufort was his obsession for observing things and communicating to others what the world looked like Huler's research landed him in one of the most fascinating and rich periods of history because all around the world in the mid eighteenth and nineteenth centuries in a grand expansive period modern science was being invented every day These scientific advancements encompassed not only vast leaps in understanding but also how scientific innovation was expressed and even organized including such enduring developments as the scale Anders Celsius created to simplify how Gabriel Fahrenheit measured temperature the French designed metric system and the Gregorian calendar adopted by France and Great Britain To Huler Beaufort came to embody that passion for scientific observation and categorization indeed Beaufort became the great scientific networker of his time It was he for example who was tapped to lead the search for a naturalist in the 1830s to accompany the crew of the *Beagle* he recommended a young naturalist named Charles Darwin

Defining the Wind is a wonderfully readable often humorous and always rich story that is ultimately about how we observe the forces of nature and the world around us *Routes and Roots* Elizabeth DeLoughrey, 2009-12-31 Elizabeth DeLoughrey invokes the cyclical model of the continual movement and rhythm of the ocean tidalectics to destabilize the national ethnic and even regional frameworks that have been the mainstays of literary study The result is a privileging of alter native epistemologies whereby island cultures are positioned where they should have been all along at the forefront of the world historical process of transoceanic migration and landfall The research determination and intellectual dexterity that infuse this nuanced and meticulous reading of Pacific and Caribbean literature invigorate and deepen our interest in and appreciation of island literature Vilsoni Hereniko University of Hawai'i Elizabeth DeLoughrey brings contemporary hybridity diaspora and globalization theory to bear on ideas of indigeneity to show the complexities of native identities and rights and their grounded opposition as indigenous regionalism to free floating globalized cosmopolitanism Her models are instructive for all postcolonial readers in an age of transnational migrations Paul Sharrad University of Wollongong Australia *Routes and Roots* is the first comparative study of Caribbean and Pacific Island literatures and the first work to bring indigenous and diaspora literary studies together in a sustained dialogue Taking the tidalectic between land and sea as a dynamic starting point Elizabeth DeLoughrey foregrounds geography and history in her exploration of how island writers inscribe the complex relation between routes and roots The first section looks at the sea as history in literatures of the Atlantic middle passage

and Pacific Island voyaging theorizing the transoceanic imaginary The second section turns to the land to examine indigenous epistemologies in nation building literatures Both sections are particularly attentive to the ways in which the metaphors of routes and roots are gendered exploring how masculine travelers are naturalized through their voyages across feminized lands and seas This methodology of charting transoceanic migration and landfall helps elucidate how theories and people travel positioning island cultures in the world historical process In fact DeLoughrey demonstrates how these tropical island cultures helped constitute the very metropolises that deemed them peripheral to modernity Fresh in its ideas original in its approach Routes and Roots engages broadly with history anthropology and feminist postcolonial Caribbean and Pacific literary and cultural studies It productively traverses diaspora and indigenous studies in a way that will facilitate broader discussion between these often segregated disciplines
