## **Shipping Economics:**

Shipping Economics Kevin Cullinane, 2005-06-15 Shipping is by far the most significant mode of transportation for the carriage of freight. In terms of volume alone no other mode comes close. Its dominance is even more overwhelming when distances are accounted for. This book is concerned with the economics of this pivotal mode of transportation. It reveals that the influences on the development and current state of shipping economics research are extremely eclectic. The various chapters in the book represent areas that are of central concern to ongoing research in the field. As such the book is useful to students, researchers, industrialists, policy makers and consultants. The authors of the contributed chapters are some of the leading names in the world of shipping economics, addressing a number of diverse areas: The econometric modeling of shipping markets; Shipping finance, a critical issue in such a capital intensive industry; Fiscal policy and its impact on an international industry with great asset mobility; and Safety and security aspects that have risen to prominence with increasing concerns over the environment and international terrorism. Ultimately, while shipping as a business depends upon trade, it is absolutely certain that the business of trade depends upon shipping. The final two chapters therefore incorporate aspects of network economics, welfare economics and international trade theory to analyze where and how shipping sits within the wider perspective of industrial supply chains. Professor Kevin Cullinane BA BSc MSc PhD FCILT CNIP. Professor Kevin Cullinane is Chair in Marine Transport and Management at the University of Newcastle in the U.K. He was previously Professor and Head of the Department of Shipping and Transport Logistics at the Hong Kong Polytechnic University, Head of the Centre for International Shipping and Transport at Plymouth University, Senior Partner in his own transport consultancy company and Research Fellow at the University of Oxford Transport Studies Unit. He is a Fellow of the Chartered Institute of Logistics and Transport and has been a transport adviser to the governments of Hong Kong, Egypt, Chile and the U.K. He holds visiting Professorships at a number of institutions and an Honorary Professorship at the University of Hong Kong. Introduction to Shipping Economics Ignacy Chrzanowski, 1985      **Shipping Economics** S.G. Sturme, 1975-06-18      **Liner Shipping Economics** Jan Jansson, 2012-12-06 The importance of international liner shipping needs little emphasizing. A large majority of international trade moves by sea and the liner shipping share in total freight revenue exceeds one half. Notwithstanding, people in general know surprisingly little about the basic facts of the liner shipping industry and in particular about the economics of liner shipping. Perhaps because it is an international industry where shipping lines flying many different flags participate, it has tended to fall in between national accounts of domestic industries. Even transport economists have generally speaking treated liner shipping rather stepmotherly. Besides the work of Bennathan and Walters (1969), a relatively small group of specialized maritime economists including A. Stromme, Svendsen, T. Thorburn, S. Sturme, R. Goss and B. M. Deakin have in the post-war period made important contributions to the subject, but so far no coherent and reasonably comprehensive treatise of liner shipping economics has appeared. The first purpose of the present volume is

therefore obvious to provide just that The book is divided in three parts Part I The liner shipping industry Part II Liner service optimization Part III Economic evaluation of the conference system Needless to say all three parts concur to fulfill the first purpose of providing a complete book of liner shipping economics In Part II a more or less separate second purpose has been to develop analytical tools for liner service optimization Thereby we use different approaches *Liner Shipping Economics* Jan Jansson, Dan Shneerson, 1987 The importance of international liner shipping needs little emphasizing A large majority of international trade moves by sea and the liner shipping share in total freight revenue exceeds one half Notwithstanding people in general know surprisingly little about the basic facts of the liner shipping industry and in particular about the economics of liner shipping Perhaps because it is an international industry where shipping lines flying many different flags participate it has tended to fall in between national accounts of domestic industries Even transport economists have generally speaking treated liner shipping rather stepmotherly besides the work of Bennathan and Walters 1969 a relatively small group of specialized maritime economists including A Stromme Svendsen T Thorburn S Sturme R Goss and B M Deakin have in the post war period made important contributions to the subject but so far no coherent and reasonably comprehensive treatise of liner shipping economics has appeared The first purpose of the present volume is therefore obvious to provide just that The book is divided in three parts Part I The liner shipping industry Part II Liner service optimization Part III Economic evaluation of the conference system Needless to say all three parts concur to fulfill the first purpose of providing a complete book of liner shipping economics In Part II a more or less separate second purpose has been to develop analytical tools for liner service optimization Thereby we use different approaches *Port Economics* Kevin Cullinane, Wayne K Talley, 2006-06-22 A port or seaport is a place that provides for the vessel transfer of cargo and passengers to and from waterways and shores Port economics is concerned with the study of the economics of port services Users of port services are those that utilize the port as part of the transportation process of moving cargo and passengers to and from origin and destination locations Users include transportation carriers such as shipping lines railroads and trucking firms that perform these movements and shippers and individuals that provide the cargo and themselves as passengers to be transported Port users demand port services whereas port service providers such as the port terminal operator supply port services to port users Port economics and shipping economics comprise the branch of economics known as maritime economics This volume provides original contributions to the study of port economics 1 the evolution of port economics 2 economic theories of the port port cost functions and port investment and 3 empirical evidence on the relative efficiency of ports the impact of ports on international maritime transport costs the competitiveness of ports and the impact of deregulation on dockworker wages Provides original contributions to the study of port economics Examines the evolution of port economics economic theories of the port and empirical evidence on the relative efficiency of ports the impact of ports on transport costs and the competitiveness of ports **Maritime Economics** Martin Stopford, 2013-04-15 Now in its second

edition Maritime Economics provides a valuable introduction to the organisation and workings of the global shipping industry The author outlines the economic theory as well as many of the operational practicalities involved Extensively revised for the new edition the book has many clear illustrations and tables Topics covered include an overview of international trade Maritime Law economic organisation and principles financing ships and shipping companies market research and forecasting

**Shipping and Logistics Management** Yuen Ha (Venus) Lun, Kee Hung Lai, Tai Chiu Edwin Cheng, 2010-04-07 Shipping and Logistics Management serves to consolidate the knowledge its authors have acquired from being educators and observers of the shipping industry Against the background of a global business environment it explains how the shipping market functions examining the strategic and operational issues that affect entrepreneurs in this industry The authors discuss global trends and strategies in the shipping business looking at the role of logistics service providers and at how the use of information technology can help shipping operations Shipping and Logistics Management also aims to answer several important questions in the shipping industry including what are the shipping cost structures what are the patterns of sea transport and how do companies in the shipping industry operate An invaluable source of information for researchers and advanced or graduate students Shipping and Logistics Management is also a useful reference for shipping practitioners and consultants

**Shipping Conferences under EC Antitrust Law** Luis Ortiz Blanco, 2007-06-26 Liner conferences are among the oldest surviving cartels in the world Created in the 1870s they have existed since on all the world's shipping routes With the approval or tacit acquiescence of governments everywhere they fix freight rates control capacity and share markets The United Nations Code of Conduct for Liner Conferences 1974 granted them global recognition and prompted the European Community to recommend Member States to join the Convention on the Liner Code 1979 and to grant them the most generous and extraordinary block exemption from EC antitrust rules ever 1986 The European Commission's administration of the block exemption has clarified some of its aspects and to a certain extent limited its scope but until very recently it has not questioned the appropriateness of the exceptionally lenient treatment of liner shipping cartels in the European Union After a report by the OECD Secretariat 2002 recommending abolition of antitrust immunity for shipping cartels in member countries the European Commission launched a review of the block exemption 2003 which has led to its repeal 2006 This book studies first the origins the early history and the regulation of

liner conferences in the world and in the European Community focusing in particular on the Regulation which granted a block exemption to liner conferences Then it examines one by one the four conditions for a block exemption to be granted under EC law and concludes that none of them is fulfilled by shipping cartels Finally it proposes some alternative scenarios and solutions for the adequate enforcement of antitrust law in the maritime sector once the block exemption has been repealed
