Shipwrecks And Archaeology:

Wooden Ship Building and the Interpretation of Shipwrecks John Richard Steffy, 1994 This book is a guide to the study of the most marvelous structures ever built by humankind wooden ships and boats It is intended for nautical archaeologists and for anyone charged with documenting and interpreting the remains of wrecked or abandoned vessels It will also be of value to historians authors model builders and others interested in the design and construction of wooden watercraft of the past The text is divided into three parts The first introduces the discipline and presents enough basic information to permit the untrained reader to understand the analysis of ship and boat construction that follows Part II is broken into three chapters that investigate ancient medieval and post medieval shipwrecks and supporting documentation Not all of the world's ship and boat excavations can be included in this single volume nautical archaeology has progressed too far for that Instead these three chapters have been assembled to represent a cross section of ship building technology as seen through the interpretation of a select group of finds Part III addresses the techniques of recording hull remains assembling archival information reconstructing vessels and converting data into plans and publication It is by no means a how to section Sites logistics and the wrecks themselves vary so much that like wooden ship building this discipline can never become an exact science Rather the third part of the book discusses work done on previous projects and suggests additional methods that might prove helpful to readers in their own endeavors The book contains an illustrated glossary specifically designed for archaeological use There is also a select bibliography annotated where titles do not indicate content and arranged in historical groups to provide sources for most areas of research BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved

Shipwrecks and Archaeology Peter Throckmorton, 1970 *Site Formation Processes of Submerged Shipwrecks* Matthew E. Keith, 2016-01-30 Many factors influence the formation of shipwreck sites the materials from which the ship was built the underwater environment and subsequent events such as human activity storms and chemical reactions In this first volume to comprehensively catalogue the physical and cultural processes affecting submerged ships Matthew Keith brings together experts in diverse fields such as geology soil and wood chemistry micro and marine biology and sediment dynamics The case studies identify and examine the natural and anthropogenic processes corrosion and degradation on one hand fishing and trawling on the other that contribute to the present condition of shipwreck sites The contributors also discuss how these varied and often overlapping events influence the archaeological record Offering an in depth analysis of emerging technologies and methods acoustic positioning computer modeling and site reconstruction this is an essential study for the research and preservation of submerged heritage sites

Fishing and Shipwreck Heritage Sean A. Kingsley, 2015-11-19 For 250 years encrusted wonders have been turning up in fishermen's nets everything imaginable from prehistoric animal bones to priceless Roman statues Fishing trawlers annually sweep an area equivalent in size to half the world's continental shelves Everything in the wake of these bulldozers of the deep is

battered A devastating trail of smashed shipwrecks runs from the North Sea to Malaysia The profound threat of the global fishing industry remains a black hole in marine archaeology poorly understood and unmanaged Fishing and Shipwreck Heritage is the first global analysis of the threat of bottom fishing to underwater cultural heritage examining the diversity scale and implications on endangered finds and sites Throughout the key questions of whether it is too late to save the planet's three million wrecks and how sustainable management is achievable are debated Maritime Archaeology Lawrence E. Babits, Hans Van Tilburg, 2013-11-11 This volume initiates a new series of books on maritime or underwater archaeology and as the editor of the series I welcome its appearance with great excitement It is appropriate that the first book of the series is a collection of articles intended for graduate or undergraduate courses in underwater archaeology since the growth in academic opportunities for students is an important sign of the vitality of this subdiscipline The layman will enjoy the book as well Academic and public interest in shipwrecks and other submerged archaeological sites is indicated by a number of factors Every year there are 80 to 90 research papers presented at the Society for Historical Archaeology's Conference on Historical and Underwater Archaeology and the Proceedings are published Public interest is shown by extensive press coverage of shipwreck investigations One of the most important advances in recent years has been the passage of the Abandoned Shipwreck Act of 1987 for the first time providing national level law concerning underwater archaeological sites The legislation has withstood a number of legal challenges by commercial treasure salvors a very hopeful sign for the long term preservation of this nonrenewable type of cultural resource The underwater archaeological discoveries of 1995 were particularly noteworthy The Texas Historical Commission discovered the Belle one of La Salle's ships and the CSS Hunley was found by a joint project of South Carolina and a private nonprofit organization called NUMA Shipwreck Anthropology School of American Research (Santa Fe, N.M.), 1983 **History from the Sea** Reader's Digest, 1987-01-01

Archaeological Oceanography Robert D. Ballard, 2021-09-14 Archaeological Oceanography is the definitive book on the newly emerging field of deep sea archaeology Marine archaeologists have been finding and excavating underwater shipwrecks since at least the early 1950s but until recently their explorations have been restricted to depths considered shallow by oceanographic standards This book describes the latest advances that enable researchers to probe the secrets of the deep ocean and the vital contributions these advances offer to archaeology and fields like maritime history and anthropology Renowned oceanographer Robert Ballard who stunned the world with his discovery of the Titanic deep in the North Atlantic has gathered together the pioneers of archaeological oceanography a cross disciplinary group of archaeologists oceanographers ocean engineers and anthropologists who have undertaken ambitious expeditions into the deep sea In this book they discuss the history of archaeological oceanography and the evolution and use of advanced deep submergence technology to locate and excavate ancient and modern shipwrecks and cultural and other sites deep under water They offer examples from their own expeditions and explain the challenges future programs face in obtaining access to

the resources needed to carry out this important and exciting research The contributors are Robert D Ballard Ali Can Dwight F Coleman Mike J Durbin Ryan Eustace Brendan Foley Cathy Giangrande Todd S Gregory Rachel L Horlings Jonathan Howland Kevin McBride James B Newman Dennis Piechota Oscar Pizarro Christopher Roman Hanumant Singh Cheryl Ward and Sarah Webster

International Handbook of Underwater Archaeology Carol V. Ruppe,Jane F. Barstad,2013-11-11

Although underwater archaeology has assumed its rightful place as an important subdiscipline in the field the published literature has not kept pace with the rapid increase in the number of both prehistoric and historic underwater sites The editors have assembled an internationally distinguished roster of contributors to fill this gap In addition to both geographical and topical approaches the chapters also focus on technology law public and private institutional roles and goals and the research and development of future technologies and public programs

Ships and Shipwrecks of the Americas George Fletcher Bass,1996 The rich maritime history of the New World is the focus of this work bringing together essays by leading nautical archaeologists The narrative is enhanced by paintings charts diagrams and maps

Ships from the Depths Fredrik Søreide,2011-04-28 Deepwater archaeology uncovers secrets from the ancient maritime past Thousands of shipwrecks and archaeological sites lie undiscovered in deep water potentially holding important clues to our maritime past Scientists have explored only a small percentage of the oceans depths as 98 percent of the seabed lies well beyond the reach of conventional diving Ships from the Depths surveys the dramatic advances in technology over the last few years that have made it possible for scientists to locate study and catalogue archaeological sites in waters previously inaccessible to humans Researcher and explorer Fredrik S reide presents the development of deepwater archaeology since 1971 when Willard Bascom designed his Alcoa Seaprobe to locate and raise deepwater wrecks in the Mediterranean Accompanied by descriptions and color photographs of deepwater projects and equipment this book considers not only techniques that have been developed for location and observation of sites but also removal and excavation methods distinctive to these unique locations far beyond the reach of scuba gear S reide provides an introduction to and survey of the history development and potential of this exciting branch of nautical archaeology Scholars and field archaeologists will appreciate this handy compendium of the current state of the discipline and technology and general readers will relish this comprehensive look at the challenges and opportunities associated with locating and studying historical and ancient shipwrecks in some of the world s deepest waters

Archaeology and the Social History of Ships Richard A. Gould,2011-04-29 Maritime archaeology deals with shipwrecks and is carried out by divers rather than diggers It embraces maritime history and analyzes changes in ship building navigation and seamanship and offers fresh perspectives on the cultures and societies that produced the ships and sailors Drawing on detailed past and recent case studies Richard A Gould provides an up to date

review of the field that includes dramatic new findings arising from improved undersea technologies This second edition of Archaeology and the Social History of Ships has been updated throughout to reflect new findings and new interpretations of old sites The new edition explores advances in undersea technology in archaeology especially remotely operated vehicles The book reviews many of the major recent shipwreck findings including the Vasa in Stockholm the Viking wrecks at Roskilde Fjord and the Titanic
