

Высокий уровень силы стремления к людям не выявлен ни у одного испытуемого (0), что можно объяснить возрастными особенностями старших подростков в реализации потребности в общении.

Таким образом, нами было выявлено, что испытуемым с высокой степенью потребности в общении соответствует слабая боязнь быть отвергнутым, либо таковая отсутствует вообще. Также для них характерна умеренная сила стремления к людям. Для испытуемых со средним уровнем потребности в общении характерны высокий и средний показатель боязни быть отвергнутыми в сочетании с умеренной, либо слабой силой стремления к людям.

Взаимосвязь между полученными показателями была исследована нами с помощью параметрического критерия корреляции Пирсона (Анализ взаимосвязи полученных результатов показал, что была выявлена прямая пропорциональная связь по таким шкалам как «Потребность в общении» и «Шкала оценки силы стремления к людям», что свидетельствует о том, что чем выше желание человека общаться, тем выше его стремление к людям, и наоборот.

Таким образом, нами было доказано, что потребность в общении в старшем подростковом возрасте основывается на мотиве аффилиации.
