**Shock and Awe. Achieving Rapid Dominance** ,1996 The purpose of this paper is to explore alternative concepts for structuring mission capability packages MCP s around which future U S military forces might be configured From the very outset of this study group s deliberations we agreed that the most useful contribution we could make would be to attempt to reach beyond what we saw as the current and commendable efforts largely but not entirely within the Department of Defense to define concepts for strategy doctrine operations and force structure to deal with a highly uncertain future In approaching this endeavor we fully recognized the inherent and actual limits and difficulties in attempting to reach beyond what may prove to be the full extent of our grasp It is of course clear that U S military forces are currently the most capable in the world and are likely to remain so for a long time to come Why then many will ask should we examine and even propose major excursions and changes if the country occupies this position of military superiority For reasons noted in this paper we believe that excursions are important if only to confirm the validity of current defense approaches There are several overreaching realities that have led us to this conclusion First while everyone recognizes that the Cold War has ended no one has yet been able to describe or predict what this means for more precisely defining the nature of our future security needs Despite this absence of both clairvoyance and a galvanizing external danger the United States has become refreshingly open in examining new strategic options and choices The variety of conceptual efforts underway in the Pentagon to deal with this uncertainty exemplifies this reality

**Light It Up** John Pettegrew,2015-11-15 Examines the U S Marines visual culture of combat in the Iraq War American military power in the War on Terror has increasingly depended on the capacity to see the enemy The act of seeing enhanced by electronic and digital technologies has separated shooter from target eliminating risk of bodily harm to the remote warrior while YouTube videos eroticize pulling the trigger and video games blur the line between simulated play and fighting Light It Up examines the visual culture of the early twenty first century military Focusing on the Marine Corps which played a critical part in the invasion and occupation of Iraq John Pettegrew argues that U S military force in the Iraq War was projected through an optics of combat Powerful military technology developed in the Iraq and Afghanistan wars has placed war in a new posthuman era Pettegrew s interviews with marines as well as his analysis of first person shooter videogames and combat footage lead to startling insights into the militarization of popular digital culture An essential study for readers interested in modern warfare policy makers and historians of technology war and visual and military culture

**Strategic Preemption** Robert J. Pauly, 2017-07-05 Placing the second US Iraq conflict in the context of emerging trends in international relations this exceptional timely volume examines the broad framework of US policy toward Iraq under the administration of George W Bush The Second Iraq War marks the third time since 1991 that the United States has invaded a Muslim country and this

book details not only the specifics of the conflict but the war's broad impact on US relations with Muslim states both in a regional and global context. It analyzes the development of the previous US policy of containment to the new doctrine of preemption. The volume also examines the linkages between Al Qaeda's attacks on the United States on 11 September 2001 and the prosecution of the Second Iraq War. Transitions Austrian Association for American Studies. Conference, 2006. This book is about transitions: the manifold and dynamic process of change and exchange, variety and variation, difference and diversity, migration and globalisation. Contributions emphasize issues of race and ethnicity in the American cultural context, look at class-based, gender-oriented, religious, political, historical, social and cultural negotiations, and question the meaningfulness of distinctions and boundaries in today's fast-changing world. Contributions include analyses of historical changes from Brown vs. Board of Education to 9/11, examinations of cultural transitions from regional identity to migratory artists as well as explorations of literary adaptations ranging from Affrilachian poetry to cyberspace narrativity. Learning to Forget David Fitzgerald, 2013-06-26. Learning to Forget analyzes the evolution of US counterinsurgency COIN doctrine over the last five decades. Beginning with an extensive section on the lessons of Vietnam, it traces the decline of COIN in the 1970s, then the rebirth of low-intensity conflict through the Reagan years in the conflict in Bosnia, and finally in the campaigns of Iraq and Afghanistan. Ultimately, it closes the loop by explaining how, by confronting the lessons of Vietnam, the US Army found a way out of those most recent wars. In the process, it provides an illustration of how military leaders make use of history and demonstrates the difficulties of drawing lessons from the past that can usefully be applied to contemporary circumstances. The book outlines how the construction of lessons is tied to the construction of historical memory and demonstrates how histories are constructed to serve the needs of the present. In so doing, it creates a new theory of doctrinal development.

**Abraham's Silence** J. Richard Middleton, 2021-11-16. It is traditional to think we should praise Abraham for his willingness to sacrifice his son as proof of his love for God. But have we misread the point of the story? Is it possible that a careful reading of Genesis 22 could reveal that God was not pleased with Abraham's silent obedience? Widely respected biblical theologian, creative thinker, and public speaker J. Richard Middleton suggests we have misread and misapplied the story of the binding of Isaac and shows that God desires something other than silent obedience in difficult times. Middleton focuses on the ethical and theological problem of Abraham's silence and explores the rich biblical tradition of vigorous prayer, including the lament psalms, as a resource for faith. Middleton also examines the book of Job in terms of God validating Job's lament as right speech, showing how the vocal Job provides an alternative to the silent Abraham. This book provides a fresh interpretation of Genesis 22 and reinforces the church's resurgent interest in lament as an appropriate response to God.

**Strategic Cultures and Security Policies in the Asia-Pacific** Jeffrey S. Lantis, 2016-03-22. This book shows how one of the most powerful tools of security studies, strategic culture, illuminates the origins and implications of the Asia-Pacific region's difficult issues from the rise of China and the American pivot to the shifting calculations of many other actors. Strategic

culture sometimes challenges and always enriches prevailing neo realist presumptions about the region It provides a bridge between material and ideational explanations of state behavior and helps capture the tension between neoclassical realist and constructivist approaches The case studies in this book survey the role of strategic culture in the behaviors of Australia China Japan the Philippines South Korea and the United States They show the contrast between structural expectations and cultural predispositions as realist geopolitical security threats and opportunities interact with domestic elite and popular interpretation of historical narratives and distinctive political military cultures to influence security policies The concluding chapter devotes special attention to methodological issues at the heart of strategic cultural studies as well as how culture may impact the potential for future conflict or cooperation in the region The result is a body of work that helps deepen our understanding of strategic cultures in the Asia Pacific in comparative perspective and enrich security studies This book was published as a special issue of Contemporary Security Policy

### **America, Technology and Strategic Culture**

Brice Harris, 2008-08-21 This book analyses the American way of war within the context of Clausewitzian theory In doing so it draws conclusions about the origins viability and technical feasibility of America's current strategic approach The author argues that the situation in which America has found itself in Iraq is the direct result of a culturally predisposed inclination to substitute technology for strategy This habit manifests most extremely in the form of the Network Centric Warfare Effects Based Operations NCW EBO construct which by and large has failed to deliver on its many promises This book argues that the fundamental problem with the NCW EBO and with US defence transformation generally is that it centres on technology at the expense of other dynamics notably the human one Taking a fresh perspective on US strategic cultural predispositions in an era of persistent military conflict the author argues for the necessity of America's revising its strategic paradigm in favour of a more holistic brand of strategy This book will be of much interest to students of Clausewitz Strategic Studies International Security and US foreign policy
