Being Modern Robert Bud, Paul Greenhalgh, Frank James, Morag Shiach, 2018-10-05. In the early decades of the twentieth century, engagement with science was commonly used as an emblem of modernity. This phenomenon is now attracting increasing attention in different historical specialties. *Being Modern* builds on this recent scholarly interest to explore engagement with science across culture from the end of the nineteenth century to approximately 1940. Addressing the breadth of cultural forms in Britain and the western world from the architecture of Le Corbusier to working class British science fiction, *Being Modern* paints a rich picture. Seventeen distinguished contributors from a range of fields including the cultural study of science and technology, art and architecture, English culture and literature examine the issues involved. The book will be a valuable resource for students and a spur to scholars to further examination of culture as an interconnected web of which science is a critical part and to supersede such tired formulations as Science and culture.

The Anthem Companion to Norbert Elias Stephen Mennell, Alex Law, 2023-08-08. The book presents an authoritative assessment of Norbert Elias 1897-1990. It recognizes Elias as one of the major contributors to the development of sociological tradition in the past century and charts the continuing relevance of his conception of sociology for contemporary society. Only toward the end of his career as an academic did Elias's work begin to attract the attention of English speaking sociologists, historians and scholars of cultural studies. The book provides an authoritative and broad representation of Elias's oeuvre and work inspired by it. While Elias is best known for his major study of *The Civilizing Process*, the reach and subtle depths of Elias's conception of process sociology has been cemented more recently by the English language publication of Elias's collected work of 18 volumes. The baton of process sociology is being passed on to further generations of sociologists. Chapters from leading contributors outline the nature of the sociological practice of Elias and address fundamental questions.

of historical sociology democratization gender racialization processes and embodiment Later chapters highlight the contribution of process sociology for understanding developments in nation state and global sociology criminology art and education

Brand Society Martin Kornberger, 2010-01-21 Brands are a fait accompli they represent a mountain range of evidence in search of a theory They are much exploited but little explored In this book Martin Kornberger sets out to rectify the ratio between exploiting and exploring through sketching out a theory of the Brand Society Most attempts to explain the role of brands focus on brands either as marketing and management tools business perspective or as symptoms of consumerism sociological perspective *Brand Society* combines these perspectives to show how brands have the power to transform both the organizations that develop them and the lifestyles of the individuals who consume them This holistic approach shows how brands function as a medium between producers and consumers in a way that is rapidly transforming our economy and

society That s the bottom line of the Brand Society brands are a new way of organizing production and managing consumption Using an array of practical case studies from a diverse set of organizations this book provides a fascinating account of the way in which brands influence the lives of individuals and the organizations they work in *Painting and Sculpture in Europe, 1880-1940* George Heard Hamilton,1993-01-01 This new edition of a book that offers the best available grounding in its huge subject as the Sunday Times called it includes color plates and a revised and expanded bibliography Professor Hamilton traces the origins and growth of modern art assessing the intrinsic qualities of individual works and describing the social forces in play The result is an authoritative guide through the forest of artistic labels Impressionism and Expressionism Symbolism Cubism Constructivism Surrealism etc and to the achievements of Degas and Cezanne Ensor and Munch Matisse and Kandinsky Picasso Braque and Epstein Mondrian Dali Modigliani Utrillo and Chagall Klee Henry Moore and many other artists in a revolutionary age **The Oxford History of Western Art** Martin Kemp,2000 The Oxford History of Western Art is the new authority on the development of visual culture in the West over the last 2700 years from the classical period to the end of the twentieth century OHWA is an innovative and challenging reappraisal of how the history of art can be presented and understood None of the currently available general histories of art offers the wealth of perspectives and cross media references of this book Through a carefully devised modular structure readers are given insights not only into how and why works of art were created but also how works in different media relate to each other across time Here uniquely is not the simple linear story of art but a rich series of stories told from varying viewpoints The founding principle of the book has been to use carefully selected groupings of pictures to give readers a sense of the visual texture of the various periods and episodes covered The 167 illustration groups supported by explanatory text and picture captions create a sequence of visual tours not merely a procession of individually great works viewed in isolation but juxtapositions of significant images that powerfully convey a sense of the visual environments in which works of art need to be viewed in order to be understood and appreciated The aim throughout has been to make the shape and nature of these visual presentations a stimulating and rewarding experience allowing readers to become active participants in the process of interpretation and synthesis Another key feature of the narrative is the re definition of traditional period boundaries Rather than relying on conventional labels such as Medieval Renaissance Baroque etc five major phases of significant historical change are established that unlock longer and more meaningful continuities The art of classical antiquity from c 600 BC to the fall of Rome in AD 410 The establishment of visual culture in Europe from 410 to 1527 the sack of papal Rome European visual regimes from 1527 to 1770 The era of revolutions 1770 to 1914 Modernism and after 1914 to 2000 This new framework shows how the major religious and secular functions of art have been forged sustained transformed revived and revolutionized over the ages how the institutions of Church and State have consistently aspired to make art in their own image and how the rise of art history itself has come to provide the dominant conceptual framework within which artists

create patrons patronize collectors collect galleries exhibit dealers deal and art historians write The text has been written by a team of 50 specialist authors working under the direction of Professor Martin Kemp one of the UK's most distinguished art historians Whilst bringing their own expertise and vision to their sections each author was also asked to relate their text to a number of unifying themes and issues including written evidence physical contexts patronage viewing and reception techniques gender and racial issues centres and peripheries media and condition the notion of art and current presentations Though the coverage of topics focuses on European notions of art and their transplantation and transformation in North America space is also given to cross fertilizations with other traditions including the art of Latin America the Soviet Union India Africa and Afro Caribbean Australia and Canada Professor Kemp and his team similarly deal generously with the applied arts and reproductive media such as photography and prints The result is a vibrant vigorous and revolutionary account of Western art serving both as an inspirational introduction for the general reader and an authoritative source of reference and guidance for students
