Environmental Policy Processes Surrounding South Africa's Plastic Bags Regulations: Tensions, Debates and Responses in Waste Product Regulation Godwell Nhamo, 2008-01-31 This study was conducted in South Africa South Africa is the first country within the Southern African Development Community to have regulated plastic shopping bags waste through the imposition of both a standard on thickness and a levy Given this scenario the Plastic Bags Regulations present an illustrative case for researching complexity uncertainty and controversies surrounding a new trend in environmental policy making namely waste product regulation The thesis focuses on understanding and investigating tensions debates and responses emerging from the policy process as actors and actor networks put not only the Plastic Bags Regulations into circulation as focal actant token but also other actants and actant networks as well To this end a research question that addressed environmental policies tensions debates and responses that informed the development of South Africa's Plastic Bags Regulations was spelt out The research objectives included the need to

- 1 analyse selected international environmental policy processes surrounding plastic shopping bags litter and waste regulation and how these influenced developments in South Africa
- 2 identify actors actants and actor actant networks that shaped and were being transformed by South Africa's Plastic Bags Regulations and explain the tensions debates and responses arising in the policy processes
- 3 identify environmental policy outputs and assess outcomes emerging from the formulation and implementation of South Africa's Plastic Bags Regulations and
- 4 establish patterns in environmental policy process reforms around South Africa's Plastic Bags Regulations

The language of actors human actants non human and actor actant networks brings to the fore the aspects of processes and relationships that exist around them As such insights from the actor actant network theory AANT were drawn upon to inform the research AANT enquiry framework collapses binaries such as nature society art science structure agency and global local historically associated with a particular type of social theory AANT also denies that purely technical scientific or social relations are possible the notion of quasi objects or token

Data sets were generated following the Plastic Bags Regulations as token actant with time frames ranging from prior to during and after the formulation of the regulations Similarly data analysis drew insights from AANT s four moments of translation namely problematisation intersement enrolment and mobilisation with the intervention theory providing an evaluative perspective that complemented AANT The findings were that after the promulgation of the first draft of the Plastic Bags Regulations in May 2000 tensions emerged around the nature of regulation whether command and control preferred by government or self regulation preferred by industry and labour In this regard the latter group raised concerns about jobs income and equipment loss as well as the need to have a holistic approach to waste management rather than targeting a single product at a time whilst the former maintained that this would not be so As such education awareness and stringent antilitter penalties were proposed by industry and labour as sustainable responses to the problem of plastic shopping bags waste rather than regulation These debates continued and resulted in minor amendments to the original regulations as finalised by Government in May 2002 However industry and labour continued lobbying government resulting in the conclusion of the Plastic Bags Agreement in September 2002 and the ultimate repulsion of the May 2002 regulations in May 2003 As revealed by this research these responses led to broader social responses and further tensions as demand for plastic shopping bags went down by about 80% although an estimated 1000 jobs were lost and a number of companies lost equipment and business with some closing down following the implementation of
