

Figure 8-10 Plot of the off to the Cruise 1

Figure 8-11 Converting true heading to magnetic on the CRP-1

Cruise 2

We depart from the Home Island now being opened only on 1 January at 0700. We hold a compass heading of 034° and a speed of 1.0 knots, until 0800. Then, we hold a compass heading of 201° and a speed of 1.0 until 0830. At 0830 we decide to set a course directly for the Little Harbor and full bore, with a speed of 3.4 knots, using headings as necessary to offset the current. There is no deviation, and variation is 22° E. What headings are required, and what is the ETA at the harbor?

The current curve is shown in Figure 8-12. The time scale runs from right to left. The log is shown in Figure 8-13, and the plot in Figure 8-14.

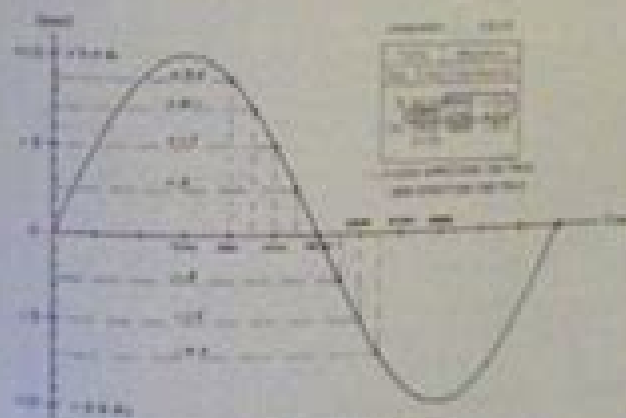

Figure 8-12 Current curve for Cruise 2
