Short History Of Anaesthesia The First 150 Years:

A Short History of Anaesthesia Geoffrey B. Rushman, N. J. H. Davies, Richard Stuart Atkinson, 1996 The exciting developments since the 1840s have been professionally collated in this historical textbook The 1870s saw advances in the surgical care of patients of which anaesthesia played a pre eminent part as did other advances such as antisepsis These were part of an explosion of new science and technology altering forever the direction of progress in medicine *The History of Oncology* D. J. Th. Wagener, 2009-07-13 The story of oncology is not only fascinating but also contains many accounts of dead ends chance discoveries illusions mistakes and disappointments alongside the few successes These words are taken from the introduction to this book The author professor emeritus of Medical Oncology reviews all aspects of the problem of cancer from a historical perspective from the oldest existing records to the latest scientific and medical advances It will interest the many people engaged in the treatment of cancer to read how the current therapeutic methods came about and the book may also provide inspiration for cancer researchers and for all those directly or indirectly involved with cancer The layman looking for background information on a particular treatment may find it useful too The various chapters can be read independently A glossary and a few explanatory diagrams augment the text This book grew out of an invitation the author received to lecture on the history of oncology During his background reading he discovered that there was no single volume dealing with the entire history of the subject Fortunately however a great deal of information could be found here and there in the literature As he read he was struck by the fascinating stories behind many discoveries and felt impelled to put them together in a single comprehensive account The results of his labors are presented in this remarkable volume The author Prof D J Th Theo Wagener was head of the department of Medical Oncology at the Radboud University Nijmegen Medical Centre in the Netherlands from 1982 to 2001 chairman of the Educational Committee of the European Society of Medical Oncology ESMO a member of the Educational Committee of the American Society of Clinical Oncology ASCO and a member of various international scientific working groups mainly of the European Organization for Research and Treatment of Cancer EORTC

The Medical Trade Catalogue in Britain, 1870-1914 Claire L. Jones, 2016-08-05 By the late nineteenth century advances in medical knowledge technology and pharmaceuticals led to the development of a thriving commercial industry The medical trade catalogue became one of the most important means of promoting the latest tools and techniques to practitioners Drawing on over 400 catalogues produced between 1870 and 1914 Jones presents a study of the changing nature of medical professionalism She examines the use of the catalogue in connecting the previously separate worlds of medicine and commerce and discusses its importance to the study of print history more widely [Blessed Days of Anaesthesia](#) Stephanie J. Snow, 2009 Among the great discoveries of the nineteenth century few offer a more fascinating insight into Victorian society than the new science of anaesthesia This vivid and engaging history reveals how the worlds of Victorian medics moralists and clergymen were plunged into turmoil and debate by the discovery and introduction of anaesthetic medicine

Operations Without Pain: The Practice and Science of Anaesthesia in Victorian Britain S. Snow, 2005-12-16 The introduction of anaesthesia to Victorian Britain marked a defining moment between modern medicine and earlier practices This book uses new information from John Snow's casebooks and London hospital archives to revise many of the existing historical assumptions about the early history of surgical anaesthesia By examining complex patterns of innovation reversals debate and geographical difference Stephanie Snow shows how anaesthesia became established as a routine part of British medicine

Anaesthesia and the Practice of Medicine: Historical Perspectives Keith Sykes, John P Bunker, 2021-08-20 Written by two anaesthetists one British and one American this unique book focuses on the transatlantic story of anaesthesia The authors have both worked at the two hospitals where the first general anaesthetics for surgery were given in 1846 Massachusetts General Hospital in Boston Massachusetts and University College Hospital London Each with more than fifty years experience of working in anaesthesia they combine their knowledge and expertise to offer a fresh outlook on the development of anaesthesia through the ages This highly informative and intriguing text details the origins of anaesthesia outlines the different techniques of anaesthesia and traces its progress with illuminating and enlightening commentaries This is a fascinating book which considers the role key figures have played in developing anaesthesia including Queen Victoria William Morris La Condamine Bjorn Ibsen and Henry Beecher Broken down into four sections which are divided into easy to read chapters and filled with top quality photographs this book makes compelling reading It is recommended to all those interested in the history and development of medicine through the ages and is of particular interest to anaesthetists More than just the science of anaesthesia this is the story about the people and personalities who have made anaesthesia what it is today

The Wondrous Story of Anesthesia Edmond I Eger II, Lawrence J. Saidman, Rod N. Westhorpe, 2013-09-14 Edited and written by an international who's who of more than 100 authors including anesthesiologists nurse anesthetists bench scientists a surgeon and representatives of industry this text provides a

comprehensive history of anesthesia unique in its focus on the people and events that shaped the specialty around the world particularly during the past 70 years when anesthesia emerged from empiricism and developed into a science based practice

For Fear of Pain Peter Stanley, 2016-08-09 Oh you hurt me Sir are you going to do it again A patient 1832 For Fear of Pain offers a social history of the operating room in Britain during the final decades of painful surgery It asks profound questions how could surgeons operate upon conscious patients How could patients submit It presents a revisionist view of surgery hygiene nursing military and naval surgery and the introduction of anaesthesia For Fear of Pain seeks to unite the clinical with the human Drawing on fresh evidence it offers powerful insights into the experience of painful surgery It is populated by the characters ambitions and animosities of the great men of contemporary medicine by the young men who grew into surgeons and by the patients whose fortitude was so notable **'Black but Human'** Carmen Fracchia, 2019-10-16 Black but Human is the first study to focus on the visual representations of African slaves and ex slaves in Spain during the Hapsburg dynasty The Afro Hispanic proverb Black but Human is the main thread of the six chapters and serves as a lens through which to explore the ways in which a certain visual representation of slavery both embodies and reproduces hegemonic visions of enslaved and liberated Africans and at the same time provides material for critical and emancipatory practices by Afro Hispanics themselves The African presence in the Iberian Peninsula between the late fifteenth century and the end of the seventeenth century was as a result of the institutionalization of the local and transatlantic slave trades In addition to the Moors Berbers and Turks born as slaves there were approximately two million enslaved people in the kingdoms of Castile Aragon and Portugal The Black but Human topos that emerges from the African work songs and poems written by Afro Hispanics encodes the multi layered processes through which a black emancipatory subject emerges and a black nation forges a collective resistance It is visually articulated by Afro Hispanic and Spanish artists in religious paintings and in the genres of self portraiture and portraiture This extraordinary imagery coexists with the stereotypical representations of African slaves and ex slaves by Spanish sculptors engravers jewellers and painters mainly in the religious visual form and by European draftsmen and miniaturists in their landscape drawings and sketches for costume books

Others and Outcasts in Early Modern Europe Tom Nichols, 2017-07-12 Others and Outcasts in Early Modern Europe is the first book to focus directly on the visual representation of marginal and outcast people in early modern Europe The volume offers a comprehensive and groundbreaking analysis of a wide range of images featuring Jews and Turks roguish beggars syphilitics and plague victims the deserving poor toothpullers beggar philosophers black slaves itinerant actors and street hawkers Its broad geographical and chronological scope allows the reader to build a wider picture of visual strategies and conventions for the depiction of the poor and the marginal as they developed in countries such as Germany the Netherlands Italy Spain Britain and Ireland While such types had often been depicted in earlier centuries the essays show that they came to play a newly significant and formative role in European art between 1500 and 1750 Marking a clear

departure from much previous scholarship on the subject which has tended to view representations of poverty as passive by products of non visual forces these essays place the image itself at the centre of the investigation The studies show that many depictions of socially marginal people operated in essentially hegemonic fashion as a way of controlling or fixing the social and moral identity of those living on the edge At the same time they also reveal the inventiveness and originality of many early modern artists in dealing with this subject matter showing how the sophisticated visuality of their representations could render meaning ambiguous in relation to such controlling discourses

Modern Medicine in the Holy Land

Yaron Perry,Efraim Lev,2007-10-24 Modern Medicine in the Holy Land provides an in depth assessment of the pioneering work of British Hospitals in Palestine in the nineteenth century and finds these institutions made great contributions to the modernization of the country The large numbers of Europeans spearheaded by British missionaries who began to visit Palestine and the Levant brought modern medical practices to the region The driving factor for this change was the medical enterprise of the London Mission and the series of hospitals it established This pioneering initiative led to the development of competition among the Great Powers in Palestine and by the end of the nineteenth century there were scores of medical institutions that were representative of the modern age Using a wide selection of primary sources from both Britain and Israel Perry and Lev bring together for the first time the history of medical service men who fought to improve the health of the inhabitants of the Holy Land under the most difficult conditions of climate and disease

Laughing Gas, Viagra, and Lipitor

Jie Jack Li,2006-09-07 The stories behind drug discovery are fascinating full of human and scientific interest This is a book on the history of drug discovery that highlights the intellectual splendor of discoverers as well as the human frailty associated them History is replete with examples of breakthrough medicines that have saved millions of lives Ether as an anesthetic by Morton penicillin as an antibiotic by Fleming and insulin as an anti diabetic by Banting are just a few examples The discoverers of these medicines are doubtlessly benefactors to mankind for instance without penicillin 75% of us probably would not be alive because some of our parents or grandparents would have succumbed to infections Dr Jack Li a medicinal chemist who is intimately involved with drug discovery has assembled an astounding amount of facts and information behind important drugs through extensive literature research and interviews with many inventors of the drugs including Viagra and Lipitor There have been many myths and inaccuracies associated with those legendary drugs The inventors perspectives afforded this book an invaluable accuracy and insight because history is not history unless it is true The text is supplemented by many anecdotes pictures and postage stamps Both

specialist and layman will find *Laughing Gas Viagra and Lipitor* informative and entertaining Students in chemistry pharmacy and medicine workers in healthcare and high school science teachers will find this book most useful *55th Anniversary of the German Society for Anaesthesiology and Intensive Care* Jürgen Schüttler,2012-08-16 This book presents to all those who are interested in the history of Anaesthesiology historical details and information on the development of anaesthesiology in Germany and the remarkable growth of our Society At the founding session of the German Society of Anaesthesia in Munich on 10 April 1953 42 persons had signed the founding documents Today about 12 000 anaesthetists are members of the German Society of Anaesthesiology and Intensive Care Medicine making the DGAI the biggest national society within ESA Well known are the pioneering contributions of German scientists and surgeons to the development of general regional and local anaesthesia during the 19th and the beginning of the 20th centuries But less known outside Germany are the reasons for the delayed evolution of anaesthesiology as a specialty of its own in German medicine far later than in the UK Scandinavia or the USA In this book you will find answers to this question and detailed information on the successful evolution of anaesthesiology especially at the Faculties of Medicine at German universities *Disability and Technology* Alan Roulstone,2016-06-11 This book brings together formally disparate literatures and debates on disability and technology in a way that captures the complex interplay between the two Drawing on disability studies technology studies and clinical studies the book argues that interdisciplinary insights together provide a more nuanced and less stylized picture of the benefits and barriers in disability and technology Drawing on a breadth of empirical studies from across the globe a picture emerges of the complex and multi directional interplay of technology and disability Technology is neither inherently enabling or disabling but fundamentally shaped by the social dynamics that shape their design use and impact **Eponyms and Names in Obstetrics and Gynaecology** Thomas F. Baskett,2019-01-24 Few specialties have a longer or richer eponymous background than obstetrics and gynaecology Eponyms add a human side to an increasingly technical profession and represent the historic tradition and language of the speciality This collection aims to perpetuate the names and contributions of pioneers and offer introductory profiles to the founders in whose steps we follow This third edition includes 26 new entries as well as expanded detail illustration and quotation for existing entries Biographical data and historical and medical context are discussed for each of the 391 names with reference to 34 countries reflecting the field s far reaching origins More than 1700 original references feature alongside an extensive bibliography of more than 2500 linked references to assist readers searching for more detailed information This is a volume for physicians midwives medical historians medical ethicists and all those interested in the history and evolution of obstetrical and gynaecological treatment Clinical Pain Management Second Edition: Acute Pain Pamela Macintyre,David Rowbotham,Suellen Walker,2008-09-26 Acute Pain brings coverage of this diverse area together in a single comprehensive clinical reference from the basic mechanisms underlying the development of acute pain to the various treatments that can be applied to control it in different clinical settings Much

expanded in this second edition the volume reflects the huge advances that continue to be made in acute pain management Part One examines the basic aspects of acute pain and its management including applied physiology and development neurobiology the drugs commonly used in therapy assessment measurement and history taking post operative pain management and its relationship to outcome and preventive analgesia Part Two reviews the techniques used for the management of acute pain Methods of drug delivery and non pharmacological treatments including psychological therapies in adults and children and transcutaneous electrical nerve stimulation are considered here Part Three looks at the many clinical situations in which acute pain can arise and the methods of treatment that may be suitable in each circumstance whether the patient is young or old has pain due to surgery trauma medical illness or childbirth or is undergoing rehabilitation Issues specific to the management of acute pain in the developing world are also covered here
