A Short History of Natural Science Arabella Burton Buckley,1905 A Short History of Scientific Thought John

Henry, 2011-11-28 An essential introductory textbook that shows students how science came to be such an important aspect of modern culture Lively and readable it provides a rich historical survey of the major developments in scientific thought from the Ancient Greeks to the twentieth century John Henry also explains how new scientific theories have emerged and analyses their impact on contemporary thinking This is an ideal core text for modules on the History of Science Medicine and Technology or the History and Philosophy of Science or a supplementary text for broader modules on European History or Intellectual History which may be offered at the upper levels of an undergraduate History Philosophy or Science degree In addition it is a crucial resource for students who may be studying the history of science for the first time as part of a taught postgraduate degree in European History Intellectual History Science or Philosophy A Short History of Natural Science Arabella Burton Buckley, 1893 A Short History of Atheism Gavin Hyman, 2010-09-30 The last few years have seen a remarkable surge of popular interest in the topic of atheism Books about atheism by writers like Richard Dawkins and Christopher Hitchens have figured prominently in bestseller lists and have attracted widespread discussion in the media The ubiquity of public debates about atheism especially in conscious opposition to the perceived social threat posed by faith and religion has been startling However as Gavin Hyman points out despite their prevalence and popularity what often characterises these debates is a lack of nuance and sophistication They can be shrill ignorant of the historical complexity of debates about belief and tend to lapse into caricature What is needed is a clear and well informed presentation of how atheistic ideas originated and developed in order to illuminate their contemporary relevance and application That task is what the author undertakes here Exploring the rise of atheism as an explicit philosophical position notably in the work of Denis Diderot Hyman traces its development in the later ideas of Descartes Locke and Berkeley Drawing also on the work of contemporary scholars like Amos Funkenstein and Michael J Buckley the author shows that since in recent theology the concept of God which atheists negate is changing the triumph of its advocates may not be quite as unequivocal as Hitchens and Dawkins would have us believe A Short History of Natural Science Arabella B. Buckley, 2015-06-25 Excerpt from A Short History of Natural Science And of the Progress of Discovery From Time of the Greeks to the Present Day for the Use of Schools and Young Persons It is not without some anxiety that I offer this little work to the public for it is I believe the first attempt which has been made to treat the difficult subject of the History of Science in a short and simple way Its object is to place before young and unscientific people those main discoveries of science which ought to be known by every educated person and at the same time to impart a living interest to the whole by associating with each step in advance some history of the men who made it About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www forgottenbooks com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works A Short History & Description of Denstone College, 1900 Illustrated Catalogue of Books, Standard and Holiday McClurg, Firm, Booksellers, Chicago, 1902 Geological glossary, ed. by R.D.
