Jurisdiction in International Fisheries Law. Evolving Trends and New Challenges SIMONE

VEZZANI,2020-07-24 Through the ages international fisheries law has been characterized by a dialectic between flag States and coastal States The institution of the Exclusive Economic Zone marked a milestone in the seaward extension of coastal States powers However it has not brought the expected results and coastal States have to a great extent failed to act as trustees of global fisheries An emerging role in the fight against Illegal Unreported and Unregulated fishing has been played by States in their quality as States of active nationality port States and market States Multiple jurisdictional claims raise a number of complexities relating inter alia to double criminality or respect for legality and ne bis in idem principles in the case of prosecution of fisheries crimes This book investigates the extent and nature of State jurisdiction prescriptive adjudicative and enforcement in fisheries matters and related problems of coordination It also discusses the role of Regional Fisheries Management Organizations in regulating fishing activities in different marine areas and in delimiting the States respective spheres of power The entire investigation is functional to critically assessing to what extent the emergence of a new jurisdictional balance pursues the interests of States acting uti singuli or the general interests of the international community
