...Advanced Geography Charles Francis King, 1910 **On Some Methods of Teaching Geography**, 1896 **Thinking with Maps** Bertram C. Bruce, 2021-05-15 A 2022 Choice Reviews Outstanding Academic Title Spatial reasoning which promises connection across wide areas is itself ironically often not connected to other areas of knowledge Thinking with Maps Understanding the World through Spatialization addresses this problem developing its argument through historical analysis and cross disciplinary examples involving maps The idea of maps here includes traditional cartographic representations of physical environments but more broadly encompasses the wide variety of ways that visualizations are used across all disciplines to enable understanding to generate new knowledge and to effect change The idea of thinking with maps is also used broadly Maps become not simply one among many items to learn about but indispensable tools for thinking across every field of inquiry in a way similar to that of textual and mathematical language Effective use of maps becomes a way to make knowledge much as writing or mathematical exploration not only displays ideas but also creates them The book shows that maps for thinking are not just a means to improve geographic knowledge as valuable as that may be Instead they provide mechanisms for rejuvenating our engagement with the world helping us to become more capable of facing our global challenges This book has a broader aim It is fundamentally about general principles of how we learn and know It calls for a renewed focus on democratic education in which both the means and ends are democratic Education just as the political realm should follow Dewey's dictum that democratic ends need democratic methods for their realization Maps and mapping are invaluable in that endeavor **The Scope of School Geography** Robert Neal Rudmose Brown, Osbert John Radcliffe Howarth, John McFarlane, 1922 **Progressive Education**, 1928 Vol 31 33 1953 54 1956 one issue designated as yearbook number *Understanding and Teaching Primary Geography* Simon Catling, Tessa Willy, 2018-06-18 This book outlines how good teaching of primary geography can extend children's world awareness and help them make connections between their environmental and geographical experiences Chapters offer guidance on important learning and teaching issues as well as the use and creation of resources from the school environment to the global context It covers all the key topics in primary geography including understanding places physical and human geography environmental sustainability learning outside the classroom global issues citizenship and social justice Summaries classroom examples and practical and reflective tasks are included throughout to foster understanding and support the

effective teaching of primary geography *Learning Primary Geography* Susan Pike, 2015-12-22 Learning Primary Geography Ideas and inspiration from classrooms celebrates children's learning in primary geography It is a book for all student and practising teachers who would like children to learn about their world in an enjoyable and stimulating way Every page presents inspiring examples of children's learning and explains how and why creative approaches such as enquiry learning learning outside the classroom and using imaginative resources work so well in primary geography Using illustrated case studies from a range of schools and classrooms each chapter showcases the fantastic work all children can do in primary geography The book explores a wide variety of geographical learning with chapters focusing on key aspects of the subject including primary geography through the school grounds topical geography through issues and events learning about places in primary geography children's agency and action through primary geography Throughout the chapters the role of primary geography in helping children develop all types of literacies including spatial critical and digital literacies is explored Written by a highly experienced teacher and lecturer in education Learning Primary Geography is underpinned and illustrated by examples from a wide range of primary classrooms It will be a source of support guidance and inspiration for all those teaching geography in the primary school *Making Geography Matter* Noel Castree, Trevor Barnes, Jennifer Salmond, 2025-02-28 What is the purpose of Geography What do geographers study and why How do they seek to shape the world they interrogate This book addresses these questions by examining the lives and works of individual geographers both past and present Like all disciplines Geography is no more nor less than the collective endeavours of researchers and teachers operating in specific contexts The contexts both shape and are shaped by these individuals This book's biographical and autobiographical chapters transport readers to the times and places where geographers have sought to make Geography matter The result is a more vivid grounded understanding of the discipline than the many high level surveys of geographic thought paradigms currently written for university students This book's accessible essays each conclude with a study task Making Geography Matter is aimed at university students and their teachers who wish to understand the goals history and evolving practice of Geography It provides an alternative perspective both concrete and engaging to the many student focussed texts that map out numerous isms and ologies **Economica** ,1924
