Mass Audience Rediscovering The Dominant Model:

The Mass Audience James Webster, Patricia F. Phalen, 2013-11-05 In the early 20th century a new and distinctive concept of the audience rose to prominence The audience was seen as a mass a large collection of people mostly unknown to one another that was unified through exposure to media This construct offered a pragmatic way to map audiences that was relevant to industry government and social theorists In a relatively short period of time it became the dominant model for studying the audience Today it is so pervasive that most people simply take it for granted Recently media scholars have reopened inquiry into the meaning of audience They question the utility of the mass audience concept characterizing it as insensitive to differences among audience members inescapably bound up with discredited notions of mass society or serving only a narrow set of industrial interests The authors of this volume find that these assertions are often false and unwarranted either by the historical record or by contemporary industry practice Instead they argue for a rediscovery of the dominant model by summarizing and critiquing the very considerable body of literature on audience behavior and by demonstrating different ways of analyzing mass audiences Further they provide a framework for understanding the future of the audience in the new media environment and suggest how the concept of mass audience can illuminate research on media effects cultural studies and media policy

News at Work Pablo J. Boczkowski,2010-09-15 Before news organizations began putting their content online people got the news in print or on TV and almost always outside of the workplace But nowadays most of us keep an eye on the headlines from our desks at work and we have become accustomed to instant access to a growing supply of constantly updated stories on the Web This change in the amount of news available as well as how we consume it has been coupled with an unexpected development in editorial

labor rival news organizations can now keep tabs on the competition and imitate them resulting in a decrease in the diversity of the news. Peeking inside the newsrooms where journalists create stories and the work settings where the public reads them, Pablo J. Boczkowski reveals why journalists contribute to the growing similarity of news even though they dislike it and why consumers acquiesce to a media system they find increasingly dissatisfying. Comparing and contrasting two newspapers in Buenos Aires with similar developments in the United States, *News at Work* offers an enlightening perspective on living in a world with more information but less news. *Research in Media Promotion* Susan Tyler Eastman, 2000-08-01 Eastman has

assembled this exemplary volume to spotlight media promotion and to examine current research on the promotion of television and radio programs. The studies included here explore various types of promotion and use widely differing methods and approaches providing a comprehensive overview of promotion research activities. Chapters include extensive literature reviews, original research, and discussion of research questions for subsequent study. *Research in Media Promotion* serves as a benchmark for the current state of promotion research and theory and establishes the role of promotion as a primary factor affecting audience size. Appropriate for coursework and study in programming, marketing, research methods, management, and industry processes and practices, this volume offers agenda items for future study and is certain to stimulate new research ideas.

The range of media effects addressed herein includes news diffusion, learning from the mass media, socialization of children and adolescents, influences on public opinion and voting, and violent and sexually explicit media content. The text examines relevant research done in these areas and discusses it in a thorough and accessible manner. It also presents a variety of theoretical approaches to understanding media effects, including psychological and content-based theories. In addition, it demonstrates how theories can guide future research into the effects of newer mass communication technologies. The second edition includes a new chapter on effects of entertainment, as well as text boxes with examples for each chapter. Discussion of new technology effects is integrated throughout the chapters, expanded pedagogy, and updates to the theory and research in the text. These features enhance the already in-depth analysis. *Media Effects and Society* provides

The News and Public Opinion Maxwell McCombs, 2011-10-10 The daily news plays a major role in the continuously changing mix of thoughts feelings and behavior that defines public opinion *The News Public Opinion* details these effects of the news media on the sequence of outcomes that collectively shape public opinion beginning with initial attention to the various news media and their contents and extending to the effects of this exposure on the acquisition of information formation of attitudes and opinions and to the consequences of all these elements for participation in public life Sometimes called the hierarchy of media effects this sequence of outcomes describes the communication process involved in the formation of public opinion Although the media landscape is undergoing rapid change key elements remain the same and *The News Public Opinion* emphasizes these basic principles of communication established over decades of empirical social science investigations into the impact of mass communication on public opinion The primary audience for this book is students both advanced undergraduates and graduate students as well as members of the general public who want to

understand the role of the news media in our civic life *The Empire of Mind* Michael Strangelove, 2005-12-15 Where many critics see the Internet as an instrument of corporate hegemony Michael Strangelove sees something else an alternative space inhabited by communities dedicated to anarchic freedom culture jamming alternative journalism and resistance to authoritarian forms of consumer capitalism and globalization In *The Empire of Mind* Dr Strangelove the scholar Canadian Business referred to as the acknowledged dean of Internet entrepreneurs and Wired called the Canadian guru of Internet advertising presents the compelling argument that the Internet and new digital communication technology actually undermine the power of capital producing an alternative symbolic economy Strangelove contends that the Internet breaks with the capitalist logic of commodification and that while television produces a passive consumer audience Internet audiences are more active creative and subversive Writers activists and artists on the Internet undermine commercial media and its management of consumer behaviour a behaviour that is challenged by the Web's tendency toward the disintegration of intellectual property rights Case studies describe the invention of new meaning given to cultural and consumer icons like Barbie and McDonald's and explore how novel modes of online news production alter the representation of the world as it is produced by the mainstream corporate press In the course of exploring new media *The Empire of Mind* also makes apparent that digital piracy will not be eliminated The Internet community effectively converts private property into public thereby presenting serious obstacles for the management of consumer behaviour and significantly eroding brand value Much to the dismay of the corporate sector online communities are disinterested in the ethics of private property In fact the entire philosophical framework on which capitalism is based is threatened by these alternative means of cultural production
