The Unfinished Revolution Michael L. Dertouzos, 2001-01-09 If our cars were as difficult to drive as our computers are to operate they would never leave the garage Yet everyday we put up with infuriating complications and incomprehensible error messages that spew forth from our technology software upgrades crash our machines Web sites take forever to download e mail overwhelms us We spend endless time on the phone waiting for automated assistance In effect we continue to serve our machines lowly needs instead of insisting that they serve us a situation that will only get worse as millions of new mobile devices arrive on the scene Our world doesn't have to be this way It shouldn't be this way Wouldn't it be great if using your computer was as effortless as steering your car

In *The Unfinished Revolution* Michael Dertouzos introduces human centered computing a radical change in the way we fashion and use computer systems that will ultimately make this goal possible The Unfinished Revolution is nothing less than an inspired manifesto for the future of computing Dertouzos's vision will change how businesses organizations and governments work with each other and how individuals interact It represents the dawn of a new era in information technology Human centered computing goes well beyond the empty promises of user friendly interfaces At its foundation are five key technologies that will dramatically amplify our human capabilities natural interaction automation individualized information access collaboration and customization Human centered systems will understand us when we speak to them will do much of our routine brainwork for us will get us the information we want when and where we want it will help us work with other people across space and time and will adapt on their own to our individual needs and desires By exploiting these five emerging technologies in combination in our professional specialties and in our personal lives we will see a vast increase in our productivity and a marked change in the ways we live and work Human centered technologies will make computers simpler more natural and more useful to us The collective benefits of human centered machines will give ordinary people capabilities that go beyond those enjoyed today by the most privileged Human centered systems will give us the gas pedal brakes and steering wheel of the Information Age

When can all this happen Dertouzos says the time to start is now You can begin simplifying and improving your relationship with computers today Dertouzos offers dozens of scenarios that illustrate the potential of human centered computing as well as a preview of the MIT Oxygen project a prototype now under development that aims to make pervasive human centered

computing a reality Dertouzos also provides the new century's first glimpse of how upcoming information technology advances will significantly improve our lives and truly revolutionize our relationships with the computer This is a book for everyone professionals and nonspecialists who yearn for machines that live up to the grand promise of the Information Revolution fulfilling real human needs with greater simplicity that still lingers unfulfilled The Unfinished Revolution is for those who want to enhance their computer productivity and fun in short for every person who wants to do more by doing less
