Radical Education Reforms:

Radical Education Reforms Chester E. Finn (Jr.), Herbert J. Walberg, 1994 Presents a diverse set of unusual and significant departures from customary policies and practices These radical ideas range from calling for national standards to enacting statewide legislative initiatives to implementing decentralized local initiatives such as charter schools local school councils and privatization A considerable challenge is presented not only to the status quo but also to the planners of the many less radical reforms of the past decade

Radical Reforms Christopher Chapman, Helen Gunter, 2008-12-09 Focusing on education as a major area of public policy this book explores a decade of rapid and intensive modernization and draws out the lessons for those concerned with developing education systems across the globe

Radical Education Reform Janet Lea Burns, 2010 John Dewey, Liang Shuming, and China's Education Reform Huajun Zhang, 2013-04-19 This book explores the central question of how to cultivate a continued sense of self in the radically changing Chinese society a question that is highly related to the current ongoing educational reform If education cannot respond to the problem of students disconnection from the changing society learning cannot truly happen in school and the reform will fail Zhang suggests a philosophy of education that highlights the cultivation of students unique but inclusive individuality so that students learn how to nurture their own mind in this profoundly changing society rather than becoming empty and lost The discussion of this proposed question is inspired by the thoughts of the American pragmatist John Dewey and Chinese Confucian scholar Liang Shuming It is not the author's intention to have a pure philosophical discussion but rather to refer to their philosophies to help answer the practical question of cultivating individuality in an educational setting during this period of China's modern transition

The Three Waves of Reform in the World of Education 1918 - 2018 Ami Volansky, 2023-01-01 This book reviews one hundred years of educational reforms worldwide Characterized by a tension between governing public and professional forces the waves of educational reform reflect myriad efforts to define and fulfill professional and public expectations for the world of education The first wave of reform based on progressive ideals spread across the globe after World War I striving to place the student at the center of the education process and respond to the diverse needs of children and youth in a world that included massive population shifts The second wave nearly obliterated the ideals of the progressive movement that had prevailed for sixty years Drawing its principles from the business world the second wave imposed competition uniform standards and measurable outputs on students teachers and schools even at the cost of harming at risk populations and encouraging the infiltration of private sector values into public education systems The third wave was launched at the turn of the twenty first century Seeking to adjust instructional methods to modern reality this reform rejected standardized curricula in favor of developing skills such as independent thinking curiosity innovation collaboration among learners and the ability to mine and

Giroux, 1984-10 This book lays bare the ideological and political character of the positivist rationality that has been the primary theoretical underpinning of educational research in the United States. These assumptions have expressed themselves in the form and content of curriculum classroom social relations classroom cultural artifacts and the experiences and beliefs of teachers and students. Have existing radical critiques provided the theoretical building blocks for a new theory of pedagogy? The author attempts to move beyond the abstract negative characteristics of many radical critiques which are often based on false dualisms that fail to link structure and intentionality content and process ideology and hegemony etc. He also is critical of the over determined models of socialization and the abstract celebration of subjectivity that underlies much of the false utopianism of many radical perspectives. Professor Giroux begins to lay the theoretical groundwork for developing a radical pedagogy that connects critical theory with the need for social action in the interest of individual freedom and social reconstruction. Author note Henry A. Giroux is Assistant Professor of Education at Boston University. He is the co editor of Curriculum and Instruction Alternatives in Education and The Hidden Curriculum and Moral Education.
