geographical and social conditions The STS angle permits some surprising yet extremely convincing conclusions which are of use not only for a range of practitioners but also to scholars interested in the social shaping processes and the consequences of urban artefacts The authors argue that although architecture and urban design is clearly not the sole cause of conflict and polarisation neither is it completely innocent Conversely it cannot be the silver bullet to solve related problems and to create community cohesion However the materiality of our cities must not be ignored in fact it can and should be enrolled in our efforts The book contains detailed descriptions of such positive cases as inspiration for practitioners as diverse as policy makers architects urban designers planners community workers consultants or police officers The City and Radical Social Change Dimitrios I. Roussopoulos,1982 **Radical Urban Political Economy** Charles Hoch,Joel Friedman,1980

*Restrained Radicals* Fred Paxton,2023-08-10 The entry of populist radical right parties into positions of power has generated anxious debate regarding the potential consequences for liberal democracy Their activities in local government however have been largely overlooked This comparative analysis of populist radical right led local governments in Western Europe makes an important contribution to a crowded field through the study of so far uncharted terrain Comparing cases in Austria France Italy and Switzerland Fred Paxton details the extent of ideological impact in local politics and the various restraints that are placed on their radicalism Drawing from a wealth of new data he explains the varying degree of radicalism with recourse to two principal factors the constraints of the local government institutional setting and the national party leaders strategies towards the local arena This book broadens our understanding of populist radical right parties in Western Europe and the sub national processes through which they are developing **Corruption in Urban Politics and Society, Britain 1780-1950** James R. Moore,John Smith,2007-01-01 This collection of eleven essays looks at issues of corruption in urban Britain from 1780 1950 The contributions are drawn from a wide range of scholarly and disciplinary backgrounds and provide a broad analysis of the phenomenon of corruption assessing how debates about corruption arose the narratives used to criticise established modes of public conduct and their consequences for urban leadership **The Transformation of Urban Liberalism** James Moore,2017-11-30 The Transformation of Urban Liberalism re evaluates the dramatic and turbulent political decade following the Third Reform Act and questions whether the Liberal Party s political heartlands the urban boroughs really were in decline In contrast to some recent studies it does not see electoral reform the Irish Home Rule crisis and the challenge of socialism as representing a fundamental threat to the integrity of the party Instead this book illustrates using parallel case studies how the party gradually began to transform into a social democratic organisation through a re evaluation of its role and policy direction This process was not one directed from the centre despite the important personalities of Gladstone and Rosebery but rather one heavily influenced by grass roots politics Consequently it suggests that late Victorian politics was more democratic and open than sometimes thought with leading urban politicians forced to respond to the demands of party activists Changes in the structure of urban rule produced new policy outcomes and

brought new collectivist forms of New Liberalism onto the political agenda Thus it is argued that without the political transformations of the decade 1885 1895 the radical liberal governments of the Edwardian era would not have been possible

*The Radical Homeowner* Ian C. Winter,2021-03-23 Originally published in 1994 this book provides an important contribution to contemporary housing debates as well as clear examples of the use of qualitative data in causal analysis Based on 3 original Australian case studies and a range of international data this book demonstrates that the interests and meanings of home ownership can lead home owners into radical courses of social action that oppose the status quo despite national governments having sponsored a remarkable growth in home ownership to promote a loyal citizenship and political stability

*Radical Pedagogies* Beatriz Colomina,Ignacio G. Galán,Evangelos Kotsioris,Anna-Maria Meister,2022-05-31 Experiments in architectural education in the post World War II era that challenged and transformed architectural discourse and practice In the decades after World War II new forms of learning transformed architectural education These radical experiments sought to upend disciplinary foundations and conventional assumptions about the nature of architecture as much as they challenged modernist and colonial norms decentered building imagined new roles for the architect and envisioned participatory forms of practice Although many of the experimental programs were subsequently abandoned terminated or assimilated they nevertheless helped shape and in some sense define architectural discourse and practice This book explores and documents these radical pedagogies and efforts to defy architecture s status quo The experiments include the adaptation of Bauhaus pedagogy as a means of unlearning under the conditions of decolonization in Africa a movement to design for every body including the disabled by architecture students and faculty at the University of California Berkeley the founding of a support network for women interested in the built environment regardless of their academic backgrounds and a design studio in the USSR that offered an alternative to the widespread functionalist approach in Soviet design Viewed through their dissolution and afterlife as well as through their founding stories these projects from the last century raise provocative questions about architecture s role in the new century

**Black Social Capital** Marion Orr,1999

Deindustrialization white flight and inner city poverty have spelled trouble for Baltimore schools Marion Orr now examines why school reform has been difficult to achieve there revealing the struggles of civic leaders and the limitations placed on Baltimore's African American community as each has tried to rescue a failing school system Examining the interplay between government and society Orr presents the first systematic analysis of social capital both within the African American community black social capital and outside it where social capital crosses racial lines Orr shows that while black social capital may have created solidarity against white domination in Baltimore it hampered African American leaders capacity to enlist the cooperation from white corporate elites and suburban residents needed for school reform Orr examines social capital at the neighborhood level in elite level interactions and in intergovernmental relations to argue that black social capital doesn't necessarily translate into the kind of intergroup coalition needed to bring about school reform He also includes an extensive historical survey of the black community showing how distrust engendered by past black experiences has hampered the formation of significant intergroup social capital The book features case studies of school reform activity including the first analysis of the politics surrounding Baltimore's decision to hire a private for profit firm to operate nine of its public schools These cases illuminate the paradoxical aspects of black social capital in citywide school reform while offering critical perspectives on current debates about privatization site based management and other reform alternatives Orr's book challenges those who argue that social capital alone can solve fundamentally political problems by purely social means and questions the efficacy of either privatization or black community power to reform urban schools **Black Social Capital** offers a cogent conceptual synthesis of social capital theory and urban regime theory that demonstrates the importance of government politics and leadership in converting social capital into a resource that can be mobilized for effective social change
