BALSA LIVES! If God had intended man to build model airplanes with fiberglass, there would be fiberglass trees. In this time when EPP (expanded polypropylene)-foam sailplanes take the lion's share of the market and molded fiberglass sailplanes define one extreme of speed, strength, and craftsmanship, balsa bashers are still out there designing, modifying, and flying stick-built Slope jets.

Remembering that designing and building are major components of the hobby and that some glider fliers prefer working with wood rather than resin, I'm pleased to report that wooden Slope sailplanes are still being designed and built, and they look good and fly well.

Eric Molestead (emolestead@aeromt.com) of Vancouver, Washington, sent photos and an enthusiastic description of his early flights with his Lear Jet, modified from the Great Planes power kit. Eric explains his kit modifications in the following.

Walt Bub's original-design balsa-frame F9F Panther Slope jet flies gracefully over Lake Ontario in upstate New York.

Bill Griggs (Canastota NY) flew Walt Bub's Panther for 45 minutes at Lake Ontario and learned that it flies well.
