Radioimmunoassay Of Steroid Hormones

Alvin M. Kaye, Myra Kaye

Radioimmunoassay Of Steroid Hormones:

Radioimmunoassay of Steroid Hormones Derek Gupta, 1980 Methods of Hormone Radioimmunoassay Bernard Jaffe, 2012-12-02

Methods of Hormone Radioimmunoassay Second Edition is a compilation of radioimmunoassay techniques for the quantification of hormones. Various kinds of hormones are considered namely intracellular messengers hypothalamic and pineal hormones pituitary hormones thyroid and parathyroid hormones renal hormones hormones of the gastrointestinal tract pancreatic hormones steroid hormones uterine and placental hormones vasoactive peptide hormones and growth factors. The corresponding method of radioimmunoassay for each hormone is described. This book is comprised of 49 chapters and begins with a discussion on the radioimmunoassay of cyclic adenosine 3',5'-monophosphate cAMP and cyclic guanosine 3',5'-monophosphate cGMP together with problems related to measuring both compounds. The reader is then introduced to prostaglandins and prostaglandin metabolites thyrotropin releasing hormone and gonadotropin releasing hormone. Pituitary gonadotropins prolactin and thyrotropin are also discussed. The remaining chapters deal with hormones of the gastrointestinal tract pancreatic hormones steroid hormones and growth factors. This monograph is intended for both clinicians and investigators interested in methods of hormone radioimmunoassay.

Radioimmunoassay of Steroid Hormones Ulf-Håkan Stenman, 1979 **Immunologic Methods in Steroid Determination** Fernand G. Péron, Burton V. Caldwell, 2012-12-06

The two main goals of the symposium upon which this volume is based were 1 to cement together knowledge presently available in the field of antibodies to steroids and obtainable only under separate covers in different journals and books and 2 to present new data which could lead to a more complete understanding of physiologic phenomena like those occurring during the menstrual cycle or to the elucidation of the mechanisms involved in steroid protection interaction or to the practical application of immunologic techniques to measurements of steroid hormones. These techniques are extremely sensitive and can measure levels of steroid on the same order of magnitude as the radioisotope methods. However the latter are much more laborious and costly which limits their use in many cases to the research laboratory. But the immunologic techniques generally classified as radioimmunoassay are fraught with difficulties and problems which must be overcome. Fortunately perhaps the subject of immunologic techniques as applied to steroid determination is the child of radioimmunoassay of proteins so to speak. Many of the problems which confront the former have been resolved in the latter instance. Thus we are in an advantageous position because we are aware of the biologic and technical problems of the earlier radioimmunoassay techniques. Similar experiences have been reported in the book about the use of immunologic techniques for determination of steroid hormones.

Hormonal Steroids V. H. T. James, J. R. Pasqualini, 2013-10-22

Hormonal Steroids contains the plenary and symposium lectures delivered to the Fifth International Congress on Hormonal Steroids held at New Delhi on October 30 to November 4 1978. The plenary lectures include biochemical actions of trophic hormones and steroids on steroid production and spermatogenesis in testes chemical reactions of steroids which imitate the selectivity of enzymatic

transformations and human chorionic gonadotrophin and ovarian and placental steroidogenesis Symposia papers comprise of water soluble steroidal anesthetics quality control of radioimmunoassay of hormones in reproductive physiology automation of steroid radioimmunoassay for clinical and research purposes non radioisotopic homogeneous steroid immunoassays mechanisms involved in the regulation of steroid receptor levels and metabolic effects of corticosteroid therapy in post menopausal women

An Introduction to Neuroendocrinology Richard E. Brown,1994-01-27 This book is designed as an introductory text in neuroendocrinology the study of the interaction between the brain and endocrine system and the influence of this on behaviour The endocrine glands pituitary gland and hypothalamus and their interactions and hormones are discussed The action of steroid and thyroid hormone receptors and the regulation of target cell response to hormones is examined The function of neuropeptides is discussed with respect to the neuroendocrine system and behaviour The neuroimmune system and lymphokines are described and the interaction between the neuroendocrine and neuroimmune systems discussed Finally methods for studying hormonal influences on behaviour are outlined Each chapter has review and essay questions designed for advanced students and honours or graduate students with a background in neuroscience respectively
