Ward Whicker, 2012-12-06 During the twenty years the authors have been associated with the field of radiation ecology there has been a diversified and increasing use of radionuclides in applied and basic biological research Prior to the advent of the atomic age in the 1940s the use of radionuclides as tracers was initiated and following that period one observed a dramatically increased use in many disciplines Concurrent with this increase there appeared many books and articles on radionuclide tech niques useful to biologists in general Although only a few ecological applications were evident in these early years ecologists were quick to see the opportunities available in their field In the United States major centers for such activities included Oak Ridge National Laboratory and the U S Atomic Energy Com mission s Savannah River Plant At Oak Ridge National Laboratory Dr Stanley I Auerbach director of ecological activities encouraged with remarkable suc cess the use of tracers by his associates

Dr Eugene P Odum had the foresight to see that radionuclide tracers provided the means to solve many problems of interest to ecologists Consequently his research included some unique radio tracer applications at the Savannah River Plant In addition he encouraged others involved in ecological activities at the Savannah River Plant to do likewise Ecologists such as Dr Robert C Pendleton at the U S Atomic Energy Com mission s Hanford Works applied radionuclides in their research To these early investigators and to those who followed we owe the oppportunity to write this book Laboratory Techniques in Chemistry and Biochemistry Paul Sidney Diamond, Ronald Francis Denman, 1973 Basic materials and methods Purification Electrochemistry Inorganic analysis Elementary organic analysis Absorptiometry Chromatography and electrophoresis Automation in the laboratory Some special techniques Biochemical laboratory apparatus and methods An introduction to biochemical compounds Enzymes U.S. Environmental Protection Agency Library System Book Catalog Holdings as of July 1973 United States.
