Ruin Nation Megan Kate Nelson,2012-05-15 During the Civil War cities houses forests and soldiers bodies were transformed into dead heaps of ruins novel sights in the southern landscape How did this happen and why And what did Americans northern and southern black and white male and female make of this proliferation of ruins Ruin Nation is the first book to bring together environmental and cultural histories to consider the evocative power of ruination as an imagined state an act of destruction and a process of change Megan Kate Nelson examines the narratives and images that Americans produced as they confronted the war s destructiveness Architectural ruins cities and houses dominated the stories that soldiers and civilians told about the savage behavior of men and the invasions of domestic privacy The ruins of living things trees and bodies also provoked discussion and debate People who witnessed forests and men being blown apart were plagued by anxieties about the impact of wartime technologies on nature and on individual identities The obliteration of cities houses trees and men was a shared experience Nelson shows that this is one of the ironies of the war s ruination in a time of the most extreme national divisiveness people found common ground as they considered the war s costs And yet very few of these ruins still exist suggesting that the destructive practices that dominated the experiences of Americans during the Civil War have been erased from our national consciousness

An efficient transportation system reduces the cost of distance by moving people and goods from their origins to their destinations as cheaply quickly and safely as possible By enabling individuals and firms to be more productive transportation provides the foundation for the development and growth of industries and an entire economy Clifford Winston Jia Yan and Associates argue that competition and innovation are the key drivers of an efficient transportation system The authors provide new evidence that transportation deregulation and privatization that spur additional competition among carriers and infrastructure providers as well as new innovations that create autonomous transportation services have the potential to rid the US transportation system of its major inefficiencies and revitalize the nation
