Rails To The Tableland:

Rails to the Tableland Ray F. Ellis, 1976 **Shared Landscapes** Rodney Harrison, 2004 The heritage of the pastoral industry stands as an integral symbol of identity for rural communities both black and white in New South Wales Modern changes in pastoral land management infrastructure and technology combined with broader land use changes and increased community interest in the conservation and rehabilitation of former grazing lands has meant that many former pastoral properties have been abandoned or acquired for other uses Tracking the history of these land use changes **Shared Landscapes** presents new ways of understanding historic heritage in settler societies through cross disciplinary case studies that examine the heritage of the pastoral industry in two national parks Assessing its current state of interpretation and management in New South Wales Rodney Harrison shows that pastoral heritage is more than just woolsheds and homesteads the showpieces of white male settler colonial economies Pastoral heritage is the product of the mutual histories of Aboriginal and settler Australians It is a form of heritage that is both in and a part of the landscape His archaeological approach to the heritage of the pastoral industry involves both recording sites and revealing attachments to community heritage demonstrating that writing shared histories and celebrating shared heritage has the creative power to reconcile Aboriginal and settler Australians in powerful and positive ways Rough-Hewn Land Keith Heyer Meldahl, 2013-05 **Rough Hewn Land** tells the geologic story of the American West the story of its rocks rivers mountains earthquakes and mineral wealth including gold It tells it by taking you on a 1000 mile long field trip across the rough side of the continent from the California coast to the Rocky Mountains This book puts you on the outcrop geologic hammer in hand to explore the evidence for how the spectacular rough hewn lands of the West came to be When North America broke free from Eurasia and Africa some 200 million years ago it triggered a cascade of violent geologic events that shaped the West we see today As the west moving continent crunched across the seabed of the ancient Pacific islands and assorted pieces of ocean floor collected against its prow to build California and plant gold there too Meanwhile mountains squeezed upward from California to Colorado and vast quantities of molten rock seeded the crust with precious metals while spewing volcanic fire across the land Later the land stretched like an accordion to form the washboard like Basin and Range province and Great Basin within it while California began to crackle along the San Andreas fault Throughout the West today a near constant drumroll of earthquakes testifies to a world still reshaping itself in response to the ceaseless movements of the Earth s tectonic plates **Rough Hewn Land** weaves these stories into the human history of the West As we follow the adventures of John C Fr mont Mark Twain the Donner party and other historic characters we see how geologic forces have shaped human experience just as they direct the fate of the West today **Tablelands of North Queensland** Queensland Government Intelligence and Tourist Bureau, Government intelligence & tourist bureau, 1918 **Hard Road West** Keith Heyer Meldahl, 2020-03-04 The dramatic journeys of the 19th century Gold Rush come to life in this geologist s tour of the American West and the events that shaped

the land In 1848 news of the discovery of gold in California triggered an enormous wave of emigration toward the Pacific The dramatic terrain these settlers crossed is so familiar to us now that it is hard to imagine how frightening even godforsaken its sheer rock faces and barren deserts once seemed to them Hard Road West brings their perspective vividly to life weaving together the epic overland journey of the covered wagon trains and the compelling story of the landscape they encountered Taking readers along the 2 000 mile California Trail Keith Meldahl uses settler s diaries and letters as well as his own experiences on the trail to reveal how the geology and geography of the West shaped our nation s westward expansion He guides us through a landscape of sawtooth mountains following the meager streams that served as lifelines through an arid land all the way to California itself where colliding tectonic plates created breathtaking scenery and planted the gold that lured travelers west in the first place Alternates seamlessly between vivid accounts of the 19th century journey and lucid explanations of the geological events that shaped the landscape traveled Library Journal **Labour History** ,1997
