Railroad Safety Programs United States. Congress. House. Committee on Energy and Commerce. Subcommittee on Transportation and Hazardous Materials,1991 The Present. Jason Paul Jelichich,2016-12-27 When is the last time that you did nothing for 10mins Not reading not watching TV not even thinking For many this seems an impossible feat Life is just too busy We have become so consumed by our work smartphones and gossip

that we have lost touch with our natural selves This disconnection is the root cause of much of the pain we suffer a pain that arises from our resistance to what is You likely have been thinking about doing something about this for a while now knowing that your current trajectory leaves little left in the tank for self care Like most of us you have experienced that feeling of restlessness that keeps your mind whirring even in moments of repose The world just keeps on getting faster and you find yourself struggling to keep pace to stay on top of things to stay centred The Present is written for people just like you It is a laypersons guide to mindfulness offering insights and practices on how to be less tangled up in your thoughts about the past and or future and become more present After all when you are present you are happy in fact it s impossible to be happy and not to be present You re bound to get at least one idea that resonates with you and sets you on a path towards more peace and contentment in your life Perhaps the best news of all is that it can happen right here right now

Hallucinations: New Interventions Supporting People with Distressing Voices and/or Visions Simon McCarthy-Jones,,Mark Hayward,Flavie Waters,Iris E. Sommer,2016-12-04 Hallucinations can occur across the five sensory modalities auditory visual olfactory tactile and gustatory Whilst they have the potential to be benign or even highly valued they can often be devastating experiences associated with distress impaired social and occupational functioning self harm and suicide Those who experience hallucinations in this latter manner may do so within the context of a wide range of psychiatric diagnoses including schizophrenia bipolar disorder borderline personality disorder and post traumatic stress disorder The only routinely available interventions for people distressed by hallucinations are antipsychotic drugs which date from the introduction of chlorpromazine in the 1950s and manualized cognitive behavioral therapy which originated in the 1990s These interventions do not help all people distressed by hallucinations and in the case of antipsychotic medication come with notable side effects There has hence been great interest in new interventions to support people distressed by hallucinations The goal of this Frontiers Research Topic is to present a collection of papers on new developments in clinical interventions for those distressed by hallucinations In the psychiatric condition that remains most strongly associated with hallucinations schizophrenia the majority 70% of people will have experienced hallucinations in the auditory modality approximately a third will have experienced visual hallucinations and a smaller minority will have experienced hallucinations in other modalities Consistent with this prevalence this collection focusses on auditory and visual hallucinations This is not to minimise the potential distress that can occur from hallucinations in other modalities For example tactile hallucinations particularly when stemming from earlier experiences of sexual abuse can be highly distressing and improved ways to help sufferers of such experiences are also needed In summary this collection aims to result in an interdisciplinary collection of papers which will appeal to a wide readership spanning all with an interest in this area
