## **Securing Americas Industrial Strength:**

**Securing America's Industrial Strength** National Research Council, Board on Science, Technology, and Economic Policy, 1999-06-13 This volume presents the conclusions of the National Research Council's Board on Science Technology and Economic Policy from industry studies published under the title U S Industry in 2000 Studies in Competitive Performance and other work on U S industrial performance It reviews patterns of corporate strategy and industry restructuring and considers the role of the national monetary and fiscal policies as well as trade regulatory and intellectual property policies The report presents new statistical evidence of trends in public and private R D expenditures and outlines a policy agenda for the next decade

**Measuring the Science and Engineering Enterprise** National Research Council, Committee on National Statistics, Office of Scientific and Engineering Personnel, Committee to Assess the Portfolio of The Division of Science Resources Studies of NSF, 2000-03-14 The science and engineering enterprise has continued to evolve responding over the last decade to increased economic globalization a post cold war military federal budget fluctuations and structural changes in the way science and engineering are conducted and innovations are adopted This report suggests ways to revise the data collection activities of the Science Resources Studies Division SRS of the National Science Foundation to better capture the current realities of R D funding and S E human resources The report's recommendations would improve the relevance of the data on graduate education the labor market for scientists and engineers and the funding and conduct of research and development and thus better meet the data needs of policymakers managers and researchers

*Trends in Federal Support of Research and Graduate Education* National Research Council, Policy and Global Affairs, Board on Science, Technology, and Economic Policy, Committee on Trends in Federal Spending on Scientific and Engineering Research, 2001-10-30 The Board on Science Technology and Economic Policy updated its 1999 analysis Appendix A Securing America's Industrial Strength 1999 of changes since 1990 in the distribution of federal research funding by field of science and engineering by incorporating FY 1998 and FY 1999 obligations from the NSF Federal Funds survey with particular attention to the trends in basic research support changes in research fields relative dependence on research sponsoring agencies and the relationship between changes in research support and changes in enrollment in graduate training in selected fields of research The Board did not recommend funding levels for any discipline but addressed procedural aspects of R D budgeting

**Capitalizing on New Needs and New Opportunities** National Research Council, Policy and Global Affairs, Board on Science, Technology, and Economic Policy, 2001-02-11 This report addresses a topic of recognized policy concern To capture the benefits of substantial U S investments in biomedical R D parallel investments in a wide range of seemingly unrelated disciplines are also required This report summarizes a major conference that reviewed our nation's R D support for biotechnology and information technologies The volume includes newly commissioned research and makes recommendations and findings concerning the important relationship between information technologies and biotechnology It

emphasizes the fall off in R D investments needed to sustain the growth of the U S economy and to capitalize on the growing investment in biomedicine It also encourages greater support for inter disciplinary training to support new areas such as bioinformatics and urges more emphasis on and support for multi disciplinary research centers *In War and Peace* Guy Stever, 2002-10-07 Science came into Guy Stever s life as a pure and peaceful pursuit It was only later as he walked through the wreckage of wartime London that he began to see science as central to a desperate struggle to survive Past president of Carnegie Mellon University former Chief Scientist of the U S Air Force one time Director of the National Science Foundation professor at MIT for 20 years member of the National Academies of Sciences and Engineering and science advisor to two presidents Guy Stever was a central figure in twentieth century science consistently on the front lines changing the fate of a nation In this thoughtful and candid memoir Stever recounts an extraordinary life that reveals as much about the man as about the major scientific and technological events of his day Born of humble origins and orphaned at an early age Stever journeyed from a small town in New York to work alongside British comrades who were developing and refining the critical radar technology that was to turn the tide of the war against the Germans As a technical intelligence officer these harrowing wartime years took him from the beachheads of Normandy to the German slave labor factories responsible for building the V 2 rockets Stever returned home committed to serving his country He became intimately involved in America s nascent guided missile program and was to remain a key player in the anti ballistic missile defense program that heralded the era of the Cold War As the decades passed Stever continued to exert lasting influence on countless scientific endeavors He was instrumental in the formation of new institutions from the creation of NASA in the post Sputnik years to the merging of Carnegie Tech and the Mellon Institution giving birth to Carnegie Mellon University As Presidential Science Advisor to both Nixon and Ford Stever shaped the very structure of contemporary presidential science advising And he was to chair the oversight committee that redesigned the space shuttle boosters after the Challenger explosion Guy Stever s life offers remarkable insight into the twentieth century Through his eyes we relive the history of the past 50 years witnesses to a tale of science and technology that is revealing in its scope and sweep **Capitalizing on Investments in Science and Technology** National Academy of Engineering, National Academy of Sciences, Institute of Medicine, National Academy of Sciences, National Academy of Engineering, Institute of Medicine, Committee on Science, Engineering, and Public Policy, 1999-04-18 Although the United States is currently capitalizing on its investment in science and technology effectively there remains much room for improvement This volume identifies the ingredients for success in capitalizing on such investments to produce national benefits assesses current U S performance and identifies future challenges The book cites specific examples and examines several cross cutting issues It explores the possibility that the national research portfolio is losing diversity as a result of less long term research in critical fields such as networking and materials It also examines the implications of imbalances in the supply of and demand for science and engineering talent in emerging interdisciplinary fields such as bioinformatics

**Measuring and Sustaining the New Economy** National Research Council, Policy and Global Affairs, Board on Science, Technology, and Economic Policy, 2002-03-08 Sustaining the New Economy will require public policies that remain relevant to the rapid technological changes that characterize it While data and its timely analysis are key to effective policy making we do not yet have adequate statistical images capturing changes in productivity and growth

brought about by the information technology revolution This report on a STEP workshop highlights the need for more information and the challenges faced in measuring the New Economy and sustaining its growth Academy & the Internet Helen Fay Nissenbaum, Monroe E. Price, 2004 This book explores the impact of the Internet on scholarly research across and beyond the social sciences The contributors leading figures in a broad spectrum of disciplines explain how their fields of inquiry are being redefined and what issues of social change are salient as new information technologies increasingly become the subject of scholarly analysis They have rendered a conceptual photograph of how their disciplines are coping with the impact of information technology by covering policy approaches empirical research and theoretical questions Academy the Internet highlights significant zones of inquiry and provides a critical perspective on the direction each discipline is traveling

**Science & Engineering Indicators**, 2002 Securing American Sovereignty United States. Congress. Senate. Committee on Homeland Security and Governmental Affairs. Subcommittee on Federal Financial Management, Government Information, and International Security, 2006 The Invisible Hands of U.S. Commercial Banking Reform Margaret M. Polski, 2012-12-06 This book is a product of my commitment to developing both theory and practice in political economy I first became interested in economic and institutional change in the commercial banking industry when I took a seminar on financial institutions led by Robert Glauber in the Kennedy School of Government at Harvard University in the spring of 1995 In my experience Bob is one of a handful of teachers who has the verve to challenge and inspire both esoteric and practical inquiry the seminar grappled with practical business and policy problems in a way that posed a significant challenge to existing theories In addition to demonstrating the need to better integrate theory and practice it provided a perspective and an approach that I continue to find useful in research consulting and teaching Conducting the research for this study has taught me many things about banking regulation and policy making and I am grateful to a very large number of people for their assistance Bob Glauber continues to be generous in discussing the challenges of change in the financial services industry
