Seduced By Death Doctors Patients And Assisted Suicide:

Seduced by Death Herbert Hendin, 1998 A psychiatrist and world famous authority on suicide offers a persuasive argument against legalizing assisted suicide in the United States Dr Hendin shows what can be done to find better options for those facing the final phase of life **The Case Against Assisted Suicide** Kathleen M. Foley, Herbert

Hendin, 2004-04-29 In The Case against Assisted Suicide For the Right to End of Life Care Dr Kathleen Foley and Dr Herbert Hendin uncover why pleas for patient autonomy and compassion often used in favor of legalizing euthanasia do not advance or protect the rights of terminally ill patients Incisive essays by authorities in the fields of medicine law and bioethics draw on studies done in the Netherlands Oregon and Australia by the editors and contributors that show the dangers that legalization of assisted suicide would pose to the most vulnerable patients Thoughtful and persuasive this book urges the medical profession to improve palliative care and develop a more humane response to the complex issues facing those who are terminally ill **When Doctors Kill** Joshua A. Perper, Stephen J. Cina, 2010-08-12 It would come as no surprise that many readers may be shocked and intrigued by the title of our book Some especially our medical colleagues may wonder why it is even worthwhile to raise the issue of killing by doctors Killing is clearly anathetical to the Art and Science of Medicine which is geared toward easing pain and suffering and to saving lives rather than smothering them Doctors should be a source of comfort rather than a cause for alarm Nevertheless although they often don't want to admit it doctors are people too Physicians have the same genetic library of both endearing qualities and character defects as the rest of us but their vocation places them in a position to intimately interject themselves into the lives of other people In most cases fortunately the positive traits are dominant and doctors do more good than harm While physicists and mathematicians paved the road to the stars and deciphered the mysteries of the atom they simultaneously unleashed destructive powers that may one day bring about the annihilation of our planet Concurrently doctors and allied scientists have delved into the deep secrets of the body and mind mastering the anatomy and physiology of the human body even mapping the very molecules that make us who we are But make no mistake a person is not simply an elegant biological machine to be marveled at then dissected

Euthanasia and Physician-Assisted Suicide Gerald Dworkin, R. G. Frey, Sissela Bok, 1998-08-28 The moral issues involved in doctors assisting patients to die with dignity are of absolutely central concern to the medical profession ethicists and the public at large The debate is fuelled by cases that extend far beyond passive euthanasia to the active consideration of killing by physicians The need for a sophisticated but lucid exposition of the two sides of the argument is now urgent This book supplies that need Two prominent philosophers Gerald Dworkin and R G Frey present the case for legalization of physician assisted suicide One of the best known ethicists in the US Sissela Bok argues the case against **Euthanasia and Physician-Assisted Suicide** By: Michael Manning, M.D., A concise overview of the history and arguments surrounding euthanasia and physician assisted suicide Euthanasia and Physician-assisted Suicide Michael Manning (M.D.), 1998 A

concise overview of the history and arguments surrounding euthanasia and physician assisted suicide

Physician-assisted Suicide and Euthanasia in the Netherlands, 1996 *Rational Suicide, Irrational Laws* Susan Stefan, 2016 *Rational Suicide Irrational Laws* argues that laws aimed at preventing suicide and laws aimed at facilitating it co exist because they are based on two radically disparate conceptions of the would be suicide This is the first book that unifies policies and laws toward people who want to end their lives **Assisted Suicide in Canada** Travis Dumsday, 2021-09-01 In 2015 the Supreme Court of Canada struck down the criminal laws prohibiting assisted suicide and voluntary active euthanasia in its Carter v Canada ruling Yet debate on this controversial subject continues *Assisted Suicide in Canada* delves into the moral and policy dimensions of this case summarizing previous federal and provincial rulings on medical assistance in dying MAID as well as explaining subsequent legislation Travis Dumsday engages in an accessible yet nuanced exploration of the most significant ethical arguments and unravels related legal and policy debates Thorny issues such as freedom of conscience for health care professionals public funding for MAID and extensions of eligibility are dealt with thoughtfully and clearly Carter v Canada will alter Canadians common understanding of life death and the practice of medicine for generations *Assisted Suicide in Canada* provides readers with the tools to think through the fundamental legal ethical and policy issues surrounding assisted dying **End-of-Life Decisions in Medical Care** Stephen W. Smith, 2012-02-23 Stephen W Smith explores the legal and ethical issues involved in end of life decision making **Euthanasia, Ethics and Public Policy** John Keown, 2002-04-25 Whether the law should permit voluntary euthanasia or physician assisted suicide is one of the most vital questions facing all modern societies Internationally the main obstacle to legalisation has proved to be the objection that even if they were morally acceptable in certain hard cases voluntary euthanasia and physician assisted suicide could not be effectively controlled society would slide down a slippery slope to the killing of patients who did not make a free and informed request or for whom palliative care would have offered an alternative How cogent is this objection This book provides the general reader who need have no expertise in philosophy law or medicine with a lucid introduction to this central question in the debate not least by reviewing the Dutch euthanasia experience It will interest all in any country whether currently for or against legalisation who wish to ensure that their opinions are better informed **Law at the End of Life** Carl Schneider, 2000 Discusses the issues surrounding physician assisted suicide in light of the Supreme Court s recent decision **The Contribution of Natural Law Theory to Moral and Legal Debate Concerning Suicide, Assisted Suicide, and Voluntary Euthanasia** Craig Paterson, 2001 **The Price of Compassion** Michael Stigl, 2010-05-12 This important book includes a compelling selection of original essays on euthanasia and associated legislative and health care issues together with important background material for understanding and assessing the arguments of these essays The book explores a central strand in the debate over medically assisted death the so called slippery slope argument The focus of the book is on one particularly important aspect of the downward slope of this

argument hastening the death of those individuals who appear to be suffering greatly from their medical condition but are unable to request that we do anything about that suffering because of their diminished mental capacities Slippery slope concerns have been raised in many countries including Britain the Netherlands Canada and the United States This book concentrates most of its attention on the latter two countries Stingl divides the book into four parts Part I lays out the relevant public policies in the form of legal judgments making them the philosophical point of departure for readers Part II discusses the ever present slippery slope objection to assisted suicide and other forms of euthanasia Parts III and IV examine the role of social factors and political structures in determining the morality and legalization of voluntary and non voluntary euthanasia These sections are especially valuable The inclusion of a selection of papers on the relationship between the morality and legality of euthanasia and systems of health care delivery is of particular interest especially to those who want to make statistical legal and moral comparisons between the USA and Canada

Assisted Suicide Lois Snyder, Arthur L. Caplan, 2002 There is no constitutional right to physician assisted suicide says the U S Supreme Court Most states have laws against it but states can also allow it as Oregon has done others are considering legalization Still very little guidance has been offered about its practice *Assisted Suicide Finding Common Ground* fills that void A diverse group of experts some for some against provide a framework for thinking about what assisted suicide particularly physician assisted suicide is and how its legalized practice might be guided The book does not take a position on the continuing debate about the morality or wisdom of legalizing assisted suicide But physician assisted suicide is now taking place and the more pressing concerns are those pertaining to its implementation Editors Lois Snyder and Art Caplan attempt to find common ground on those real world concerns Among the questions asked and answered are What is assisted suicide Is physician assisted suicide different from refusal of treatment Are there alternatives to assisted suicide How useful are currently available guidelines for physician assisted suicide Who should have access to what Does assisted suicide necessarily mean physician assisted suicide Can the practice be effectively and meaningfully regulated How should physicians respond to requests for assisted suicide Assisted suicide is one of the most ethically challenging issues in medicine and bioethics defining who we are and want to be as individuals and as a society This book takes a hard look at alternatives to the practice the implications for the patient physician relationship who should write guidelines and how to regulate physician assisted suicide and establish safeguards so that it is voluntary and an option of last resort

Strange Bedfellows Ben A. Rich, 2001-11-30 The relationship between law and bioethics and the influence of both on medical research and clinical practice is a topic that is often mentioned but rarely subjected to sustained critical analysis This book considers a number of issues in medicine in which the influence of the law has been most profound and positive including informed consent advance directives constitutional liberties and privacy standards for pain management and end of life care The book provides important background material on significant legal and philosophical concepts terms and principle necessary to an understanding of the legal process and ethical analysis This

work establishes the role of law in medicine and bioethics as being positive and its continuing involvement in the rights of research subjects and patients as a necessity

Death with Dignity Robert Orfali, 2011 In this book the author makes a case for legalized physician assisted dying Using the latest data from Oregon and the Netherlands he puts a new slant on perennial debate topics such as slippery slopes the integrity of medicine and sanctity of life This book provides an in depth look at how we die in America today It examines the shortcomings of our end of life system You will learn about terminal torture in hospital ICUs and about the alternatives hospice and palliative care The author scrutinizes the good the bad and the ugly He provides a critique of the practice of palliative sedation The book makes a strong case that assisted dying complements hospice By providing both Oregon now has the best palliative care system in America This book above all may help you or someone you care about navigate this strange landscape we call end of life It can be an informed guide to a good death in the age of hospice and high tech medical intervention

The Law and Ethics of Medicine John Keown, 2012-04-26 The Law and Ethics of Medicine Essays on the Inviolability of Human Life explains the principle of the inviolability of human life and its continuing relevance to English law governing aspects of medical practice at the beginning and end of life The book shows that the principle though widely recognized as an historic and foundational principle of the common law has been misunderstood in the legal academy at the Bar and on the Bench Part I of the book identifies the confusion and clarifies the principle distinguishing it from vitalism on the one hand and a qualitative evaluation of human life on the other Part II addresses legal aspects of the beginning of life including the history of the law against abortion and its relevance to the ongoing abortion debate in the US the law relating to the morning after pill and the legal status of the human embryo in vitro Part III addresses legal aspects of the end of life including the euthanasia debate the withdrawal of tube feeding from patients in a persistent vegetative state and the duty to provide palliative treatment This unique collection of essays offers a much needed clarification of a cardinal legal and ethical principle and should be of interest to lawyers bioethicists and healthcare professionals whether they subscribe to the principle or not in all common law jurisdictions and beyond
