The Morality of Everyday Life Thomas Fleming, 2004 Fleming offers an alternative to enlightened liberalism where moral and political problems are looked at from an objective point of view and a decision made from a distant perspective that is both rational and universally applied to all comparable cases He instead places importance on the particular the local and moral complexity advocating a return to premodern traditions for a solution to ethical predicaments In his view liberalism and postmodernism ignore the fact that human beings by their very nature refuse to live in a world of abstractions where the attachments of friends neighbors family and country make no difference Fleming believes that a modern type of casuistry should be applied to moral conflicts using examples from history literature and religion to explain this moral ecology that refuses to divorce organisms from their interactions with each other and with their environment

**Decolonizing Knowledge** Frédérique Apffel-Marglin, Stephen A. Marglin, 1996-04-25 Development failures environmental degradation and social fragmentation can no longer be regarded as side effects of externalities They are the toxic consequences of pretensions that the modern Western view of knowledge is a universal neutral view applicable to all people at all times The very word development and its cognates underdevelopment and developing confidently mark the first world s as the future of the third This book argues that the linear evolutionary paradigm of development that comes out of modern Western view of knowledge is a contemporary form of colonialism The authors covering topics as diverse as the theory of knowledge underlying the work of John Maynard Keynes what the renowned British geneticist J B S Haldane was looking for when he migrated to India the knowledge of Mexican and Indian peasants propose a pluralistic vision and decolonization of knowledge the replacement of one way transfers of knowledge and technology by dialogue and mutual learning      **Development and Social Change** Philip McMichael, 2008 Fourth edition of this international bestseller Adopted by sociology politics development and also geography departments      **The Paradox Of Wealth And Poverty** Daniel Little, 2018-02-07 We live in a time of human paradoxes Scientific knowledge has reached a level of sophistication that

permits understanding of the most arcane phenomena and yet religious fundamentalism dominates in many parts of the world We witness the emergence of a civil liberal constitutionalism in many regions of the world and yet ethnic violence threatens the lives and dignity of millions And we live in a time of rapid economic and technological advance and yet several billions of people live in persistent debilitating poverty In this book Daniel Little dissects these paradoxes offering the clearest perspective on how best to approach international development Using both empirical and philosophical approaches Little provides a schematic acquaintance with the most important facts about global development at the turn of the twentieth century In doing so he explores what appear to be the most relevant moral principles and insights that ought to be invoked as we consider these facts and then draws conclusions about what sorts of values and goals ought to guide economic development in the twenty first century

*Agrarian Crossings* Tore C. Olsson, 2020-11-03 In the 1930s and 1940s rural reformers in the United States and Mexico waged unprecedented campaigns to remake their countrysides in the name of agrarian justice and agricultural productivity *Agrarian Crossings* tells the story of how these campaigns were conducted in dialogue with one another as reformers in each nation came to exchange models plans and strategies with their equivalents across the border Dismantling the artificial boundaries that can divide American and Latin American history Tore Olsson shows how the agrarian histories of both regions share far more than we realize He traces the connections between the US South and the plantation zones of Mexico places that suffered parallel problems of environmental decline rural poverty and gross inequities in land tenure Bringing this tumultuous era vividly to life he describes how Roosevelt s New Deal drew on Mexican revolutionary agrarianism to shape its program for the rural South Olsson also looks at how the US South served as the domestic laboratory for the Rockefeller Foundation s green revolution in Mexico which would become the most important Third World development campaign of the twentieth century and how the Mexican government attempted to replicate the hydraulic development of the Tennessee Valley Authority after World War II Rather than a comparative history *Agrarian Crossings* is an innovative history of comparisons and the ways they affected policy moved people and reshaped the landscape

**The State of World Rural Poverty** Idriss Jazairy, Mohiuddin Alamgir, Theresa Panuccio, 1992 Despite almost four decades and billions of dollars in development activities we are barely in a position to track the changing dynamics of poverty or to define with conviction the processes that entrap the poor in their misery Accounting for about 90% of global poverty rural poverty through transmigration is also a main contributor to urban poverty It is in the rural areas of the world where poverty is most severe in human terms where the hunger hopelessness hardship and despair commonly associated with entrenched poverty are most pronounced where basic health services sanitation educational opportunities and other common amenities are most lacking The alleviation of rural poverty is therefore tantamount to the alleviation of global poverty in its entirety *The State of World Rural Poverty* offers the first comprehensive look at the economic conditions and prospects of the world s rural poor
