Challenges and Opportunities for Organic Agriculture and the Seed Industry Arturo Martinez,2004

The Custodians of Biodiversity Manuel Ruiz,Ronnie Vernooy,2012-03-15 Globally local and indigenous approaches to conserving biodiversity crop improvement and managing precious natural resources are under threat Many communities have to deal with biopiracy for example As well existing laws are usually unsuitable for protecting indigenous and traditional knowledge and for recognizing collective rights such as in cases of participatory plant breeding where farmers researchers and others join forces to improve existing crop varieties or develop new ones based on shared knowledge and resources This book addresses these issues It outlines the national and international policy processes that are currently underway to protect local genetic resources and related traditional knowledge and the challenges these initiatives have faced In particular these themes are addressed within the context of the Convention of Biological Diversity and the International Treaty on Plant Genetic Resources for Food and Agriculture The authors broaden the policy and legal debates beyond the sphere of policy experts to include the knowledge holders themselves These are the custodians of biodiversity farmers herders and fishers in local communities Their experience in sharing access and benefits to genetic resources is shown to be crucial for the development of effective national and international agreements The book presents and analyzes this experience including case studies from China Cuba Honduras Jordan Nepal Peru and Syria Copublished with the International Development Research Centre IDRC

Plant Genetic Conservation Nigel Maxted,Danny Hunter,Rodomiro Ortiz Ríos,2020-09-10 Plant diversity sustains all animal life and the genetic diversity within plants underpins global food security This text provides a practical and theoretical introduction to the strategies and actions to adopt for conserving plant genetic variation as well as explaining how humans can exploit this diversity for sustainable development Notably readable it initially offers current knowledge on the characterization and evaluation of plant genetic resources The authors then discuss strategies from in situ and ex situ conservation to crop breeding exploring how these can be used to improve food security in the face of increasing agrobiodiversity loss human population growth and climate change Each chapter draws on examples from the literature or the authors research and includes further reading references Containing other useful features such as a glossary it is invaluable for professionals and undergraduate and graduate students in plant sciences ecology conservation genetics and natural resource management

Community Seed Banks Ronnie Vernooy,Pitambar Shrestha,Bhuwon Sthapit,2015-05-15 Community seed banks first appeared towards the end of the 1980s established with the support of international and national non governmental organizations This book is the first to provide a global review of their

development and includes a wide range of case studies Countries that pioneered various types of community seed banks include Bangladesh Brazil Ethiopia India Nepal Nicaragua the Philippines and Zimbabwe In the North a particular type of community seed bank emerged known as a seed savers network Such networks were first established in Australia Canada the UK and the USA before spreading to other countries Over time the number and diversity of seed banks has grown In Nepal for example there are now more than 100 self described community seed banks whose functions range from pure conservation to commercial seed production In Brazil community seed banks operate in various regions of the country Surprisingly despite 25 years of history and the rapid growth in number organizational diversity and geographical coverage of community seed banks recognition of their roles and contributions has remained scanty The book reviews their history evolution experiences successes and failures and reasons why challenges and prospects It fills a significant gap in the literature on agricultural biodiversity and conservation and their contribution to food sovereignty and security

Saving More Than Seeds Catherine Phillips, 2016-04-01 *Saving More Than Seeds* advances understandings of seed people relations with particular focus on seed saving The practice of reusing and exchanging seeds provides foundation for food production and allows humans and seed to adapt together in dynamic socionatural conditions But the practice and its practitioners are easily taken for granted even as they are threatened by neoliberalisation Combining original ethnographic research with investigation of an evolving corporate seed order this book reveals seed saving not only as it occurs in fields and gardens but also as it associates with genebanking genetic engineering intellectual property rights and agrifood regulations Drawing on diverse social sciences literatures Phillips illustrates ongoing practices of thinking feeling and acting with seeds raising questions about what seed people relations should accomplish and how different ways of relating might be pursued to change collective futures

Towards Effective and Sustainable Seed Relief Activities Food and Agriculture Organization of the United Nations, 2004-01-01 This report contains papers given to a FAO workshop meeting held in Rome in May 2003 organised to consider how to improve the effectiveness of seed relief schemes to promote sustainable development and food security to identify gaps in the development of tools guidance and methodologies and to make recommendations for further collaborative work It includes case studies of seed relief activities in several African countries
