Seeing Landscapes:

On Landscapes Susan Herrington, 2013-12-19 There is no escaping landscape it's everywhere and part of everyone's life. Landscapes have received much less attention in aesthetics than those arts we can choose to ignore such as painting or music but they can tell us a lot about the ethical and aesthetic values of the societies that produce them. Drawing on examples from a wide range of landscapes from around the world and throughout history Susan Herrington considers the ways landscapes can affect our emotions, our imaginations, and our understanding of the passage of time. On Landscapes reveals the design work involved in even the most naturalistic of landscapes and the ways in which contemporary landscapes are turning the challenges of the industrial past into opportunities for the future. Inviting us to thoughtfully see and experience the landscapes that we encounter in our daily lives, On Landscapes demonstrates that art is all around us.

Thoreau's Sense of Place Richard J. Schneider, 2000-05 Recent Thoreau studies have shifted to an emphasis on the green Thoreau on Thoreau, the environmentalist rooted firmly in particular places and interacting with particular objects. In the wake of Buell's *Environmental Imagination*, the nineteen essayists in this challenging volume address the central questions in Thoreau studies today: how green, how immersed in a sense of place was Thoreau really, and how has this sense of place affected the tradition of nature writing in America? The contributors to this stimulating collection address the ways in which Thoreau and his successors attempt to cope with the basic epistemological split between perceiver and place inherent in writing about nature. Related discussions involve the kinds of discourse most effective for writing about place. They focus on the impact on Thoreau and his successors of culturally constructed assumptions deriving from science, politics, race, gender, history, and literary conventions. Finally, they explore the implications surrounding a writer's appropriation or even exploitation of places and objects.

Assessing Public Concern for Landscape Quality Arthur W. Magill, 1992

Rational Landscapes and Humanistic Geography Edward Relph, 2015-07-30 This book first published in 1981 explores why it is that the modern built environment while successfully providing material comfort and technical efficiency none the less breeds despair and depression rather than inspires hope and commitment. The source of this paradox, where material benefits appear to have been gained only at the expense of intangible values and qualities, is found in humanism, the persistent and powerful belief that all problems can be solved through the use of human reason. But humanism has become increasingly confused, rationalistic, callously devoted to efficiency and authoritarian. These confusions and contradictions together with the anti-nature stance of humanism and its failure to teach humane behaviour lead the author to conclude that humanism is best rejected. Such rejection does not advocate the inhuman and anti-human but requires instead a return to the humility that lies at the origin of humanism: a respect for objects, creatures, environments, and people. This environmental humility is explored in the context of individuality of settings, ways of seeing landscapes, appropriation, and ways of building places. This title will be of interest to students of human geography.

Landscape and History Since 1500 Ian D.

Whyte, 2002 *Landscape and History* explores a complex relationship over the past five centuries. The book is international and interdisciplinary in scope, drawing on material from social, economic and cultural history as well as from geography, archaeology, cultural geography, planning and landscape history. In recent years, as the author points out, there has been increasing interest in and concern for many aspects of landscape within British, European and wider contexts. This has included the study of the history, development and changes in our perception of landscape as well as research into the links between past landscapes and political ideologies, economic and social structures, cartography, art and literature. There is also considerable concern at present with the need to evaluate and classify historic landscapes and to develop policies for their conservation and management in relation to their scenic heritage and recreational value. This is manifest not only in the designation of particularly valued areas with enhanced protection from planning developments such as national parks and world heritage sites, but in the countryside more generally. Further, Ian D. Whyte argues, changes in European Union policies relating to agriculture with a greater concern for the protection and sustainable management of rural landscapes are likely to be of major importance in relation to the themes of continuity and change in the landscapes of Britain and Europe.

Landscapes and Social Transformations on the Northwest Coast Jeff Oliver, 2010 *Nordamerika Kolonialzeit*
Landschaft Raumkonzepte soziale Konstruktion Computer Games As Landscape Art Peter Nelson, 2023-08-31 This book proposes that computer games are the paradigmatic form of contemporary landscape and offers a synthesis of art history, geography, game studies and play. Like paint on canvas, the game engine is taken as the underlying medium and using the Valve Source Engine as the primary case study, it analyses landscapes according to the technical, economic and cultural features this medium affords. It presents the single player first person shooter *Half Life 2* as a Promethean safari, examines how the economics of gambling and product placement shaped the eSports landscapes of *Counter Strike* and reveals how sandboxes such as *Garry's Mod* visualise the radical landscape of Web 2.0. This book explores how our relationship to the environment is changing, how we express this through computer games and how we can move beyond examining artistic influences on games to examining how historical connections flow through games and the history of landscape images.

General Technical Report NE, 1980 **Landscape, Literature and English Religious Culture, 1660-1800** R. Mayhew, 2004-03-15 *Landscape Literature and English Religious Culture 1660-1800* offers a powerful revisionist account of the intellectual significance of landscape descriptions during the long Eighteenth century. Landscape has long been a major arena for debate about the nature of Eighteenth century English culture; this book surveys those debates and offers a provocative new account. Mayhew shows that describing landscape was a religiously contested practice and that different theological positions led differing authors to different descriptive approaches. Landscape description then shows English intellectual life still in the grips of a Christian and classical mentality in the long Eighteenth century. **Seeing Landscapes** Charlie Waite, 1999 Information on the creative aspects of each photograph combine with practical tips and technical detail.

Landscape Perspectives Marc Antrop, Veerle Van Eetvelde, 2017-12-19

Climb a mountain and experience the landscape Try to grasp its holistic nature Do not climb alone but with others and share your experience Be sure the ways of seeing the landscape will be very different We experience the landscape with all senses as a complex dynamic and hierarchically structured whole The landscape is tangible out there and simultaneously a mental reality Several perspectives are obvious because of language culture and background Many disciplines developed to study the landscape focussing on specific interest groups and applications Gradually the holistic way of seeing became lost This book explores the different perspectives on the landscape in relation to its holistic nature We start from its multiple linguistic meanings and a comprehensive overview of the development of landscape research from its geographical origins to the wide variety of today's specialised disciplines and interest groups Understanding the different perspectives on the landscapes and bringing them together is essential in transdisciplinary approaches where the landscape is the integrating concept
